Meeting Summary

- Actions: Approvals of Agenda and September 2021 Meeting Minutes
- Old Business: Commission, County, and Agriculture Organization Updates
- New Business: Preparation for Commission Officer Elections and Selection Committee
- Presentations: Compost Pilot & Food Waste to Feed Update and Strategies; New KCD Director

Meeting called to order by acting Chair Darron Marzolf at 6:02 pm

Roll Call/Announcement of Staff & Public (Darron Marzolf)

Roll call of Commissioners and announcement of staff and public guests was done via the Zoom chat function.

ACTION: Approval of Meeting Agenda (Darron Marzolf)

Shelly Pasco motioned to accept tonight's agenda as written. Janet Keller seconded the motion, which carried with unanimous approval.

ACTION: Approval of September 2021 Meeting Minutes (Darron Marzolf)

Shelly Pasco motioned to accept the prior meeting's minutes as written. Henry Wong seconded the motion, which carried with unanimous approval.

Compost Pilot & Food Waste to Feed – Update and Strategies (Emily Coleman, Rick Reinlasoder)

Emily Coleman of DNRP's Solid Waste Division (SWD) spoke to the Commission on the response to a meeting she and colleague Andy Smith held with the Commission's committee addressing the topic of food waste and animal feed. This also included a pilot project to demonstrate the benefits of compost use to farmers.

Farm Compost Pilot: About a year ago, SWD began partnering with WLRD to reach out to small farmers from diverse backgrounds to demonstrate compost benefits to encourage its use in farming. This focus is part of the County's Equity and Social Justice (ESJ) commitment; the program worked with the Black Farmers Collective in 2020 and other farms this year. A survey was conducted at the start of the season, and end-of-season survey results are now being compiled. The County wants to work with farmers to mitigate any concerns and barriers about compost use. They are interested in the Commission's input on this work, and are willing to share the final report when available.

Food Waste to Livestock Feed: The County is engaging on this at the state level with Department of Ecology (DOE), through the Use Food Well Washington Plan and the Washington Organics Stakeholder Workgroup. DOE's stance is that more foundational research is needed to find opportunities for this at the state level. Once opportunities are located, the hope is to develop more state programs around livestock feed and work with the County. Feeding people is their primary focus. It was noted Washington state law may allow opportunities for livestock feed in the future.

The Pacific Coast Collaborative's Food Waste Reduction Workgroup is also working on this issue. They offer networking opportunities with food waste generators. Their current focus is large-scale pilot programs with major regional grocers. This helps create a network with grocers to leverage for future education opportunities for food waste generators, including how farmers can donate livestock feed.

SWD also has the Re+ Plan, which is to be launched in the next few months to reach a target of "zero waste to resources" by 2030. The focus is organics/food waste diversion. They will provide commercial and technical assistance on how to divert food waste from landfills, how farmers can donate livestock feed, and educating food waste generators. The next step would be a large grant program offered to those willing to donate food waste to feed, starting spring of next year. De-packaging of food waste is also a concern, and SWD is in the process of optimizing their transfer stations to investigate de-packaging equipment.

Patrice Barrentine recalled that the Commission brought this issue to DNRP Director Christie True's attention when they noticed nothing in the County's Strategic Climate Action Plan (SCAP) addressed food waste to feed, and True asked SWD to work on it. Major obstacles in progress include policy, farmer education, and regulation on doing the "right thing" with waste and animals. It is proposed that, with input of a Commission committee, workshops be held next year for farmers on how to make food waste into feed for their farms. Information would cover determining whether the concept is a good fit, the pros and cons, regulations, product sources, scale, and the right connection-to-customer base. Another idea is a certificate of completion, to indicate when generators have participated in the training.

A key outcome of this work is to connect farmers with food waste opportunities through SWD and WLRD. A survey is planned for producers, to gain information on what kinds and what volume of food waste are needed for feed demands. The County is trying to build a supply chain of food waste to feed by working on the policy and education side for generators and livestock producers. County Livestock Program Specialist Rick Reinlasoder noted this process wouldn't work for every livestock operator; there are specific species and types of receptacles needed, and other details to work through on the generator as well as the user side. Patrice Barrentine asked if the Commission needs more information to move forward on this issue.

