

King County Pandemic and Racism Community Advisory Group

January 7th 10:30 am – 12 pm

Agenda

- | | |
|--|---------------|
| Welcome, Kimberly Meck | 10:30 – 10:35 |
| Public Health Update: COVID19 Vaccinations Updates and Implementation Planning.
Matias Valenzuela, Francesca Holme, Ingrid Ulrey, Naisha Williams, Araceli Gallegos | 10:35 – 11:30 |
| <ul style="list-style-type: none">• Intro to COVID vaccine – Matias• Implementation of COVID vaccine to date: state and local activities, and “Phase 1a” —
Francesca• Next steps in COVID vaccine implementation: guidance on “Phase 1b” – Ingrid<ul style="list-style-type: none">• Group discussion Update on collaboration with BIPOC communities -- Naisha and Araceli• Breakout discussions on myths, questions and concerns• Group discussion - Naisha | |
| PARCAG Survey – Kimberly Meck | 11:35 |
| Purpose and Review dates of Survey | |
| <ul style="list-style-type: none">• Discussion: One thing you feel and or think PARCAG has made progress on and or improved in 2020? | |
| Meeting Close & Next Steps | 11:55 |

Participation guidelines – creating inclusive conversations

- **Be present** – bring your full attention to the process and listen deeply.
- **Try on new ideas and perspectives** – remember, “try on” is not the same as “take on.”
- **It’s OK to disagree** – avoid discounting or judging the beliefs and views of others.
- **Check out assumptions** – do not assume you know what is meant by a particular communication, especially when it triggers you
- **Step up, step back** - if you are a person who shares easily, leave space for others to step into. If you are a person who doesn’t speak often, consider stepping forward and sharing your wisdom.
- **Practice both/and thinking** - making room for more than one idea at a time means appreciating and valuing multiple realities.
- **Intent is different than impact** – both are important. It is also important to own our ability to have a negative impact in another person’s life despite our best intention.

Public Health Update: COVID19 Vaccinations Updates and Implementation Planning.

- ❖ Matias Valenzuela
- ❖ Francesca Holme
- ❖ Ingrid Ulrey
- ❖ Naisha Williams
- ❖ Araceli Gallegos

Where do we stand today in King County?

- Cases are very high. The 14-day incidence rate is over 250/100K; our goal is less than 25/100K. Hospitalizations are also increasing to the highest level since April.
- Avoid gathering indoors, wear masks, increase ventilation, stay six feet apart, get tested at the first sign of illness or close contact of a known case. It's more important than ever.
- BIPOC communities continue to experience disproportionate impacts of COVID-19.
- The most common presumed exposures include household transmission, community & social gatherings, and non-health-care workplaces.
- Vaccine is starting to arrive in King County. Workers at high risk in health care settings and long-term care facilities are prioritized in this initial vaccine roll out.
- New testing sites are being added regularly. New sites in Enumclaw and Bellevue have recently come online.

COVID-19 Vaccine Updates

January 7, 2021

Public Health Seattle King County's goal is to quickly, efficiently and equitably vaccinate as many King County residents as possible in order to suppress the spread of COVID-19 and get the pandemic under control. This means delivering two doses of vaccine to about 1.26 million people, starting with those at highest risk.

Limited quantities of vaccine in King County

Pfizer BioNtech Vaccine and Moderna Vaccine – approved for Emergency Use Authorization by FDA and recommended for people age 16 and above.

As of 1/5/21, **107,925 doses** have arrived in KC.

There are 1.8 million adults living in KC.

There are about 150,000 people in the first-to-receive vaccine group identified by the State Department of Health.

