

## Appendix A: Preliminary Initiative Performance Measures MIDD 2 Measures and Measurement

### How much? Service Capacity Measures

#### Individuals served annually

# of referrals staffed  
# of clients screened  
# referred for follow-up  
# engaged in services (by service type)  
# of unique families served  
# of children in families served

#### Trainings delivered and attendees

# of trainings or coordination activities  
# of attendees or coordination contacts

#### Participating providers

# of participating agencies/programs

### How well? Service Quality Measures

#### Increased use of prevention (outpatient) services

% linked to needed treatment or services within program  
% linked to publicly-funded behavioral health treatment  
% completing or successful in ongoing treatment

#### Increased housing stability

% housed at exit  
Housing retentions

#### Improved access to social services safety net

% linked to needed social services

#### Education achievement

% with improved markers (suspensions, grades) over time

#### Diversion of referrals

% of referrals with provider documented diversions

#### Increased job placements and retentions

% employed and retaining jobs

#### Increased positive child placements at parent exit

% with positive child placements at exit

#### Increased application of trauma-informed principles

% receiving trauma-informed care

#### Increased perception of health and behavioral health issues and disorders

% rating courses relevant and useful  
% of agency-staff who are trained across disciplines

#### Increased use of culturally appropriate behavioral health practices

% linked to needed treatment or services within program

#### Increased resiliency and reduced negative beliefs

% of survey respondents indicating improvement

#### Improved wellness self-management

% with increased self-management skills

#### Equitable graduation rates (homeless vs. not)

% who graduate by housing status at entry

#### Graduation rates and positive exits from services

% graduating and with positive exit dispositions

#### Expanded use of evidence-based interventions

% administered risk, need, responsivity tool

### Is anyone better off? Individual Outcome Measures

#### Reduced behavioral risk factors

% with clinically-improved depression and anxiety  
% positively engaged in treatment or met treatment goals  
% with improved markers (harm to self/others) over time  
% with knowledge of systems and how to access resources  
Agency-level markers indicating improved behavioral health

#### Increased stability in treatment, employment, or other quality of life measures

% positively engaged in treatment or met treatment goals

#### Increased enrollment in Medicaid or other insurance

% enrolled in health insurance programs

#### Reduced substance use

% with reduced substance use

#### Improved wellness and social relationships

Protective/risk factors (local/county/state)  
% positively engaged in treatment or met treatment goals  
% with positive exit dispositions  
% with family empowerment and advocacy skills  
% with reduced caregiver strain

#### Reduced unnecessary incarceration, emergency department or hospital (psychiatric inpatient) use

% diverted from relevant costly system(s)  
% with reduced use (of those with any use)

#### Increased skills related to crisis de-escalation and intervention

Use-of-force and crisis response statistics

#### Improved perception of health and behavioral health issues and disorders

Emotional health and daily functioning (county vs. state)  
Narrative reports demonstrating value of system coordination

## Appendix A: Preliminary Initiative Performance Measures

The MIDD 2 Implementation Plan lists high-level measures for service capacity, service quality, and individual outcomes in the performance measures section of each initiative description (Appendix D of the Implementation Plan). The previous page articulates how each standardized measure will be operationalized in each initiative. In the tables below and on the following pages, anticipated specific performance measurements (typically numbers and percentages) are listed for each MIDD 2 initiative. Using the Results Based Accountability (RBA) framework, these anticipated measurements are linked to the relevant standardized measures shown in the Implementation Plan initiative description, and include a target for each initiative (associated with the number of people to be served).

Notes:

- The acronym ED in the following tables refers to available emergency department data.<sup>1</sup>
- The acronym PI refers to psychiatric inpatient data gathered from community inpatient psychiatric hospitals located within King County, plus Western State Hospital.
- The annual targets for people to be served by each initiative appear in bold under “How much was done?” This number represents unduplicated individuals per year, unless otherwise specified.

