Lloyd Hara
Assessor

Dear Property Owners:

Property assessments for the 2013 assessment year are being completed by my staff throughout the year and change of value notices are being mailed as neighborhoods are completed. We value property at fee simple, reflecting property at its highest and best use and following the requirement of RCW 84.40.030 to appraise property at true and fair value.

We have worked hard to implement your suggestions to place more information in an e-Environment to meet your needs for timely and accurate information. The following report summarizes the results of the 2013 assessment for this area. (See map within report). It is meant to provide you with helpful background information about the process used and basis for property assessments in your area.

Fair and uniform assessments set the foundation for effective government and I am pleased that we are able to make continuous and ongoing improvements to serve you. Assessment Standards information is available on the Assessor's website at:

<http://www.kingcounty.gov/Assessor/Reports/AreaReports/~media/Assessor/AreaReports/AppraisalStandard.aspx>

Please feel welcome to call my staff if you have questions about the property assessment process and how it relates to your property.

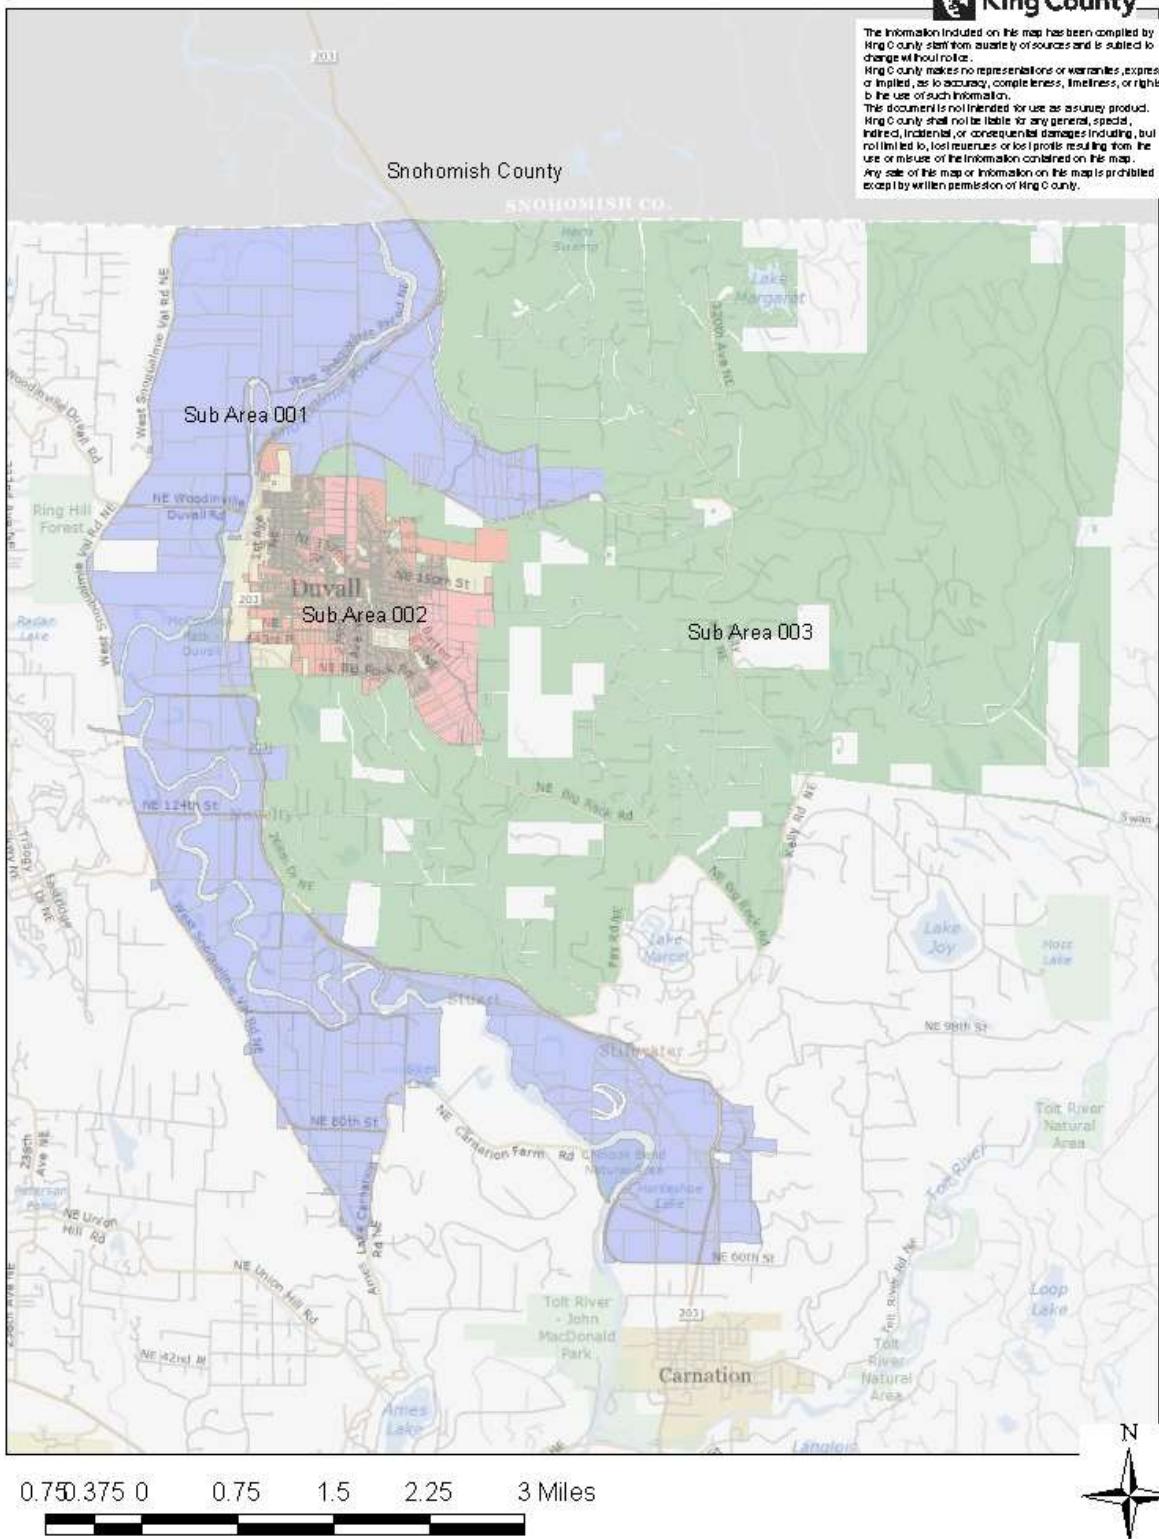

Sincerely,

Lloyd Hara
Assessor

Coefficient of Dispersion (COD) is a measure of the uniformity of the predicted assessed values for properties within this geographic area. The lower the COD, the more uniform are the predicted assessed values. Assessment standards prescribed by the International Association of Assessing Officers identify that the COD in rural or diverse neighborhoods should be no more than 20%.

In the face of smaller overall sales volume, an unstable real property market and an increasing number of financial institution re-sales, the resulting COD meets or exceeds the industry assessment standards.

Summary of Findings: The analysis for this area consisted of a general review of applicable characteristics such as grade, age, condition, stories, living area, views, waterfront, lot size, land problems and neighborhoods. The analysis results showed that two plat based adjustments and an adjustment for grades greater than 8 needed to be included with the standard area adjustment to improve uniformity of assessments throughout the area. For instance, improvements with grade classifications greater than 8 had a lower ratio (Assessed Value to Sales) than the rest of the population requiring an upward adjustment. The plats of Kaelin's Gate (Plat 378276) and Willow Ridge (Plat 942940) had ratios higher than the rest of the population, requiring downward adjustments.

Sales of new homes built over the last few years are over represented in this sample. This is a common occurrence due to the fact that most new homes will sell shortly after completion. This over representation was found to lack statistical significance during the modeling process.

Sales Screening for Improved Parcel Analysis

In order to ensure that the Assessor's analysis of sales of improved properties best reflects the market value of the majority of the properties within an area, non-typical properties must be removed so a representative sales sample can be analyzed to determine the new valuation level. The following list illustrates examples of non-typical properties which are removed prior to the beginning of the analysis.

