Respond: HIV Tracing

As part of the effort to **End the HIV Epidemic**, we must respond to rapidly growing HIV clusters. This means getting prevention and treatment services to people who need them.

In King County, about 200 people are diagnosed with HIV every year. We want to get that number under 50, but we need your help.

GET ENGAGED!

If called, participate in HIV tracing activities by answering questions and providing information.

PRIVACY MATTERS!

All personal data and information is kept private and totally confidential.

WHAT TO EXPECT

A 10 minute Q&A with a trained professional about living with HIV.

WE CAN HELP:

- Get you into HIV care.
- Get you into supportive services.
- Get your partners and other people you know an HIV test or help getting PrEP.

HOW DO WE KNOW THERE'S A CLUSTER?

Using partner services and HIV tracing, we identify when people have similar HIV to one another.

LET'S END HIV TOGETHER

Respond: HIV Tracing

F.A.Q.s

Why are we calling you?
Because we believe your HIV is similar to a group of other people.

Why should you talk to us?
We want to make sure you, your partners, and others in the community have what's needed to be healthy and stop HIV's spread.

What's in it for you?
We can help you with healthcare, insurance, support groups, housing & meal assistance – we have access to LOTS of resources!

What to Expect if You are Called

*If you get a call from an HIV Tracing professional you should **Respond**.*
*They will ask you:*

- How is your medical care going?

- What services do you need?

- Do you know anyone who needs HIV testing or PrEP?

- Your opinion about being part of HIV tracing activities?

- Did you have a partner services interview when you were diagnosed with HIV? If not, they will do one with you.

- Questions about COVID-19: have you had it or been impacted by it?

Respond: HIV Tracing
