SECTION IV Inventory of Facilities	Page 25
SECTION V Pupil Capacity	Page 29
SECTION VI Capital Construction Plan	Page 33
SECTION VII Impact Fees	Page 35

# **SECTION I – EXECUTIVE SUMMARY**

This six-year Capital Facilities Plan (the "Plan") has been prepared by the Auburn School District (the "District") as the District's principal planning document, in compliance with the requirements of Washington's Growth Management Act and the adopted ordinances of the counties and cities served by the District. This Plan was prepared using data available in the spring of 2022.

This Plan is consistent with prior long-term capital facilities plans adopted by the District. However, this Plan is not intended to be the sole plan for all of the District's needs. The District may prepare interim and periodic long-range Capital Facilities Plans consistent with Board Policies and actions, taking into account a longer or a shorter time period; other factors and trends in the use of facilities; and other needs of the District as may be required. However, any such plan or plans will be consistent with this six-year Capital Facilities Plan.

To enable the collection of impact fees in the unincorporated areas of King County and within the Cities of Auburn, Black Diamond and Kent; the King County Council, the City of Auburn, the City of Black Diamond, and the City of Kent will adopt this Plan by reference as part of each jurisdiction's respective comprehensive plan. To enable the collection of impact fees in the Cities of Algona and Pacific, these municipalities must also adopt this Plan and adopt school impact fee ordinances.

Pursuant to the requirements of the Growth Management Act and the local ordinances, this Plan will be updated on an annual basis, and any changes in the fee schedule(s) adjusted accordingly.

The Plan establishes the District's "standard of service" in order to ascertain the District's current and future capacity. While the State Superintendent of Public Instruction establishes square footage guidelines for capacity, those guidelines do not account for the local program needs of the District. The Growth Management Act and the school impact fee ordinance authorize the District to define its standard of service based on the District's specific needs. In general, the District's current standard provides that class size for grades K-3 should not exceed 17 students and class size for grades 4-5 should not exceed 27 students. When averaged over the six elementary school grades, this computes to 20.33 students per classroom. Class size for grade 6 should not exceed 27 students and class size for grades 7 and 8 should not exceed 28.53 students. When averaged over the three middle school grades, this computes to 28.02 students per classroom. Class size for 9-12 should not exceed 28.74 students, with some subject areas restricted to lesser numbers. Decisions by current legislative actions may create the need for additional classrooms. (See Section III for more specific information.)

The capacity of the schools in the District is calculated based on this standard of service and the existing inventory of facilities including transitional classrooms. The District's 2021-22 capacity was 17,082. The actual number of individual students was 16,880 as of October 1, 2021. (See Section V for more specific information.)

The Capital Construction Plan shown in Section VI addresses the additions and proposed modernization to the District's existing facilities. The plan includes the ongoing replacement of five elementary schools and one middle school, construction of two new elementary schools and one new middle school, and acquisition of future school sites to accommodate growth. The new facilities are required to meet the projected elementary school class size reductions mandated by the State of Washington and student population increases generated by the large development areas within the Auburn School District. Three areas that have significant impact on the school district are the Lakeland South, Lea Hill, and the north valley areas of the district. There are also other development pockets that impact the District.

In the spring of 2016, the Board determined to move forward with the replacement of six schools and the construction of two new elementary schools. The project was placed before the voters in November 2016 and the bond passed at 62.83%. The first of the projects, the replacement of Olympic Middle School, started construction in May 2018 and opened in Fall 2019. The district's new elementary, Bowman Creek Elementary, started construction in May 2019 and opened in August 2020. Construction for replacement of Dick

Scobee Elementary School started in June 2019 and the school opened in August 2020. Construction of Willow Crest Elementary School and construction of the replacement Pioneer Elementary School started May 2020 and both opened in August 2021. For the 2021-22 school year, Willow Crest Elementary served as the temporary home for Lea Hill Elementary School which started the replacement construction process in May 2021 and will open in August 2022. Construction for replacement of Chinook Elementary School started in May 2021 and will open in August 2022 as well. Construction for replacement of Terminal Park Elementary School will begin in May 2022 and is scheduled to open in August 2023.

