FLY QUIET FLIGHT PROCEDURES

- Maintain FAA-advised altitude (2,000 AGL) over noise-sensitive residential neighborhoods. (Reference VFR procedures for noise-sensitive areas in FAA A/C 91-36D.)
- Use alternative approach over Elliott Bay, when feasible.
- For safety and noise purposes, East/West nighttime flights over West Seattle are discouraged.
- Use FAA-advised close-in flight procedure for north flow flights. (Reference standard close-in flight procedure by aircraft type in FAA A/C 91-53A.)
- Honor voluntary curfew of nighttime engine maintenance run-ups.