PRI-05: Collaborative School Based Behavioral Health Services: Middle and High School Students <sup>2</sup>	# of youth screened # referred for follow-up # engaged in services <b>Target: 1,000 screened</b> # of suicide prevention trainings and attendees <b>Target: 4,750 trained</b>	% linked to needed treatment or services within program % linked to publicly-funded behavioral health treatment	% with reduced substance use % with clinically-improved depression and anxiety  Protective/risk factors in participating schools compared to whole county and statewide

<sup>1</sup> Although efforts are ongoing to explore other potential ED data sources for the MIDD evaluation, data is currently available primarily from Harborview Medical Center in Seattle.

<sup>2</sup> The Best Starts for Kids (BSK) evaluation will be considering system-level measures for this blended initiative.

Appendix C  
MIDD Evaluation Assessment Recommendations

RECOMMENDATION	ACTION TAKEN/PLANNED
<b>EVALUATION PLAN AND FRAMEWORK</b>	
<b>1. Clarify the purpose of the evaluation and logic of the evaluation framework.</b>	The MIDD 2 Framework and the MIDD 2 Logic Model clarified the purpose and logic of evaluation for MIDD 2. A Results Based Accountability (RBA) format was used to incorporate different levels of performance measurement and population (headline) indicators.
<b>2. Involve stakeholders in developing the evaluation framework.</b>	The MIDD Advisory Committee and the MIDD Advisory Committee Evaluation Work Group provided feedback on the MIDD 2 evaluation approach. Provider and community input from MIDD's renewal process in 2016 also impacted the MIDD 2 Framework.
<b>OUTPUT AND OUTCOME MEASURES</b>	
<b>3. Establish relevant output and outcome measures.</b>	Meaningful and appropriate performance measures, including outputs and outcomes, have been developed with stakeholders including service providers when appropriate, using an RBA approach. Further collaboration with providers and stakeholders will occur in 2017 and 2018. As one example, performance measures are being developed with the King County Behavioral Health Organization (BHO) providers in an Outcomes Measurement Group.
<b>4. When available, select valid, reliable, and sensitive proximal outcome measures in collaboration with service providers.</b>	
<b>5. Focus on clinically and practically meaningful changes in outcomes.</b>	
<b>EVALUATION PROCESS</b>	
<b>6. Invest in data collection infrastructure.</b>	Improved systems for data reporting are in development by the Department of Community and Human Services (DCHS). King County Information Technology is conducting a data collection and reporting improvement project with DCHS that includes MIDD, Best Starts for Kids (BSK), Veterans and Human Services Levy (VHSL), and other human services programming.
<b>OUTCOME EVALUATION</b>	
<b>7. Modify evaluation design if the next MIDD evaluation is to show causality.</b>	The MIDD Evaluation in general will not attempt to show causality. For certain new programs a control or comparison group may be used based on established criteria (described in the evaluation plan). If an evaluation methodology that requires a control group is used, it will be carefully assessed for ethical and cost considerations.
<b>EVALUATION REPORTING</b>	

Appendix C  
MIDD Evaluation Assessment Recommendations

<b>8. Increase frequency of performance evaluation availability.</b>	Data infrastructure is the initial step to increasing the frequency of performance evaluation availability. King County Information Technology is conducting a data collection and reporting improvement project with DCHS that includes MIDD, BSK, VHSL, and other human services programming. Development of a shared, in conjunction with BSK and VHSL when feasible, data dashboard is also underway.
<b>9. Establish guidelines for report creators and editors on the scope of their decision making.</b>	As under MIDD 1, the MIDD Advisory Committee will review each annual report. An expected enhancement for MIDD 2 is that the Advisory Committee will spend more time reviewing and discussing the annual reports. The Advisory Committee will also establish a standing Evaluation Subcommittee in order to develop a deeper understanding of ongoing MIDD evaluation activities in order to provide greater input.
<b>10. Avoid presenting non-causal results in ways that imply causality.</b>	The MIDD evaluation in general will not attempt to show causality. Results will be reported in ways that do not imply causality.