Follow-Up Discussion Points:

- SWD needs to hear from farmers and other waste generators on what specifically will best work for them, and this information will be used to provide the best educational product for the generators.
- Different livestock species have different feed requirements, but the primary target species will likely be cattle, as they consume the most and are the bulk of livestock in King County. Their operations also have the best-suited infrastructure.
- Both farmers and grocers are being solicited to supply food waste as feed. There should be an opportunity for farmers to participate in both sides of this process, though.
- There are two tiers to this food waste rerouting: what can be brought back into the human food supply chain (such as food banks), and what can be used as animal feed.
- In terms of what it takes for a generator to "break even" in this process, that will need to be determined by the individual entity. It's about scale, and has to be the right match.
- It was suggested that any workshops for this program include education on the permitting aspect, and for County permitting staff to be briefed so code enforcement can sort out any issues. Patrice Barrentine agreed to bring these ideas to the attention of the agriculture permitting team.
- Any Commissioners interested in being part of this work group should let Barrentine know. The hope is to have a meeting the first quarter of 2022, as well as a start on workshop coordination and running information by the agriculture permitting team.

King Conservation District – New Executive Director (Carrie King, Rosa Méndez-Perez)

Carrie King introduced Rosa Méndez-Perez, the new executive director for the King Conservation District (KCD). Méndez-Perez has a professional background in conservation and environmental justice, and finds resonance in KCD's values in collaborating and coordinating community-based stewardship.

KING COUNTY AGRICULTURE COMMISSION – DRAFT MEETING MINUTES – OCTOBER 14, 2021 PAGE 3 OF 4

Public Comment - Related to Specific Agenda Item (Darron Marzolf)

There was no public comment given during this period.

Old Business – Updates

Commission Details/Policy & Events (Patrice Barrentine):

- Washington State has a new long-term care funding program, established by the state legislature. More information is available at https://wacaresfund.wa.gov/
- o COVID-19 vaccination pop-up locations are still available in King County.
- King County Council (KCC) holds meetings every Tuesday at 1 pm. The proposed Commercial Property
 Assessed Clean Energy and Resiliency (C-PACER) program is being taken up by KCC's Mobility and
 Environment Committee this month.
- A \$20 million climate equity capital pool has been proposed, to improve climate equity for King County residents. In the proposal is a major point for farms: infrastructure to improve opportunities for BIPOC farmers to grow and harvest culturally relevant foods in King County.
- o The status of Commissioner appointments and reappointments was reviewed.
- o There is a new free online documentary this week celebrating the 50th anniversary of saving Pike Place Market from destruction.
- o The Tilth Conference is being held November 19-21 and the Washington Farm Bureau state conference is November 15-18 in Yakima.
- WSU's Cover Crop Field Day and No-Till Training Workshop are scheduled for October 19.
- o Fall agritourism is in full swing, with many farms offering activities.
- o The Local Food Initiative's (LFI) latest newsletter features articles on Horseneck Farm and the Farmland Leasing Program, which is accepting proposals.
- O The USDA is launching many programs, including: an organic certification cost share program, a pandemic safety grant program, and a micro-farm crop insurance policy. It is time to register for the 2022 agriculture census, and USDA is also accepting comments on a new climate-smart agriculture and forestry partnership initiative. Any comments on this should be sent to Patrice Barrentine or Richard Martin; while the Commission normally comments on County policy, there are sometimes opportunities to comment through DNRP to outside entities.
- o Business Impact Northwest is offering free one-on-one business coaching.
- King County Agriculture Program (Richard Martin): The County owns and manages about 325 acres of mostly farmable land as part of its Farmland Leasing Program (FLP). There are five core farms in the program, a total of about 100 farmable acres. The current focus is on providing farmland access to new and BIPOC farmers, and providing the infrastructure to succeed on those five farms. Bee Cha is manager of the core farms, operating on a budget of \$20-30K annually. Current infrastructure needs are estimated to cost \$1 million. The agriculture program has submitted a proposal to a \$20 million County biennial fund, asking for \$1 million to meet these infrastructure needs. This proposal was packaged with the Executive's budget, with hopes that KCC will approve. If so, the funded projects must be completed within two years. It was asked if there is a Commission committee to help with FLP. Martin replied there is a list that the County would be glad to vet through the Commission's land committee, to look for areas to advance this work.