1. Vacant parcels
2. Mobile Home parcels
3. Multi-Parcel or Multi Building parcels
4. New construction where less than a 100% complete house was assessed for 2012
5. Existing residences where the data for 2012 is significantly different than the data for 2013 due to remodeling
6. Parcels with improvement values, but no characteristics
7. Parcels with either land or improvement values of \$25,000 or less posted for the 2012 Assessment Roll
8. Short sales, financial institution re-sales and foreclosure sales verified or appearing to be not at market
9. Others as identified in the sales removed list

(See the attached *Improved Sales Used in this Annual Update Analysis* and *Improved Sales Removed from this Annual Update Analysis* for more detailed information)

Land Update

Based on the 28 usable land sales available in the area, and their 2012 Assessment Year assessed values, and supplemented by the value increase in sales of improved parcels, an overall market adjustment was derived. This resulted in an overall +11.1% increase in land assessments in the area for the 2013 Assessment Year.

The formula is:

2013 Land Value = 2012 Land Value x 1.1157, with the result truncated to the next \$1,000.

Improved Parcel Update

The analysis for this area consisted of a general review of applicable characteristics such as grade, age, condition, stories, living area, views, waterfront, lot size, land problems and neighborhoods. The analysis results showed that two plat based adjustments and an adjustment for grades greater than 8 needed to be included with the standard area adjustment to improve uniformity of assessments throughout the area. For instance, improvements with grade classifications greater than 8 had a lower ratio (Assessed Value to Sales) than the rest of the population requiring an upward adjustment. The plats of Kaelin's Gate (Plat 378276) and Willow Ridge (Plat 942940) had ratios higher than the rest of the population, requiring downward adjustments.

With the exception of real property mobile home parcels & parcels with "accessory only" improvements, the new recommended values on all improved parcels were based on the analysis of the 412 useable residential sales in the area.

Sales used in the valuation model were time adjusted to January 1, 2013. The chosen adjustment model was developed using multiple regression. An explanatory adjustment table is included in this report.

Mobile Home Update

Mobile Homes received the Total % Change indicated by the sales sample. Sales of Mobile Homes in Area 70 support applying the Total % Change indicated by the sales sample.

Results

The resulting assessment level is 91.5%. The standard statistical measures of valuation performance are all within the IAAO recommended range of .90 to 1.10.

Application of these recommended values for the 2013 assessment year (taxes payable in 2014) results in an average total change from the 2012 assessments of +12.7%. This increase is due partly to market changes over time and the previous assessment levels.

Note: Additional information may reside in the Assessor's Real Property Database, Assessor's procedures, Assessor's "field" maps, Revalue Plan, separate studies, and statutes.

Comments:

The percentages listed are total adjustments, not additive adjustments.

For instance, a parcel in the Kaelin's Gate (Plat 378276) neighborhood would *approximately* receive a +.07% adjustment. The Kaelin's Gate neighborhood is under construction, it is anticipated that upon completion of construction, there will be 34 improved parcels. Currently, 33 parcels in the improved population would receive this adjustment. There were 24 sales used in the neighborhood analysis.

A parcel in the Willow Ridge (Plat 942940) neighborhood would *approximately* receive a -5.89% downward adjustment. The Willow Ridge neighborhood is under construction, it is anticipated that upon completion of construction, there will be 22 improved parcels. Currently, 15 parcels in the improved population would receive this adjustment. There were 9 sales used in the neighborhood analysis.

Improved parcels with high building grades above grade 8 would *approximately* receive a +18.16% upward adjustment. There are 501 improved parcels that would receive the high building grade adjustment. 55 high building grade sales were used in the analysis.

Generally, improved parcels located in the Willow Ridge (Plat 942940) and Kaelin's Gate (Plat 378276) neighborhoods were at a higher assessment level than the rest of the population and high building grade improvements were at a lower assessment level than the rest of the population. This model corrects for these strata differences.

There were no properties that would receive a multiple variable adjustment.

