<sup>1</sup> Permit types: Critical Areas, Land Use, Clear & Grade, Building, Fire, and Mechanical

## Inspection scheduling, continued

### Turnaround time

Our response time depends on several factors, such as the number of inspection requests we're processing, staff availability, your site's location, and the type of inspection. Foundation, mechanical/furnace permits, and missed previous-day appointments are our top priorities, so our inspectors cannot provide a guaranteed arrival time.

Please make sure your construction site is fully accessible throughout your scheduled inspection day.

If we can't do your inspection on the day you requested, we'll contact you via the information you provided on your proposal.

### IVR (interactive voice response) inspection scheduling codes

Building inspection codes		Site inspection codes	
Structure removed	222	Pre-construction conference	160
Pole hole and punch pad	292	Site preparation	215
Pad placement	142	Drainage BMP installation	150
Foundation footing	086	Permit extension inspection	165
Foundation walls	089	Wet season construction	375
Foundation	087	Final inspection-critical	350
Hold downs and skirting	277	Final site	355
Under floor inspection	300		
Exterior shear wall		Fire inspection codes	
Framing	090	Placement-tank	291
Mechanical/HVAC inspection	282	Device placement	259
Interior shear wall	281	Nozzle/head placement	283
Fire rated construction	082	Flow/trip test	273
Fire inspection	266	Device/panel test	261
Final inspection	075	Flush test	274
Temporary occupancy	299	Run test	191
Other	134	Pressure test	168
Pool structure	293	Insulation cover	280
Barrier fence	027	Rack/Pile inspection	298
Structural	220	Emergency shut-off	067
Structure removed	222	Final acceptance	077
Insulation/energy	060	Other	134
