VETERANS & HUMAN SERVICES LEVY 2015 ANNUAL REPORT

The Veterans and Human Services Levy for 2012–2017 was approved by King County voters in 2011 to build on the success of the 2006–2011 levy. Costing about \$17 a year for the average homeowner, it provides approximately \$18 million each year to help people in need.

HIGHLIGHTS

Look what your contribution to the levy did in 2015:

- 82% of King County Veterans Program clients with housing goals achieved them.
- \$1 from the levy leveraged \$17 in other funding for low-income housing.
- 97% of Healthy Start parents increased their parenting skills.

CITIZEN OVERSIGHT

In 2015, the Veterans Citizen Oversight Board and the Regional Human Services Citizen Oversight Board donated more than 200 hours of their time to review the work of the 40 levy-funded programs. Throughout the year, members monitored levy fund expenditures and made recommendations that helped shape planned changes for two levy programs.

To deepen their knowledge, the oversight boards received training on Supporting Young Children Exposed to Trauma and on Military Sexual Trauma. The boards also were briefed on King County's Best Starts for Kids and Regional Veterans Initiative. **FUNDING SPLIT.** Levy revenue is divided equally into two parts:

- The Veterans Levy Fund serves veterans, military personnel and their families.
- The Human Services Fund assists other individuals and families in need.

Each fund has a citizen oversight board to ensure that the funds are used effectively.

GOALS. The levy's goals support King County's Strategic Plan, and the "Fair and just" principle of the Equity and Social Justice Initiative. The three levy goals are:

- Prevent and reduce homelessness
- Reduce unnecessary criminal justice and emergency medical system involvement
- Increase self-sufficiency of veterans and vulnerable populations.

STRATEGIES. The levy's Service Improvement Plan sets out four overarching strategies to achieve these goals:

- 1. Supporting veterans and their families to build stable lives and strong relationships
- 2. Ending homelessness through outreach, prevention, permanent supportive housing and employment
- 3. Improving health through the integration of medical and behavioral health services
- 4. Strengthening families at risk.

The Levy by the Numbers – A Look Back	20
2015 Performance Management Reports	24
2015 Financial Reports	28

Dear Friend:

We are very pleased to bring you the 2015 Annual Report of the Veterans and Human Services Levy, the fourth year of the 2012–2017 levy. Last year we served almost 37,500 county residents including 7,550 veterans, and made strong progress on the levy's three goals. Levy accomplishments supported the goals of the King County Strategic Plan, especially "Provide opportunities for all communities and individuals to realize their full potential," as well as the "Fair and just" principle of the King County Equity and Social Justice Initiative. Here are a few examples of 2015 achievements in each of the levy's goal areas.

REDUCING HOMELESSNESS:

- Helped 1,527 veterans obtain or maintain housing (Activity 1.1)
- Provided capital funds to create 168 apartments for low-income residents (Activity 2.2).

REDUCING UNNECESSARY USE OF THE CRIMINAL JUSTICE AND EMERGENCY MEDICAL SYSTEMS:

- Achieved cost offsets of an estimated \$615,000 through housing placements (Activity 3.6)
- Provided intensive services for 132 homeless individuals with a mental illness who were involved in the criminal justice system (Activity 2.5).

INCREASING SELF-SUFFICIENCY:

- Provided 109 older veterans and spouses who had disabilities and minor depression with in-home counseling to regain as much independence as possible (Activity 3.4)
- Responded to 99,112 calls to the 2-1-1 line, offering referrals to community services that could assist with move-in costs, emergency shelter and other needs (Activity 4.5).

The included Performance Reports show how we track the success of levy-funded programs. Most met their service goals this year. We are also including a report on pages 20–23 that looks back at some of the levy's achievements over the years. This is available online at kingcounty.gov/VHSLevyAchievements.

