## Area Information

### Area 011 – Magnolia

Area 11 / Magnolia is located northwest of the Seattle Central Business District (CBD). The Magnolia neighborhood is comprised primarily of residential zoned parcels with limited retail or commercial use. In the Northeastern and Eastern portion of Area 11 are Fisherman's Terminal and Interbay. Fisherman's Bay is primarily commercial and serves the marine industry and is home of the Seattle Fishing fleet. Interbay is primarily railroad yards as well as Cruise Ship terminals.

Topography is a significant consideration for the area, especially with areas along Puget Sound and the Southeastern portion of Magnolia Hill. Landslides have been recorded and some parcels have been rendered unbuildable due to these issues. Many of the slide impacted properties have been remedied with the land stabilized through retention walls or other means. The cost of these land stabilization efforts appears economically feasible due to a strong demand for water, mountain, and city views. The City of Seattle has designated areas that would be considered steep slope, potential slide areas and /or Environmentally Critical Areas (ECA). New development has been occurring in these areas but must comply with ECA restrictions.

Magnolia is somewhat isolated from the remainder of Seattle with only three access points; Magnolia Bridge at the south, Dravis Street at the center and Emerson Street from the North. Employment is generally available in the nearby Seattle CBD.

Even though it is within close proximity to downtown Seattle, Magnolia has a suburban, small community feel, due to its somewhat limited access, larger lots/zoning, and Magnolia village. This, along with the numerous recreation opportunities available with Discovery Park and Magnolia Park in the neighborhood make it a desirable area in which to live.

Approximately 96% of the parcels in this area are improved and a majority portion of the remaining undeveloped land would be considered unbuildable. New construction typically follows the teardown of an existing improvement.

The typical grade of homes in the area is 7 or 8 on a scale of 1-13. Most homes were built in the late 1930's and 1940's. Approximately 40% of the parcels have some degree of view, most often of Puget Sound, Seattle Skyline, Cascade or Olympic Mountains. High quality homes are scattered within the entire area but are most prevalent along a Puget Sound view corridor in the Southwestern portion of the area. Waterfront properties run along Puget Sound and are primarily high bank along the Western and Southern portions of Magnolia and low bank along Shilshole Bay. These low bank properties may include private moorage buoys and private docks for direct marine access into Puget Sound.

Area 11 is divided into four subareas. Historically, the subarea boundaries have been based on geographical locations that are naturally separated by major arterials, as well as, by population size to facilitate the workloads for the appraisal teams.

Subarea 1 is the northern most area and is north of Discovery Park. This subarea includes the community of Lawtonwood as well as homes along Shilshole Bay. Subarea 3 is on the eastern side of Magnolia with BNSF railroad yards, marine commercial services, fishing fleet terminal, and Cruise ship terminals. Commercial activity is generally to the North and East of Gilman Avenue. Subarea 5 is along the Southern and Western portion. It is predominantly residential and many of the homes are view properties. Located on the south end of Magnolia is Eliot Bay Marina which is considered one of the

most desirable marina's in the Seattle Area. Subarea 7 is the interior portion of Magnolia which is primarily residential with schools and Magnolia Village business and retail stores toward the southern portion of Subarea 7.

## Area 011 – Housing Profile

Grade 5/ Year Built 1926/YrRen1995/Total Living Area 530

Grade 6/ Year Built 1948/ Total Living Area 870

Grade 7/ Year Built 1947/ Total Living Area 1090

Grade 8/ Year Built 2013/ Total Living Area 1310

Grade 9/ Year Built 1930/ Total Living Area 2670

Grade 10/Year Built 1940/Yr Ren 1999/Total Living Area 4880

# Glossary for Improved Sales

## Condition: Relative to Age and Grade

1= Poor	Many repairs needed. Showing serious deterioration.
2= Fair	Some repairs needed immediately. Much deferred maintenance.
3= Average	Depending upon age of improvement; normal amount of upkeep for the age of the home.
4= Good	Condition above the norm for the age of the home. Indicates extra attention and care has been taken to maintain.
5= Very Good	Excellent maintenance and updating on home. Not a total renovation.

## Residential Building Grades

Grades 1 - 3	Falls short of minimum building standards. Normally cabin or inferior structure.
Grade 4	Generally older low quality construction. Does not meet code.
Grade 5	Lower construction costs and workmanship. Small, simple design.
Grade 6	Lowest grade currently meeting building codes. Low quality materials, simple designs.
Grade 7	Average grade of construction and design. Commonly seen in plats and older subdivisions.
Grade 8	Just above average in construction and design. Usually better materials in both the exterior and interior finishes.
Grade 9	Better architectural design, with extra exterior and interior design and quality.
Grade 10	Homes of this quality generally have high quality features. Finish work is better, and more design quality is seen in the floor plans and larger square footage.
Grade 11	Custom design and higher quality finish work, with added amenities of solid woods, bathroom fixtures and more luxurious options.
Grade 12	Custom design and excellent builders. All materials are of the highest quality and all conveniences are present.
Grade 13	Generally custom designed and built. Approaching the Mansion level. Large amount of highest quality cabinet work, wood trim and marble; large entries.