The School Impact Fee Ordinances adopted by King County, the City of Auburn, City of Black Diamond and City of Kent provide for the assessment of impact fees to assist in meeting some of the fiscal impacts incurred by a district experiencing growth and development. Section VII sets forth the proposed school impact fees for single family and multi-family dwelling units. The student generation factors have been developed using the students who actually attend school in the Auburn School District from single family and multi-family developments constructed in the last five years. The method of collecting the data is with the use of GIS mapping software, data from King County and Pierce County GIS, data from Davis Demographics and integration of the mapping with student data from the District's student data system. This method gives the District actual student generation numbers for each grade span for identified developments. Listed below is a summary level outline of the changes from the 2021 Capital Facilities Plan that are a part of the 2022 Plan. The changes are noted by Section for ease of reference.

## SECTION I

## **Executive Summary**

- A. Updated to reflect new information within the Plan.
- B. Summary level list of changes from previous year.

## **SECTION II**

## **Enrollment Projections and Student Generation Factors**

A. Updated projections. See Section II & Appendices A.1.

## SECTION III

## Standard of Service

A. Updated to reflect the current number of classrooms allocated to non-standard classroom uses.

## **SECTION IV**

## **Inventory of Facilities**

- A. Add 2 portables at Auburn High School
- B. Add 2 portables at Auburn Mountainview High School
- C. Add 2 portables at Auburn Riverside High School
- D. Add 1 portable at Washington Elementary School
- E. Remove 7 portables from Terminal Park Elementary School

## Section V

## **Pupil Capacity**

A. The 7 portables to be relocated in July 2022 are needed to accommodate enrollment increases.

## Impact Fees CHANGES TO IMPACT FEE DATA ELEMENTS 2021 TO 2022

DATA ELEMENTS	CFP 2021	CFP 2022	EXPLANATION
Student Generation Factors Single Family Elementary Middle School High School Multi-Family Elementary Middle School High School	0.2500 0.1310 0.1520 0.4330 0.1850 0.1750	0.3010 0.1460 0.1550 0.3920 0.1350 0.1530	Consistent with King County Ordinance 11621, Student Generation Factors are calculated by the school district based on district records of average actual student generation rates for new developments constructed over the last five years.
School Construction Costs Middle School	\$112,000,000	\$134,320,000	From new school construction cost estimates in April 2022.
Site Acquisition Costs Cost per Acre	\$444,771	\$489,248	Updated estimate based on 10% annual inflation.
Area Cost Allowance Boeckh Index	\$238.22	\$246.83	Updated to current OSPI schedule. (May 2022)

<b>District Average AV</b> Single Family	\$402,640	\$458,409	Updated from March 2022 King County Dept. of Assessments data.
Multi-Family	\$197,141	\$223,737	Updated from March 2022 King County Dept. of Assessments data using average AV for apartments and condominiums.
Debt Serv Tax Rate	\$2.21	\$2.13	Current Fiscal Year
GO Bond Int Rate	2.44%	2.45%	Current Rate (Bond Buyers 20 Index 3-14)

# SECTION II – ENROLLMENT PROJECTIONS AND STUDENT GENERATION FACTORS

# Student Enrollment Projections

Projection techniques give consideration to historical and current data as a basis for forecasting the future. In addition, certain assumptions must be made about the variables in the data being used. Forecasting can be defined as the extrapolation or logical extension from history to the future or from the known to the unknown.

The projection logic does not attempt to weigh the individual sociological, psychological, economic, and political factors that are present in any demographic analysis and projection. An example of this is with the COVID-19 pandemic. The logic embraces the assumptions that whatever these individual factors have been in the past are present today and will be in the future. It further moderates the impact of singular factors by averaging data over time.

