Area Information

Area 019 – West Ballard

Area 19 is located in the northwestern portion of Seattle. It contains the communities of West Ballard, Loyal Heights, and Crown Hill. This homogenous area contains predominantly grade 7 homes and 38% of them were built before 1930. Approximately 17% of the homes were built from 1940 to 1949. Over 99.4% of the parcels have homes on them. The typical lot is level or moderately sloped with a lot size of 4,040 square feet.

Area 19 is comprised of two sub areas. The northern portion is sub area 10. This area contains the Crown Hill and Loyal Heights neighborhoods. Approximately 45% of the homes were built before 1930. Slightly over 24% were built between 1940 and 1949. The average total living of homes in sub area 10 is 1,470 square feet. Sub area 1 is located south of sub area 10. It contains higher density zoning including townhome development. Approximately 59% of the improvements are townhomes in sub area 1. The western portion of sub area 1 is zoned for single family residences. In the early 1900's this area was developed before sub area 10. It is located closer to commercial businesses in the downtown part of Ballard. Extensive townhome development in this area started in the late 1990's and continues today. Since 2015 there have been 679 townhomes constructed.

Glossary for Improved Sales

Condition: Relative to Age and Grade

- 1= Poor Many repairs needed. Showing serious deterioration.
- 2= Fair Some repairs needed immediately. Much deferred maintenance.
- 3= Average Depending upon age of improvement; normal amount of upkeep for the age of the home.
- 4= Good Condition above the norm for the age of the home. Indicates extra attention and care has been taken to maintain.
- 5= Very Good Excellent maintenance and updating on home. Not a total renovation.

Residential Building Grades

- Grades 1 - 3 Falls short of minimum building standards. Normally cabin or inferior structure.
- Grade 4 Generally older low quality construction. Does not meet code.
- Grade 5 Lower construction costs and workmanship. Small, simple design.
- Grade 6 Lowest grade currently meeting building codes. Low quality materials, simple designs.
- Grade 7 Average grade of construction and design. Commonly seen in plats and older subdivisions.
- Grade 8 Just above average in construction and design. Usually better materials in both the exterior and interior finishes.
- Grade 9 Better architectural design, with extra exterior and interior design and quality.
- Grade 10 Homes of this quality generally have high quality features. Finish work is better, and more design quality is seen in the floor plans and larger square footage.
- Grade 11 Custom design and higher quality finish work, with added amenities of solid woods, bathroom fixtures and more luxurious options.
- Grade 12 Custom design and excellent builders. All materials are of the highest quality and all conveniences are present.
- Grade 13 Generally custom designed and built. Approaching the Mansion level. Large amount of highest quality cabinet work, wood trim and marble; large entries.
