

Action Steps to Prepare for Modern Learning Management System Launch Navigator Partner Organizations

Last week we sent out a bulletin advising navigators and certified application counselors that the new, Modern Learning Management System (LMS) is supported by one of the following five (5) internet browsers:

- Google Chrome (latest version)
- Edge (latest version)
- Mozilla Firefox (latest version)
- Apple Safari (latest released version)
- Internet Explorer 11

We are asking your organization to complete the two action steps outlined below:

ACTION STEPS:

1. Do you need to update the browser your navigators currently use to one that supports the new LMS platform?
2. Ask each of your navigators to delete the URL they were using to log into LMS. It looks like this: <https://wahbexchange.sharepoint.com/sites/LMS/SitePages/Home.aspx>. Each navigator will receive new log-in information.

We plan to launch the Modern LMS the first or second week of April and there will be training required in May. We want this experience to be as easy as possible for our navigators.