While the levy-funded services have been effective, we know the needs continue in our communities. The 2016 One Night Count identified 4,500 homeless people without shelter, an increase of more than 700 people from the 2015 One Night Count. Many veterans returning to our communities need assistance, as does our growing population of aging veterans. By 2025, 31 percent of the county's veterans and non-veterans are expected to be age 55 or older, with their service needs only expected to grow as they age. We need to be mindful of these trends as we continue to shape levy services to meet our neighbors' needs.

Thank you for your interest in and continued support of the levy. As you read the stories of people you have helped and review the data in this report, please know that we could not achieve this progress without you!

Sincerely,

Mern / Murn /

Francisco F. Ivarra, Chair Veterans Citizen Oversight Board

David Ramsay, Chair Regional Human Services Citizen Oversight Board

Supporting Veterans and Their Families to Build Stable Lives and Strong Relationships

Team Clears the Way to Better Life for 41-year-old Vet

Mato, a 41-year-old Army veteran, saw only roadblocks ahead—especially after being booked into the Maleng Regional Justice Center. But it was there he met the Veterans Incarcerated Program's Reentry Case Management (VRCM) team, one of four levy-funded programs that worked together to help Mato get on his feet. The team, managed by the Washington Department of Veterans Affairs (WDVA), explained they could offer him short-term case management for reentering the community.

Mato's re-entry needs were basic: housing, food, clothing, health care and transportation. The VCRM team got to work while he was still incarcerated, and enrolled him in the U.S. Department of Veterans Affairs (VA) Healthcare System. They also connected with a VA specialist, who found him housing. Then another roadblock

arose: Mato was unexpectedly transferred to the Department of Corrections (DOC) Monroe facility for another six months. Undaunted, the VRCM team contacted the DOC community corrections officer and updated Mato's re-entry plan.

Upon Mato's release, the team launched his plan, starting with a levy-supported emergency shelter bed, a clothing gift card, a backpack for his belongings, and an ORCA card for the bus to VA appointments. The team linked him with the King County Veterans Program (KCVP), who enrolled him in the levy's community employment program with the YWCA.

Now Mato is in transitional housing, attending South Seattle College, meeting his legal obligations—and can see a promising road to stability.

SUPPORTING VETERANS AND THEIR FAMILIES TO BUILD STABLE LIVES AND STRONG RELATIONSHIPS

King County is home to approximately 122,000 veterans and military personnel. Levy funding has helped veterans and their families rebuild strong lives and find services that meet their unique needs. In 2015, Strategy 1 activities helped 5,384 veterans and family members, almost 400 more than in 2014, get medical and behavioral health services, find stable housing and employment, and re-establish or continue a productive life in our communities.

ACTIVITY 1.1

King County Veterans Program

The King County Veterans Program (KCVP) has served low-income, homeless, disabled, and at-risk veterans and their families since the 1950s. Levy funding has enabled KCVP to expand to serve National Guard and Reserves members, and the families of active duty military who were not eligible for other military services. KCVP has supported immediate needs and long-term self-sufficiency. In 2015, KCVP:

- Served 2,532 veterans and family members, more than 900 of whom were homeless when they contacted KCVP.
- Helped 1,527 get or maintain housing.
- Provided \$815,411 in emergency financial assistance, 68 percent of which was for housing and utilities.
- Provided case management for 1,829 veterans and family members.
- Helped 80 percent become more self-reliant and 82 percent get jobs.

ACTIVITY 1.2

Veteran Outreach and Engagement

Three levy-funded programs focused on reaching out to veterans in need and helping them connect with housing services, health care and other benefits to rebuild their lives.

Enhanced outreach to women veterans and

veterans of color. In 2015, the program's outreach specialists visited shelters and tent cities, and were "dispatched" from the Call Center (see below) to engage 462 homeless veterans. Almost 23 percent were women veterans. The program used the Common Assessment tool (VI-SPDAT)¹, helped 79 percent get benefits with the VA or get housing, and assisted 30 percent with job searches.

Veteran information and referral. The King County Veterans Call and Service Center served 881 veterans in 2015, connecting 874 to veteran-specific resources and referrals. The Call Center number was used by Operation: WelcomeOneHome, as part of action to end veteran homelessness. Center staff participated in veteran-focused resource fairs and workshops, as well.