State vs. Local Role

State Dept of Health - lead entity

- Enroll providers
- Prioritization / allocation
- Distribution - ship vaccine
- Verification/voucher system
- Reporting system, PrepMod
- Public information campaign

PHSKC – local coordination

- Work with partners to develop operational plans to reach priority populations
- Identify and address gaps, ex) set up vaccination clinics as needed
- Locally tailored public information
- Community and BIPOC relationships and trust building

State Dept of Health - Final Phase 1a Guidance

PHASE 1 Guidance

- **High-risk workers in health care settings** (clinical judgment should be applied to identify who is at greatest risk using the guidance below)
- **High-risk first responders** (clinical judgment should be applied to identify who is at greatest risk using the guidance below)
- **Residents and staff of nursing homes, assisted living facilities** and other community-based, congregate living settings where most individuals over 65 years of age are receiving care, supervision, or assistance

King County: Phase 1a Vaccination as of 1/5/21

Documented COVID-19 vaccinations among King County residents

At a glance

Number of persons with documented COVID vaccinations:

Vaccines administered by date

Vaccines documented by manufacturer, by week administered

	Dec 13	Dec 20	Dec 27	Jan 3	All
All	8,143 100.0%	11,109 100.0%	14,459 100.0%	1,954 100.0%	35,665 100.0%
Pfizer	8,073 99.1%	9,137 82.2%	6,899 47.7%	289 14.8%	24,398 68.4%
Moderna		1,921 17.3%	7,297 50.5%	1,662 85.1%	10,880 30.5%
Undetermined	70 0.9%	51 0.5%	263 1.8%	3 0.2%	387 1.1%

Even as we continue with Phase 1a, we are planning for Phase 1b: older adults, and essential workers.

State guidance issued Jan. 6 for Phase 1b

- 1b1 (Tier 1)
 - All people 70 years and older
 - People 50 years and older who live in multigenerational households
- 1b2 (Tier 2)
 - High-risk critical workers 50 years and older who work in congregate settings:
 - Agriculture; food processing; grocery stores; K-12 (teachers and school staff); child care; corrections, prisons, jails, or detention facilities (staff); public transit; fire; law enforcement
- 1b3 (Tier 3)
 - People 16 years or older with 2 or more co-morbidities or underlying condition
- 1b4 (Tier 4)
 - High-risk critical workers in congregate settings under 50 years old
 - People, staff, and volunteers of all ages in congregate living settings:
 - Correctional facilities; group homes for people with disabilities; shelters for people experiencing homelessness

Key Issues / Considerations for Phase 1b

- There will be many challenges in early weeks of the 1a launch. Brace for this to be messy:
 - Dues to the federal funding cliff, PH has a fraction of the staff needed to pull off this huge and complex and endeavor.
 - Initial allocation of doses is limited, and the timeline will depend on supply chain.
 - Vaccine hesitancy among 1b groups may be significant.
 - Post-dose, some people will have COVID/Flulike symptoms will need sick leave, impacting essential businesses.
 - Verification and tracking systems are not yet ready. How to identify and verify eligibility for this group?
- The hope is that this process will smooth out over time as the supply chain widens and more providers receive doses, key systems come on-line and as more people are get vaccinated without ill effects.

Discussion questions: Phase 1b

PARCAG Member Survey

- Kimberly Meck
 - Review Purpose of PARCAG Survey
 - Dates and Review for PARCAG Survey
- Discussion
 - Discuss one thing you feel and or think PARCAG has made progress on and or improved in 2020?

measurable goals
develop actions
intersectionality
push intersectionality
vulnerability
transparency
listen
accountability
fight ableism
vulnerability
listen hard
learn from parcag members
community centered
internal anti-racist org
collaborate cross-sector
educate about ableism
bring community
accountability measures
bring understanding
cross-sector actions
look for quick wins
center bipoc
humility
anti-racism
understand
co-leadership
invite others
sharing power

Potential future agenda topics for PARCAG

TOPIC

- Vaccine planning
- Contact tracing
- Epidemiology, aerosol, COVID disease
- Antibody testing
- Schools/child care
- Disability access issues
- Work sessions to capture & document lessons learned from early phases of pandemic in order to improve/not repeat going forward
- Advocacy re: addressing racism in health care system
- Seroprevalence study design--lengthy survey, text heavy, lack of language access
- Update on "The Race Gap" in King County, Black health and well-being data from Marguerite Ro