• King Conservation District (Carrie King):

- o The new Executive Director's highest priority is filling the vacancies for: head of Human Resources, finance director, and director of stewardship. The budget is close to being finalized and recruitment will begin soon.
- O Plant sale pre-orders begin mid-November.
- o The Regional Food Systems program received 24 grant applications this year. Half are BIPOC, up from 25% last year.
- o Farm equipment rental season is winding down.
- About 20K linear feet were successfully drained this year, double the usual target. About 8,000 feet of drainage tile were lain. Things are queueing up for next year's field season. Anyone interesting in dredging, culvert replacement, drain tile replacement, or bridges will be put in touch with Liz Stockton.
- Local Food Initiative (Mike Lufkin): There was no update available.

• King-Pierce Farm Bureau (Leann Krainick):

- o All present are encouraged to return their ballots for the coming election.
- o The My Fork Supports Farms campaign continues. Anyone with ideas should send them to Leann Krainick.
- A coming Town Hall meeting is open to all state FB members, with a conversation on the "Rural-Urban Divide."

KING COUNTY AGRICULTURE COMMISSION – DRAFT MEETING MINUTES – OCTOBER 14, 2021 PAGE 4 OF 4

- WSU Extension (Jordan Jobe):
 - Next Tuesday is WSU's Cover Crop Day.
 - o Pierce County's agriculture committee is hosting a round table conference call on October 21 about the state DOE's plastic bag ban, with a DOE representative present.
 - o The AgAID institute website is now live.
- Meat Processing Update (Patrice Barrentine, Darron Marzolf): The planned USDA/WSDA meat processing facility is close to launch, with paperwork mostly in order to acquire the new location. Darron Marzolf has been awarded a USDA grant to update the facility, a former horse arena, to pass USDA inspector standards. This includes having the potential to "overnight" animals that need to be dropped off for slaughter, as well as concrete added to handle the blood, which is treated as a hazardous substance. PCC has signed a letter of intent to work with the new facility, which will be a benefit to small farms; unsold animals from small farmers can now come into this process and local meats can be routed into the food stream. The hope is to be up and running in less than six months. Marzolf is also hosting the planned USDA mobile slaughter facility and converting his custom meat shop to USDA. This will be the closest such facility to the Seattle area.
- Farm Fish Flood 2.0 (Beth leDoux): The FFF Implementation Oversight Committee (IOC) has worked to develop progress milestones, action items that need to be accelerated. The top three priorities for the farm caucus to uphold the FFF agreement include: having a reliable stream of funding, improving drainage (the caucus's top priority), and work on alluvial fans. The fish caucus wants habitat projects to move at a steady pace, and the flood caucus is interested in public safety and improving flood resiliency of roads. Patrice Barrentine is working on the agriculture strategic plan for the Snoqualmie Valley; a report will be available for review in the first quarter of 2022.

New Business: Preparation for Officer Elections, Forming Selection Committee (Patrice Barrentine) Commission officer elections, along with formation of a selection committee to nominate new Commissioners, are slated for next month. Six Commission seats will open at the end of February 2022, including that of current chair

Nayab Khan, who may not renew.

Patrice Barrentine reviewed the nomination process and explained the reporting hierarchy for the Commission, that they communicate to the Executive and KCC through DNRP. Nominations were requested, but none were volunteered. Barrentine will reach out to Commissioners before next Commission meeting to gauge interest and confirm nominees.

Barrentine also reviewed the current list of Commission committees. During the pandemic, committee work has paused, but will be restarted in 2022. The makeup and duties of the selection committee were also reviewed; Jessi Bloom volunteered to serve on this committee.

Public Comment – General (Darron Marzolf)

There was no public comment given during this period.

Concerns of Commissioners (Darron Marzolf)

There were no concerns raised during this time.

Meeting adjourned at 7:58 pm

Next Meeting(s)

November 4, 2021, 6:00 pm to 8:00 pm (Zoom Video Conference Call) – CANCELED due to weather December 9, 2021, 6:00 pm to 8:00 pm (Zoom Video Conference Call)

