

In this appendix, we compared selected health indicators among the 26 King County Cities or Areas as well as the neighborhood HRAs for the aggregated larger cities. For each indicator, rates highlighted in **GREEN** are significantly better than the county average while rates highlighted in **PINK** are significantly worse than the county average. The non-highlighted rates are not significantly different from the county average. For death and birth data, for the purpose of data reliability and confidentiality, a rate is suppressed and denoted as NA if the numerator is less than 5 but greater than 0.

Also note that the uninsured rates are based on the American Community Survey, for which the confidence intervals cannot be calculated accurately for some of the HRAs. As a result, colored significance comparisons are not made for the uninsured rates.

DATA SOURCES

General Health Status:

- Life expectancy at birth – WA State death certificate data, 2010-2014.
- General health status indicators (among adults age 18+) - the Behavioral Risk Factor Surveillance System (BRFSS), Washington State Department of Health, Center for Health Statistics; 2010-2014.

Maternal and Child Health: Birth Certificate and linked infant birth-death certificate data, Washington State Department of Health, 2010-2014.

Access:

- Uninsured rate among adults age 18-64 – American Community Survey, 5-year average, 2010-2014.
- No flu-shot within one year, No dental care within one year (among adults age 18+) - the Behavioral Risk Factor Surveillance System (BRFSS), WA State Department of Health, Center for Health Statistics; 2010-2014.

Leading Causes of Death and Injury Death: death certificate data, 2010-2014.

ABBREVIATIONS

Age-Adj Rate: age-adjusted rate.

Chr liver disease: chronic liver disease and cirrhosis.

CLRD: chronic lower respiratory disease.

MVA: motor vehical accident.