The basis of enrollment projections in the Auburn School District has been cohort survival analysis. Cohort survival is the analysis of a group of students in a grade level as it progresses through time. This analysis uses historical information to develop averages and project the averages forward. If all students in one grade level progress to the next, the cohort number would be 1.00. If fewer students from the group progress the number will be less than 1. The district has used this method with varying years of history (3 years, 6 years, 10 years and 13 years) as well as weighted factors to study several projections.

The degree to which the actuals deviate from the projections can only be measured after the fact. This deviation provides a point of departure to evaluate the effectiveness of the assumptions and logic being used to calculate future projections. Monitoring deviation is critical to the viability and creditably of the projections derived by these techniques.

# Overview of 2022-23 Enrollment Projections

Table 1 shows historical enrollment for the October 1 count in the Auburn School District over the past 20 years. The data shows overall average growth over the recent 10 years is 1.59%. It is important to note this average includes a 4.22% decrease in October 2020 enrollment due to the COVID pandemic.

While still in the pandemic, it was important to consider the impact the pandemic will have on future projections. Using the Cohort Survival method, the decrease in enrollment of 4.22% in October 2020 will skew enrollment projections for 2021 and beyond.

Some of the assumptions made in calculating projections for the 2022-23 school year are:

- 1. Kindergarten enrollment will continue to be at pre-pandemic levels.
  - a. ASD Kindergarten enrollment is almost 5% of births in King County. However, in 2017, King County live births were at the lowest number since 2005 at 25,487 which would project an October 2022 kindergarten class of approximately 1,215 students.
- 2. The number of students generated from housing growth in the district will slow.
  - a. Currently there are no large multi-family housing active within the district boundaries.
  - b. Although there is a long list of single-family developments, only
    22 are scheduled to be occupied in the near future.

Calculations were made to create cohort scenarios based upon the following survival ratios: 3-year average, 3-year weighted average, 6-year average, 6-year median, and the 10-year average. Two of the scenarios (3-year weighted average and 3-year average) were not considered because of the impact October 2020 had on the calculation. The decision was made to use the 6-year average scenario which is found in Table 2 below.

Although the Auburn School District tracks single- and multi-family housing developments, the District currently does not have estimated dates of completion and occupancy. Therefore, the projections shown below do not include the student generation numbers calculated in the next section.

# Student Generation Factors

Planned residential development data is collected to determine the number of new residential units that may be built in the near future. The projected units will have the appropriate Student Generation Factor applied to determine the number of new students that planned residential development might yield.

This data was obtained through discussions with the major developers within the District boundaries, the City of Algona, Auburn, Kent, Pacific, King County, and District officials. The student population by residence includes all approved and tentative tract maps in addition to any planned or proposed development that possibly will occur within the project timeframe. The planned residential development information and phasing estimates are a snapshot of the District as of this time. The information may change and is updated annually.

Closely related to the planned residential development units are Student Generation Factors. When applied to planned residential development units, the Student Generation Factors determine how many additional students will be generated from new construction within the District.

Two sets of data are used to calculate Student Generation Factors: current student enrollment and current housing data. This information associates each student with a housing unit. Two general housing categories are analyzed: Single Family and Multi-Family. Data showing the number of students generated from previous single- and multi-family developments generates the Student Generation Factor to be applied to future developments.

The tables on the next two pages show the information for both single-and multi-family developments. The components include:

- "Development Name" is a list of developments in various stages of occupancy.
- "Year of Full Occupancy" is important because fully-occupied developments stay on the list for five years contributing to the Student Generation Factor. Once the five years is up, the development is removed from the list.
- Also included for each development listed is the number of units, the amount of current units occupancy and the remaining units to be occupied.
- "Feeder Pattern" shows the elementary school associated with each development.
- "Actual Students" is the data of actual students generated from the units already occupied.
- "Student Generation Factors" is the calculation of actual students divided by the number of occupied units.
- "Single Family--2022 and beyond" lists the developments that are in process, but have not yet started to occupy units.

