- 12:00** SAC Photo and Social

“If you can't fly then run,
if you can't run then walk,
if you can't walk then crawl,
but whatever you do
you have to keep
moving forward.”

-Martin Luther King, Jr.

Zlata Kauzlaric

Recap of October 2017 SAC Meeting

Strategic Technology Plans

Technology Governance

Support business needs through value added IT. Collaborate with leaders and external partners who can provide guidance.

Value of SAC

SAC actions enable King County to move forward with strategic initiatives toward modernization.

Technology Strategy Update

We are making strong and steady progress on our strategic roadmaps for 2014 – 2019.

Voice of The Customer

King County is transforming how we do business with our Customers, through collaboration and engagement.

Digital Transformation

Maturing methodology and process through a standard delivery framework.

Meeting Discussion

1 Civic Engagement

2 Business Continuity

3 Cyber Security

4 Data Strategies

5 Interim Agency
Discussions

6 Meeting Topics for
Discussion

7 Combined
Experience

Tanya Hannah

Roadmap to Engagement

Food Safety Ratings

KCIT helped pioneer a streamlined food inspection process and rating system so customers can make informed choices when they dine out. Integrating the food safety ratings with Yelp, so diners can access location-specific results when they search for restaurants.

E-911

E-911 offers technology-based, advanced life and safety systems to ensure every 911 call in King County is answered and routed quickly and correctly — no matter where or when the calls are placed, on what systems the calls are made or the caller’s physical ability.

ePayments

By eliminating the hassle of traveling to a county building to conduct business in person, the system creates a new option beyond cash or checks. The ePayments platform will help standardize electronic payments for all King County residents.

Digital Equity

KCIT is working to bring free and low-cost internet and broadband access to Communities of Opportunity, enabling members of the community to more easily connect with county services — and one another.

Health Data Hub

KCIT is leading the creation of one source of information for the hundreds of thousands of people who visit King County public health centers each year. The Integrated Health Data Hub provides a better experience for patients and agencies — and reduces the amount of time providers spend on redundant data entry.

Award Winning IT

National Association of County Governments (NACo) recognized King County as the top IT county in the United States.

PSERN

Puget Sound Emergency Radio Network (PSERN) is will replace communications towers, technology and emergency radios throughout King County. When the voter- approved system is complete, every city, community and agency will have access to one of the most technologically advanced and responsive systems in the country.

World Class Digital Workplaces

KCIT installed more than 45 new smart conference rooms, where teams can collaborate virtually and in-person via video, voice activation and integrated whiteboards. We added high-speed wireless in King County facilities to help employees be more productive and opened a new training lab, staffed with full-time trainers, to deliver 2,500 hours of training on SharePoint, Dynamics, Power BI and other digital solutions.

YEAR IN REVIEW

2017

Create opportunities
and deliver outcomes

Partnerships
breed results

DISCUSSION

What approaches have you seen to foster collaboration between IT, agencies and the community?

How have you seen technology used to provide seamless service around community needs?

What drives successful public and private sector collaboration?

Mobility

King County's Technology Priorities for 2018

Mobility

Effective Digital Systems

Data Focused

Workforce Empowerment

Civic Engagement

Our Focus for 2018

Strategic Outcomes

Mobility

Civic Engagement

- ✓ Engage and empower members of the community to interact and transact business whenever, wherever and however they wish.
- ✓ Cultivate an ongoing relationship with members of the community, listening and understanding their needs, and ensuring we align our services and resources with those needs.

DISCUSSION

How can we use technology to further drive two-way engagement with the community?

What are the emerging technologies that will further drive our civic engagement strategy?

How do you foresee AI enhancing customer service?

How do we work with you to bring innovative technology to our communities?

Tech Powered Civic Engagement¹

Looking Beyond 2018

Build With, Not For

Putting members of the community first.

Partnership Breeds Results

Bringing together government, private & non-profit sectors.

Civic Technology is a Spectrum

Technology supports a range of goals and community needs.

The Multiplier Effect

Reach and impacts beyond the original goal.

Changing Communities For the Better

Improving peoples' daily lives.

¹ Next Century Cities. "Five Lessons for Tech-Powered Civic Engagement: The Charles Benton Next Generation Engagement Award Playbook." Evanston, IL: Benton Foundation, September 2017.

CHANGING COMMUNITIES FOR THE BETTER

FINAL DISCUSSION

How can we leverage technology to assist under-served communities?

How can we leverage libraries to improve our communities?

What are your customers asking for?

What can we learn from customer-centric organizations?

A person is shown from the chest up, holding a smartphone in their right hand. They are wearing a dark shirt. In the background, a laptop is open on a desk. The entire image is overlaid with a semi-transparent blue gradient. On the right side, there is white text in a bold, sans-serif font.

**Engage and
empower members
of the community
to interact with
King County how,
when and where
they want.**

THANK YOU FOR COMING

SAC GROUP PHOTO AND SOCIAL HOUR TO FOLLOW

#KCSAC2018

Mobility

Engage and empower members of the community to interact and transact business whenever, wherever and however they wish.

Effective Digital Systems

Build, support and share high quality, reliable, consistent systems.

Data Focused

Analyze, measure and use data to make better decisions and improve services.

Workforce Empowerment

Employees effectively using
technology platforms and tools to
drive business process
improvements.

Civic Engagement

Cultivate an ongoing relationship with members of the community, listening and understanding their needs, and ensuring we align our services and resources with those needs.
