Help Fight Harmful Changes to Immigration Policy:
Fill out this Form

The Trump Administration is seeking to change federal immigration rules in order to deny more immigrants their applications for legal residency. It would do this by expanding the list of benefits that immigration officials may consider in deciding whether an applicant is likely to become a “public charge,” someone who depends on public assistance. Applicants who are ruled likely to become a public charge are denied green cards.

The administration’s rule change is only a draft. It is not yet final. Therefore, families have no reason to stop receiving benefits at this time. You can help us fight this harmful proposal by sharing your story of how these benefits are vital to you, your family or your community.

If you or someone you know might be affected by this regulation, you can help us fight back.

Please fill out this short form. Your personal information will not be shared outside our campaign without your consent.

Why are these important for you or your family?

The Trump administration wants to make it harder for immigrant families and their U.S. citizen children to obtain and keep the public benefits listed above. How could this affect you?

Please give us a way to reach you. A team member of the Protecting Immigrant Families-Washington campaign will contact you. We will not share this personal information with third parties without your consent.