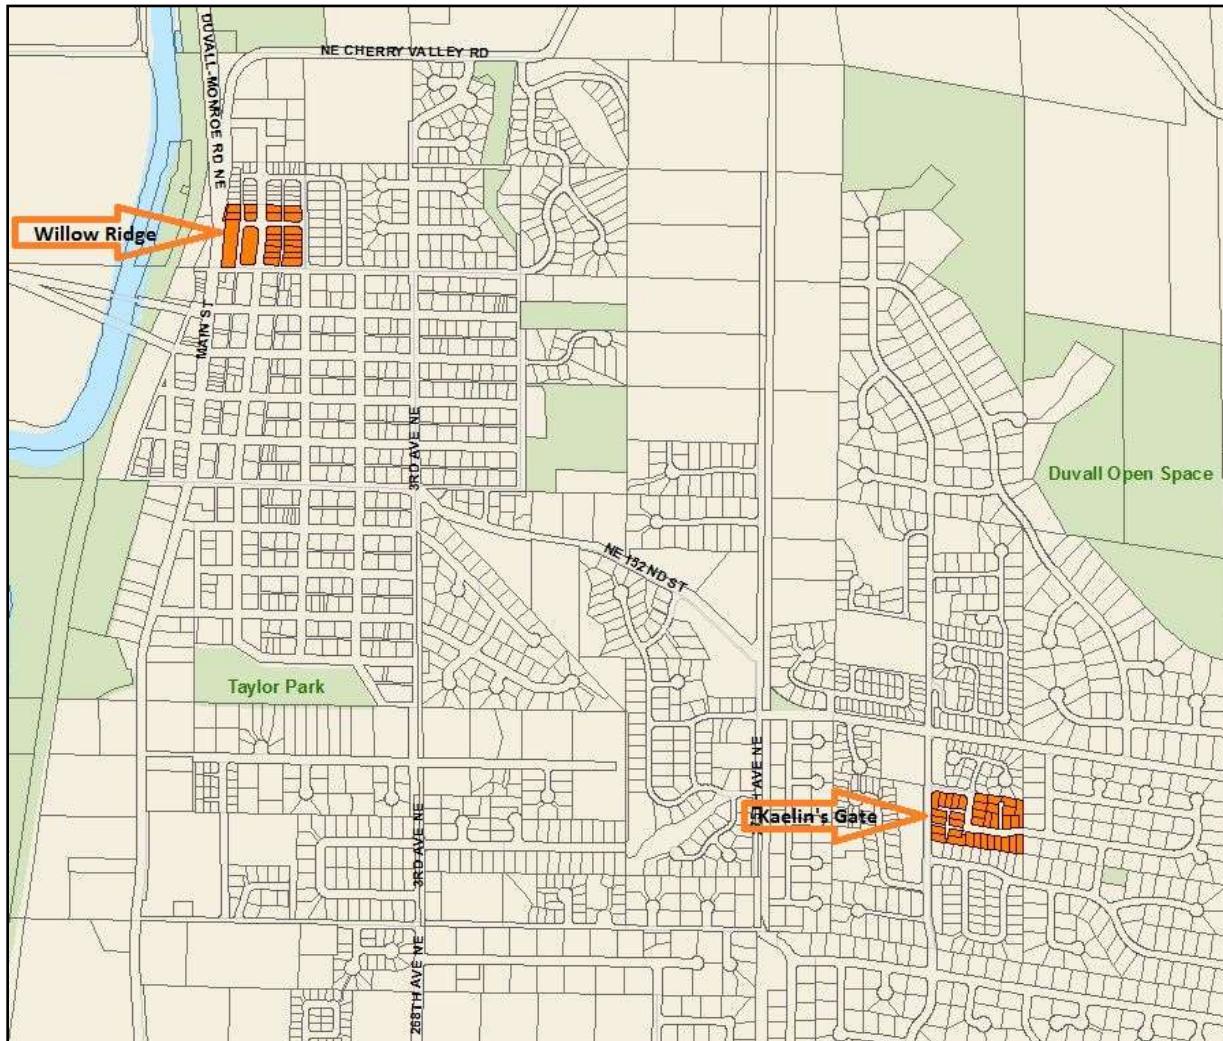

83.7% of the population of 1 to 3 Unit Residences in the area were adjusted by the Standard Area Adjustment alone.

Area 70 Market Value Changes Over Time

In a changing market, recognition of a sales trend to adjust a population of sold properties to a common date is required to allow for value differences over time between a range of sales dates and the assessment date. The following chart shows the % time adjustment required for sales to reflect the indicated market value as of the assessment date, **January 1, 2013**.

For example, a sale of \$395,000 which occurred on August 1, 2011 would be adjusted by the time trend factor of 1.053, resulting in an adjusted value of \$416,000 (\$395,000 X 1.053=\$416,000) – rounded to the nearest \$1000.
