

## **COVID-19 Clinical Decision Guidance for Outpatient Settings**

These recommendations are developed to assist clinical decision for healthcare providers interacting with patients who have concerns about COVID-19 illness and should accompany good clinical judgment. Most people with COVID-19 have mild symptoms, and be aware that other respiratory infections (e.g., influenza, RSV, etc.) exhibit signs and symptoms similar to COVID-19. Guidelines are rapidly evolving and will be updated accordingly.

| SYMPTOMS? (New or worsening fever, cough, shortness of breath in the past 14 days) | A. Confirmed to have COVID-19 B. Close contact* (see below) C. Traveled to high risk areas D. People at higher risk*** | COUNSELING RECOMMENDATIONS (Isolation precautions, monitoring, self-care, etc.)  | SARS-CoV-2<br>(COVID-19)<br>TESTING**?                |
|--|--|--|---|
| Asymptomatic   | A, B, C, D   | <ul> <li>Avoid public places and stay home or at other designated space, away from other people, for 14 days</li> <li>Monitor symptoms during the 14 days after the last day of close contact with the sick person with COVID-19 or from the time of last exposure</li> <li>Wear a facemask when around other people</li> <li>Follow hygiene and sanitation guidance</li> <li>Contact health care provider if symptoms develop</li> </ul>                                | No  |
| Symptomatic<br>(Mild or<br>Moderate)<br><u>Not</u> Requiring<br>Hospitalization    | None   | <ul> <li>Avoid public places and stay home or at other designated space, away from other people, until 3 days after the fever ends and symptoms improve</li> <li>Wear a facemask when around other people</li> <li>Follow hygiene and sanitation guidance</li> <li>Contact health care provider if symptoms worsen</li> </ul>  | Clinical Judgment AND Consider                        |
|  | A, B, C, D   | <ul> <li>Avoid public places and stay home or at other designated space, away from other people, for 7 days OR until 3 days after the fever ends and symptoms improve, whichever is longer</li> <li>Wear a facemask when around other people</li> <li>Follow hygiene and sanitation guidance</li> <li>Contact health care provider if symptoms worsen</li> <li>People at higher risk *** should contact their healthcare provider early even for mild illness</li> </ul> | Public Health Priority Groups for COVID-19 Testing ** |
| Symptomatic<br>(Severe)  | None or Any  | <ul> <li>Seek emergency care immediately</li> <li>Notify the dispatch personnel that the patient has or may have COVID-19</li> </ul>   | Yes   |

## \*CLOSE CONTACT with person with \*\* PUBLIC HEALTH PRIORITY GROUPS FOR COVID-19 TESTING laboratory-confirmed COVID-19 includes: The following patients with COVID-19 symptoms should be tested for COVID-19: Living in the same household as a sick Healthcare workers person with COVID-19 Public safety workers (e.g., law enforcement, fire fighter, EMS) Patients who live or work in an institutional or congregate setting • Caring for a sick person with COVID-19 (e.g., corrections, long term care facility, homeless/shelters) Being within 6 feet of a sick person with • Patients working in critical infrastructure occupations (e.g., grocery stores, COVID-19 for about 10 minutes pharmacies, restaurants, gas stations, public utilities, etc.) Being in direct contact with secretions \*\*\*People at higher risk of developing severe illness from COVID-19: from a sick person with COVID-19 (Should contact their healthcare provider early if their symptoms worsen) (e.g., being coughed on, kissing, sharing Over 60 years of age utensils, etc.) With underlying medical conditions Who are pregnant