## Appendix E: Background Information on Results Based Accountability

The development of the MIDD Evaluation Plan was significantly informed by the principles of the [Results-Based Accountability<sup>1</sup> \(RBA\)](#) framework. RBA is a national model and provides a disciplined, data-driven, decision-making process to help communities and organizations take action to solve problems. It is a simple, common sense framework that starts with ends – the difference to made, and works backward, towards means – strategies for getting there.

RBA makes a distinction between *population accountability* through population indicators which assess wellbeing of a whole population and *performance accountability* through performance measures which assess wellbeing of the clients directly served by programs. MIDD will *contribute* to improving population-level change, along with other sectors, funders, and partners in the community.

MIDD is *accountable* for performance of MIDD initiatives. The impact of MIDD initiatives on individuals and families directly served by programs will be measured using performance measures. In order to ensure that MIDD-funded activities are connected to contribute to population-level change, strategy areas are aligned with headline indicators.

RBA also sets a framework for community involvement and partnership, identifying the current state and determining what strategies will be used to make the changes being sought.

### **MIDD Result**

The result MIDD aims to achieve is: *People living with, or at risk of behavioral health conditions, are healthy, have satisfying social relationships, and avoid criminal justice involvement.*

### **MIDD Headline Indicators**

Headline indicators are aspirational, long-term measures that quantify MIDD's overarching results:

- Improved emotional health – rated by level of mental distress
- Increase in daily functioning – rated by limitations to due to physical, mental or emotional problems
- Reduced or eliminated alcohol and substance use
- Reduced suicide attempts and death
- Reduced drug and opioid overdose deaths
- Reduced incarceration rate

### **MIDD Performance Measures**

Performance measures will be specific to each program and finalized during the contract development process in partnership with funded providers. See Appendix A for detailed information. Performance measures will answer the questions:

- How much was done?
- How well was it done?
- Is anyone better off?

## Appendix F: Glossary of Terms

**Accountability** – The responsibility to provide evidence to stakeholders about whether MIDD initiatives are effective and conform to expectations and requirements.<sup>1</sup>

**Quality Improvements** – Ongoing review of program performance measurement data to see what improvements could be made.

**Cultural competency** – Acknowledging and responding to the complexity of cultural identity; recognizing the dynamics of power, avoiding reinforcing cultural stereotypes and prejudice in the work; being thoughtful and deliberate in the use of language and other social relations to reduce bias when conducting evaluations; using culturally appropriate theories and methods, recognizing the many ways data can be collected, analyzed, interpreted, and disseminated in order to produce work that is honest, accurate, respectful and valid.

**Data** – Information that will be used to evaluate MIDD, including numbers and stories.

**Disproportionality** – Over- or under-representation of a demographic group (e.g. racial or ethnic group) compared to that group's representation in the general population.

**Equity and Social Justice** – Full and equal access to opportunities, power, and resources so that all people may achieve their full potential.<sup>2</sup>

**Early Intervention** – Taking action early to prevent future problems. Evidence shows that the earlier investments are made, the greater the return for the individual and society.

**Evaluation** – Systematic collection of information about the activities, characteristics, and outcomes of a program, set of programs, or initiative to improve effectiveness and/or inform decisions.<sup>3</sup>

**Headline Indicator** – Aspirational, long-term population-level indicators that quantify the MIDD result.

**Impact** – Effects of a program that occur in the medium or long term with an emphasis on ones that can be directly attributed to program efforts.<sup>4</sup>

**Indicator** – Population-level measure that will be used to assess the health or well-being of individuals and families in King County.