• The units for these developments are multiplied by the Student Generation Factor for each to determine the "Estimated Students Based on Student Generation Factors"

The table at the bottom of the page shows an estimated timeline of when the unoccupied units are scheduled to be occupied.

Table 3 shows the single- and multiple-family units to be occupied, the estimated number of students generated and a timeline by year of when those students would potentially be enrolled. The bottom table reflects a cumulative number over a period of 7 school years.

# **SECTION III - STANDARD OF SERVICE**

The School Impact Fee Ordinances adopted by King County, the City of Auburn, City of Black Diamond and the City of Kent indicate that each school district must establish a "Standard of Service" in order to ascertain the overall capacity to house its projected student population. The Superintendent of Public Instruction establishes square footage "capacity" guidelines for computing state funding support. The fundamental purpose of the OSPI guidelines is to provide a vehicle to equitably distribute state matching funds for school construction projects. By default these guidelines have been used to benchmark the district's capacity to house its student population. The OSPI guidelines do not make adequate provision for local district program needs, facility configurations, emerging educational reform, or the dynamics of each student's educational program. The Auburn School District Standard of Service addresses those local considerations that require space in excess of the OSPI guidelines. The effect on the space requirements for both permanent and relocatable facilities is shown below for each grade articulation pattern. Conditions that may result in potential space needs are provided for information purposes without accompanying computations.

## OVERVIEW

As reflected in enrollment numbers for the 2021-22 school year, the Auburn School District operates 15 elementary schools housing 7,431 students in grades K through 5. The four middle schools house 3,849 students in grades 6 through 8. The District operates three comprehensive senior high schools and one alternate high school, housing 5,595 students in grades 9 through 12. (Source: October 1, 2021 Enrollment)

# CLASS SIZE

The number of pupils per classroom determines the number of classrooms required to house the student population. Specialists create additional space

needs. Class sizes are subject to collective bargaining agreements. Changes to class size agreements can have significant impact on available space.

The current pupil/teacher limit across all elementary programs is an average of 20.33 students per teacher. Consistent with this staffing limit, room capacities are set at 20.33 students per room at grades K - 5. At grades 6 - 8 the limit is set at 28.02 students per room. At grades 9 - 12 the limit is set at 28.74 students per room. The OSPI space allocation for each grade articulation level, **less** the computed reduction for the Auburn School District Standard of Service, determines the District's capacity to house projected pupil populations. These reductions are shown in the following documents by grade articulation level.

# **SECTION IV - INVENTORY OF FACILITIES**

Table IV.1 shows the current inventory of permanent district facilities and their OSPI rated capacities.

Table IV.2 shows the number and location of each portable by school. The district uses relocatable facilities to:

- 1. provide interim housing in school attendance areas uniquely impacted by increasing school populations that would otherwise require continual redistricting,
- 2. make space available for changing program requirements and offerings determined by unique students needs, and
- 3. provide housing to cover district needs until permanent facilities can be financed and constructed.

Relocatable facilities are deemed to be interim, stop gap measures that often place undesirable stress on existing physical plants. Core facilities (i.e. gymnasiums, restrooms, kitchens, labs, lockers, libraries, etc.) are not of sufficient size or quantity to handle the increased school population served by adding relocatable classrooms.

# **SECTION V - PUPIL CAPACITY**

While the Auburn School District uses the OSPI inventory of permanent facilities as the data from which to determine space needs, the District's educational program requires more space than that provided for under the formula. This additional square footage is converted to numbers of pupils in Section III, Standard of Service. The District's capacity is adjusted to reflect the need for additional space to house its programs. Changes in the capacity of the district recognize new funded facilities. The combined effect of these adjustments is shown on Line B in Tables V.1 and V.2. Table V.1 shows the District's capacity with relocatable units included and Table V.2 without these units.

 $\underline{1\prime}$  New facilities shown in 2019-20 through 2023-24 are funded by the 2016 School Bond Issue.

2/ The Standard of Service represents 27.26% of OSPI capacity. When new facilities are added the Standard of Service computations are decreased to 25.42% of SPI capacity.