Council Meetings every Tuesday, except Nov 30

Mobility and Environment Committee

Proposed Ordinance No. 2021-0301

October 27th

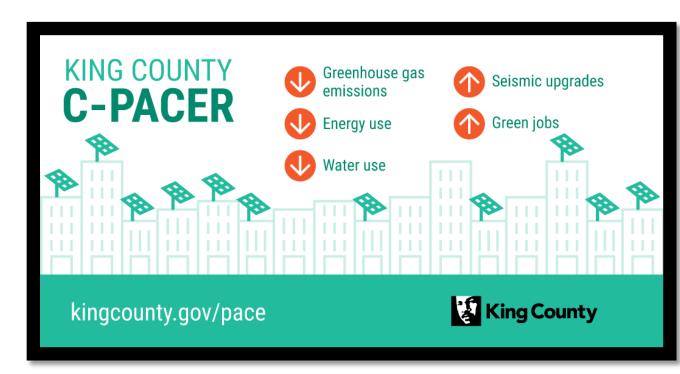

Action: Passed Out of Committee Without a

Recommendation

November 16

Action: Passed as Amended

AN ORDINANCE establishing a commercial property assessed clean energy and resiliency financing program; amending Ordinance 4461, Section 2, as amended, and K.C.C. 20.22.040 and Ordinance 4461, Section 2, as amended, and K.C.C. 20.22.040 and adding a new chapter to K.C.C Title 18.

New \$20 Million Climate Equity Capital Pool Proposed On September 30, Executive Constantine transmitted his \$617 million mid-biennial proposed supplemental budget, which includes \$20 million of Climate Equity bond funds for projects to support frontline communities disproportionately affected by climate change and increase opportunities for those communities to benefit from emissions reductions and energy efficiency. Through a six-month process, the Climate Equity Community Task Force crafted the goals of this Climate Equity funding, developed criteria for project proposals, and, ultimately, selected project proposals for the mid-biennial budget process. The projects include:

- White Center Community Hub funding, which will have a significant solar array and provide holistic support to frontline communities disproportionately affected by climate change.
- Grants to enhance green building components of affordable housing projects.
- Parks solar lighting to improve safety, walkability, and gathering spaces in underinvested areas.
- Environmental investments for income-qualified homes, including home energy retrofits and onsite sewage system repairs and replacements.
- ADA pedestrian improvements in White Center to boost walkability and transit access.
- Infrastructure to improve opportunities for BIPOC farmers to grow and harvest culturally relevant foods in King County.

Please note, all projects are subject to Council approval, which is expected in late November.

The King County
Flood Control District
will hold two public
scoping meetings on
January 6, 2022
(2:30 – 4 PM and 6 –
7:30 PM).

LOWER GREEN RIVER CORRIDOR FLOOD HAZARD MANAGEMENT PLAN

Programmatic Environmental Impact Statement Scoping Fact Sheet

FLOOD RISK IS REAL

The Lower Green River is at risk of severe flooding. Floods are dangerous and destructive. They threaten our safety, block the movement of people and goods, harm the environment, and cause severe damage.

The King County Flood Control District (the District) protects people, property, and communities from the harmful impacts of floods. The District wants to make sure the Lower Green River Corridor is a safe place to live, fish, work, farm, and play for generations to come.

The District is developing a Flood Hazard Management Plan to protect the Lower Green River Valley. The Valley includes:

22,000 people living in the Valley and floodplain

Over 100,000 jobs

2nd largest industrial park on the West Coast and 3rd largest warehouse and distribution center in the country

Over \$37 million in income from businesses of all sizes, including companies like Boeing, Starbucks, REI, IKEA, and Blue Origin

Major transportation routes and public facilities, including hospitals and schools

Threatened salmon and other aquatic animals

Farming

Parks, trails, and natural areas

FLOOD FACTS

- Flooding is the state's most expensive natural disaster; the costs of flooding exceed all other natural dangers.
- Even though flooding usually happens in the winter, King County rivers can flood almost any time of year.
- As the climate changes, flooding will be more common.

Source: King County & Washington State Department of Ecology

PROTECTION TAKES PLANNING

The District is developing a Lower Green River Corridor Flood Hazard Management Plan. The plan will guide future investments to reduce flooding.

A study called a **Programmatic Environmental Impact Statement (PEIS)** is underway. This study will analyze ways to provide flood protection and meet other important objectives, including equity, habitat and salmon recovery, community, agriculture, development, water quality, and recreation.

WE NEED TO HEAR FROM YOU

You can help by providing feedback on three alternatives for the draft PEIS. Each alternative takes a different approach to managing flood risk. And each will describe environmental impacts and ways to mitigate them.

