## State Environmental Policy Act Determination of Non-Significance

**Date of Issue:** December 8, 2022  
**Name of Proposal:** Marymoor Park Stormwater Facility Improvements  
**Location of Proposal:** 6046 W. Lake Sammamish Parkway NE, Redmond, WA 98052

**Description of Proposal:** The rain garden component of the project proposes to install storm drainage diversion/conveyance piping, a pre-treatment vortex separator, a vegetated bioretention channel and planted rain garden (bioretention cell) and associated overflow outlet improvements to provide retrofit water quality treatment and infiltration of contributing impervious and pervious surfaces runoff.

The channel improvements component of the project proposes to replace two separate existing 18-inch corrugated metal pipe culverts under the west and east accesses to Parking Lot K with pre-cast box culverts and pre-cast headwalls and wingwall end sections to retain the adjacent road embankment side slopes. The existing channel section between the culverts will be regraded and restored for water quality and enhancement habitat benefits, and similar for short sections of the channel downstream of the west culvert and upstream of the east culvert at tie-in to the existing channel.