3/ Students beyond the capacity are accommodated in other spaces (commons, library, theater, shared teaching space).

# **SECTION VI - CAPITAL CONSTRUCTION PLAN**

The formal process used by the Auburn School Board to address current and future facility needs began almost 50 years ago in 1974. The process includes a formation of a community-wide citizen's committee and throughout the years, these Ad Hoc Committees have conducted work and made recommendations for improvements to the District's programs and facilities.

In October of 2008, after two years of review and study, a Steering Committee made recommendations to the Board regarding the capital improvements program to modernize or replace facilities as recommended by the 2004-05 Citizen's Ad Hoc Committee. These recommendations, based on specific criteria, led to the Board placing a school improvement bond and capital improvements levy on the ballot in March 2009. Voters did not approve either measure that would have updated 24 facilities and replaced three aging schools. The Board decided to place only a six-year Capital Levy on the ballot in November of 2009, which passed at 55.17%. The levy funded \$46.4 million of needed improvement projects at 24 sites over the following seven school years. Planning for the replacement of aging schools was started with educational specifications and schematic design process for the replacement of Auburn High School.

The District acquired a site for a future high school in 2008 and a second site for a future middle school in 2009. The District also continued efforts to acquire property around Auburn High School. The Special Education Transitional Assistance Program (TAP) opened in February of 2010. This facility is designed for students with disabilities that are 18 to 21 years old.

In the November 2012 election, the community supported the \$110 million bond issue for the Auburn High School Modernization and Reconstruction Project at 62%. Construction began in February 2013. The entire new building was occupied by Auburn High School students and staff in the fall of 2015, with site improvements being completed during the 2015-16 school year. In January 2015, a citizen's ad hoc committee was convened by direction of the Board to address growth and facilities. The major recommendations were to construct two new elementary schools in the next four years and to acquire 3 new elementary school sites as soon as possible. In the November 2016 election, the community supported the \$456 million bond issue for the replacement of six schools and the construction of two new elementary schools at 62.83%. Construction for the replacement of Olympic Middle School began in May 2018 and was completed in Fall 2019. Construction for Bowman Creek Elementary School began in May 2019 and was completed in Fall 2020. Construction for the replacement of Dick Scobee Elementary School began in June 2019 and was completed in Fall 2020. Construction for Willow Crest Elementary School and replacement of Pioneer Elementary School began in May 2020 and was completed in Fall 2021. Construction for replacement of Chinook and Lea HIII Elementary Schools began in June 2021 and will be completed in Fall of 2022. Construction for replacement of Terminal Park Elementary School will begin in June 2022 and will be completed in Fall of 2023.

We anticipate running a Capital Bond Measure in 2026. Funds will be used to construct a new middle school on property currently owned by the District, and may include funds to replace one or more existing schools.

The table below illustrates the current capital construction plan for the next six years. The exact timelines are wholly dependent on the rate of growth in the school age population.

2022-28 Capital Co (May 2022)	onstruction	Plan								
		Projected	Fund	Fund Project Timelines						
Project	Funded	Cost	Source	21-22	22-23	23-24	24-25	25-26	26-27	27-28
			2020

Replacement of five Elementary Schools	Yes	\$242,500,000	Bond	XX const	XX const	XX open				

1/ These funds may be secured through a combination of the 2016 Bond Issue, sale of real property, impact fees, and state matching funds.

2/ These funds may be secured through a combination of a bond issue, impact fees, and state matching funds.

