Investigations and assessments of suspected child maltreatment **45%** in King County (KC) declined **45%** during April, May and June

Emergency department (ED) visits related to suspected child maltreatment **decreased** in early months of the pandemic, as did all ED visits

Since May 2020, the rate of ED visits for child maltreatment have returned to 2019 rates

**Adult protective services (APS) investigations**

- The number of elder maltreatment investigations in KC remained consistent over the pandemic months
- Except in May and June 2020, when the number of KC APS investigations was significantly lower than in the same months of 2019
- May through July 2020, investigations were more likely to involve allegations of self-neglect and less likely to involve allegations of harm by someone else

**Vulnerable adult protection orders**

The number of vulnerable protection orders filed per month in KC was similar in 2020 compared to 2019

Only August was lower in 2020 compared to 2019

**Pandemic timeline**