**Investments** – The strategies, programs, and projects that the MIDD will fund.

**King County Council** – The legislative branch of the King County government that sets policies, enacts laws, and adopts budgets that guide an array of services for the King County region.<sup>5</sup>

## Appendix F: Glossary of Terms

**Logic Model** – Visual representation showing the sequence of related events connecting the activities of a program with the programs’ desired outcomes and results.<sup>6</sup>

**Outcomes** – Program-level changes in wellbeing, knowledge, attitudes, beliefs, or behavior.<sup>7</sup>

**Performance Measurement** – Ongoing monitoring and reporting of program accomplishments, particularly progress toward pre-established goals.

**Performance Measures** – Measures of MIDD initiative-level performance. Following the RBA approach, these measures will fall into the following three categories:

- How much was done?
- How well was it done?
- Is anyone better off?

**Population** – The King County population, or a sub-group within the King County population.

**Prevention** – Working upstream to prevent problems before they happen.

**Providers** – Organizations that King County will fund to implement MIDD initiatives.

**Requests for Proposals (RFPs)** – Requests that King County issues asking for applications for MIDD funding.

**Results** – As defined by the RBA approach, the result is the overarching goal of the MIDD.

**Results Based Accountability (RBA)** – A simple, common sense framework that starts with ends – the difference to made, and works backward, towards means – strategies for getting there. RBA makes a distinction between *population accountability* through population indicators which assess wellbeing of individuals and families throughout King County overall, and *performance accountability* through performance measures which assess wellbeing of the individuals and families directly served by MIDD-funded programs.

**Stakeholders** – People or organizations that are invested in or interested in MIDD initiatives and evaluation results.

## Appendix H: Mental Illness and Drug Dependency Headline Indicators

**Population-based Indicators** are proxy measures to help quantify the result-a condition MIDD wants to change to improve health and well-being of residents in King County. MIDD will **contribute** to turning the curves of population-level indicators, as defined through Results-Based Accountability. The population-based indicators are about a population and tracks how various King County efforts and initiatives are collectively making an impact on the people in King County. All headline indicators were rated on three Results-Based Accountability criteria: data power, proxy power, and communication power.

Listed below are the technical definitions and data sources for the proposed headline indicators.

HEADLINE INDICATORS	Data Source
<p>Improved emotional health</p> <p>Adults: number of days with stress, depression, and problems with emotions in the past 30 days</p> <p>Youth: Percent of students in grades 8, 10, and 12 who report feeling depressed or having suicidal thoughts</p>	<p>Adults: Behavioral Risk Factor Surveillance System (BRFSS)<sup>1</sup></p> <p>Youth: Healthy Youth Survey (HYS)<sup>2</sup></p>

<sup>1</sup> The [Behavioral Risk Factor Surveillance System \(BRFSS\)](#) is a set of national telephone surveys that collect state data about U.S. residents regarding their health-related risk behaviors, chronic health conditions, and use of preventive services.

<sup>2</sup> The [Healthy Youth Survey \(HYS\)](#) is a collaborative effort of the Office of the Superintendent of Public Instruction, the Department of Health, the Department of Social and Health Service's Division of Behavioral Health and Recovery, the Liquor and Cannabis Board, and the Department of Commerce. It provides important survey results about the health of adolescents in 6<sup>th</sup>, 8<sup>th</sup>, 10<sup>th</sup> and 12<sup>th</sup> grades in Washington.

<sup>3</sup> The Washington State Department of Health Center for Health Statistics collects and publishes critical information needed to help people in Washington live healthier lives. As the office of the State Registrar, the Center is responsible for the registration, preservation, amendment, and release of official state records of all births, deaths, fetal deaths, marriages and divorces that occur in Washington. They also maintain data on [Injury](#). More than 200 injury data tables are available on the website in PDF and Excel formats. The tables cover injury deaths and nonfatal injury.

<sup>4</sup> [The King County Medical Examiner Office](#) collects data on deaths from sudden, violent, unexpected and suspicious circumstances in King County. The office publishes annual reports that show the manner of death and causes of deaths including Deaths due to drugs and poisons. Data can be accessed and queried through either Washington State Department of Health Community Health Assessment and Tool (CHAT) or CDC WONDER.