# **SECTION VII - IMPACT FEES**

IMPACT FEE COMPUTATION (SPRING 2022)

TABLES I - IV

TABLES V - VI

**IMPACT FEE ELEMENTS** 

#### IMPACT FEE COMPUTATION (Spring 2022)

#### I. SITE COST PER RESIDENCE

Formula: ((Acres x Cost per Acre)/Facility Size) x Student Factor

	Site	Cost/	Facility	Student Generation Factor		Cost/	Cost/
	Acreage	Acre	Capacity	Single Family	Multi Family	Single Family	Multi Family
Elem Sch (K - 5)	15	\$489,248	650	0.3010	0.3920	\$3,398.39	\$4,425.81
Middle Sch (6 - 8)	25	\$0	800	0.1460	0.1350	\$0.00	\$0.00
Sr High (9 - 12)	40	\$0	1500	0.1550	0.1530	\$0.00	\$0.00
				-		\$3,398.39	\$4,425.81

#### II. PERMANENT FACILITY CONSTRUCTION COST PER RESIDENCE

Formula: ((Facility Cost/Facility Size) x Student Factor) x (Permanent to Total Square Footage Percentage)

	<u>j oooar aonitj oiz</u>			0141 0944101 0014	ge i elecinage)		
	Facility	Facility	% Perm Sq Ft/	Student Generation Factor		Cost/	Cost/
Single Family	Cost	Size	Total Sq Ft	Single Family	Multi Family	Single Family	Multi Family
Elem (K - 5)	\$0	650	0.9485	0.3010	0.3920	\$0.00	\$0.00
Mid Sch (6 - 8)	\$134,320,000	800	0.9485	0.1460	0.1350	\$23,251.96	\$21,500.10
Sr High (9 - 12)	\$0	1500	0.9485	0.1550	0.1530	\$0.00	\$0.00
						\$23,251.96	\$21,500.10

#### III. TEMPORARY FACILITY CONSTRUCTION COST PER RESIDENCE

Formula: ((Facility Cost/Facility Size) x Student Factor) x (Temporary to Total Square Footage Ratio)

ronnula. ((racinty costr acinty cize) x orderit racio) x (remporary to rotal oquare rootage ratio)									
	Facility	Facility	% Temp Sq Ft/	Student Generation Factor		Cost/	Cost/		
Single Family	Cost	Size	Total Sq Ft	Single Family	Multi Family	Single Family	Multi Family		
Elem (K - 5)	\$250,000	20.33	0.0515	0.3010	0.3920	\$190.47	\$248.06		
Mid Sch (6 - 8)	\$250,000	28.02	0.0515	0.1460	0.1350	\$67.03	\$61.98		
Sr High (9 - 12)	\$250,000	28.74	0.0515	0.1550	0.1530	\$69.38	\$68.49		
						\$326.88	\$378.53		

#### IV. STATE MATCH CREDIT PER RESIDENCE

Formula: (Boeckh Index x SPI Footage x District Match x Student Factor)

		tage x District Mater		/			
	Boeckh	SPI	State	Student Generation Factor		Cost/	Cost/
	Index	Footage	Match	Single Family	Multi Family	Single Family	Multi Family
Elem (K - 5)	\$0.00	90	63.83%	0.3010	0.3920	\$0.00	\$0.00
Mid Sch (6 - 8)	\$246.83	108	63.83%	0.1460	0.1350	\$2,484.27	\$2,297.10
Sr High (9 - 12)	\$0.00	130	63.83%	0.1550	0.1530	\$0.00	\$0.00
						\$2,484.27	\$2,297.11

#### IMPACT FEE COMPUTATION (Spring 2022)

#### V. TAX CREDIT PER RESIDENCE

Formula: Expressed as the present value of an annuity TC = PV(interest rate,discount period,average assd value x tax rate)

Γ	Ave Resid	Curr Dbt Serv	Bnd Byr Indx	Number of	Tax Credit	Tax Credit
	Assd Value	Tax Rate	Ann Int Rate	Years	Single Family	Multi Family
Single Family	\$458,409	\$2.13	2.45%	10	\$8,567.73	
Multi Family	\$223,737	\$2.13	2.45%	10		\$4,181.68

#### VI. DEVELOPER PROVIDED FACILITY CREDIT

Formula: (Value of Site or Facility/Number of dwelling units)

	Value	No. of Units	Facility Credit
Single Family	\$0.00	1	\$0.00
Multi Family	\$0.00	1	\$0.00

FEE	PER UNIT IMPACT FEES