LOWER GREEN RIVER CORRIDOR FLOOD HAZARD MANAGEMENT PLAN PEIS ALTERNATIVES

PROJECT-BY-PROJECT MULTI-BENEFIT IMPLEMENTATION

- No area-specific Flood Hazard Management Plan
- Considers projects case-by-case
- Minimal impacts to neighboring properties
- Projects benefit communities and the environment
- Does not take a comprehensive approach to reducing flood risk

SYSTEMATIC MULTI-BENEFIT IMPLEMENTATION

- Develops a new area-specific
 Flood Hazard Management Plan
 in collaboration with Tribes, local
 jurisdictions, agencies, and
 stakeholders
- Takes a comprehensive approach
- Shows how to implement projects resulting in benefits to communities and the environment, including conserving and restoring habitat along the river

MULTI-BENEFIT IMPLEMENTATION

- Develops a new area-specific Flood Hazard Management Plan in collaboration with Tribes, local jurisdictions, agencies, and stakeholders
- Takes a comprehensive approach
- Shows how to implement projects resulting in <u>more</u> benefits to communities and the environment, including <u>more</u> habitat conservation and restoration along the river

2019 2020 2021 2022

INITIAL SCOPING

REVISED ALTERNATIVES DEVELOPED

NEW SCOPING PERIOD

PREPARE

DRAFT PEIS

FALL 2022

- Comments on the Draft PEIS are addressed and the evaluation is refined as warranted
- Final PEIS issued

NOVEMBER 2018-APRIL 2019

- PEIS begins
- Initial scoping
- Stakeholders and public provide comments on initial alternatives

MAY 2019-0CT0BER 2021

- District sets direction on alternatives and prioritize multi-benefit projects
- Prepare for additional scoping period

DECEMBER 2021-JANUARY 2022

 Public provides comments on the revised alternatives and the environmental issues that should be part of the evaluation

WINTER-SPRING 2022

- Revised alternatives may be refined based on scoping comments
- Analysis to determine the potential impacts of each alternative

SUMMER 2022

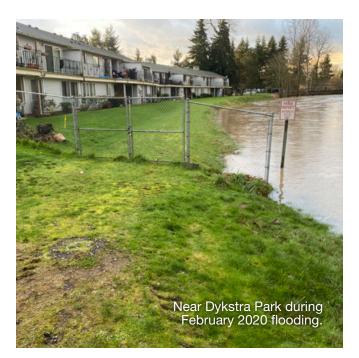

- Draft PEIS released for public review
- Public provides comments on the analysis conducted on revised alternatives

DRAFT PEIS REVIEW

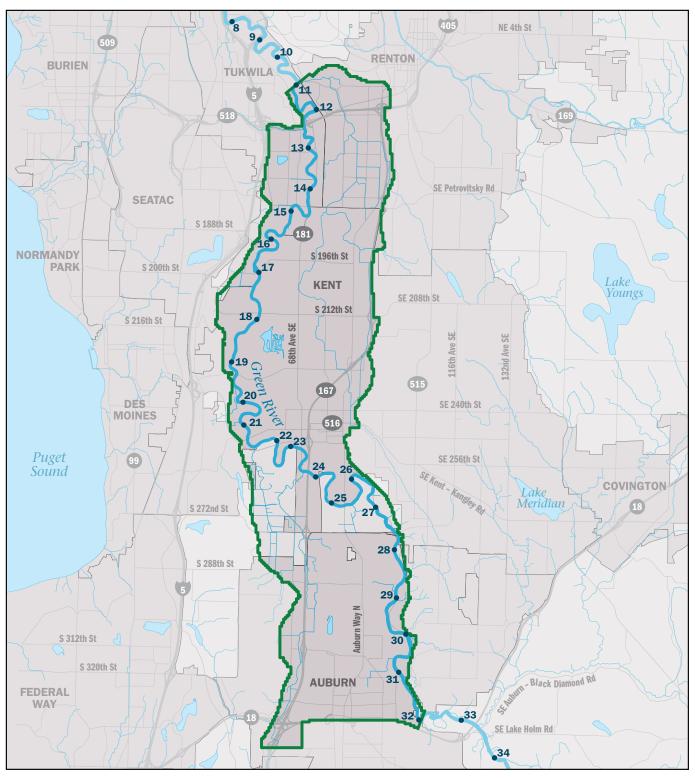

FINAL PEIS

PROJECT STUDY AREA

The study area addresses approximately 21 miles of the Green River through the cities of Auburn, Kent, Renton, and Tukwila, and unincorporated King County.