Homeless Veteran Street Outreach. In 2015, the program conducted outreach in shelters and with veterans living on the streets, completed assessments for 166 homeless veterans and families, and helped 39 households get housing. Referrals successfully linked 86 percent with services.

Street outreach assessed **166 homeless vets**, connecting **86 percent** with services.

ACTIVITY 1.3

Veterans Employment and Training

The Vet Corps program's 15 peer mentors served on college campuses across the county in 2015, assessing 114 veterans and helping 61 stay in education or training. A newly created emergency fund provided up to \$300 for veteran student needs for books, transportation, housing or campus fees. Levy funding leveraged \$260,675 from federal, local and state sources, more than doubling the program's levy budget.

I The Vulnerability Index-Service Prioritization Decision Assistance Tool (VI-SPDAT) is an evidence-informed tool used nationwide to help determine who is eligible for and in greatest need of housing and support, and the best option to help them.

ACTIVITY 1.4

Post-Traumatic Stress Disorder (PTSD) / Military Sexual Trauma (MST) Treatment

In 2015, the PTSD program provided confidential counseling services free of charge to 250 veterans with war readjustment and PTSD treatment needs, and their family members. Ninety-three percent reported their life had improved since starting services. The program also offered continuing education for direct service providers, and for college and university counseling staff serving veterans. In addition, 169 service providers completed one of 13 trainings to increase their understanding of MST and awareness of referral resources. After the training, 47 percent said they had referred an MST survivor to benefits.

ACTIVITY 1.5

Veterans Justice

The levy provided funding for three programs for veterans involved with the justice system.

Veterans Incarcerated Program (VIP). In 2015, the program screened 328 veterans who were incarcerated and provided short-term re-entry case management² to 242 who were incarcerated or at risk of incarceration. Seventy percent of the veterans the program referred to treatment or educational programs followed through with those services. The program's housing referrals were 79 percent successful. Thanks to a County Council action in early 2015, the program was able to begin working with veterans earlier in their incarceration.

Veterans Legal Assistance Program. The program served 201 new veterans in King County and resolved 108 cases. Through its partnership with the VA and a new partnership with King County Regional Justice Detention Center, the program provided free legal services to veterans at a VA clinic and at the jail.

Emerging programs for justice-involved veterans.

Of 86 justice-involved veterans whom the levy-funded Veterans Court Clinician screened in 2015, 65 opted into the program, almost double the number opting into the program in 2014. The program helped 62 veterans access services from the VA and other providers. A total of 30 "graduated" from the Seattle Veterans Treatment Court or King County District Court Regional Veterans Court, meaning they had participated in behavioral health treatment and had no new law violations over the roughly two years they were in the court.

Highly recommend this program for turning negative circumstances into positive outcomes.

– Veterans Treatment Court participant

ACTIVITY 1.6

Support for Military Families

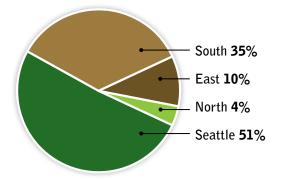

Recognizing the sacrifices made by families and their importance, the levy supported two programs that helped military and veteran families stabilize their lives. These families are often overlooked by traditional veterans' services.

Military family outreach. In 2015, the program conducted outreach to homeless military families in shelters and to follow up on Call Center requests (see 1.2, above), and conducted 170 assessments using the VI-SPDAT. Case management was key to helping 166 families find emergency, transitional, permanent supportive or market rate housing.

Military family counseling. The program enabled 51 family members and caregivers of veterans to be seen by a mental health provider at no cost, whether or not the veteran was receiving services. This connection was especially important for families of a veteran with PTSD, who can experience a secondary form of that trauma. Ninety-four percent of those served reported an improved quality of life.

² VIP used a best practice for transition of people with co-occurring disorders in the criminal justice system called the APIC Model (for the steps: Assess, Plan, Identify, Coordinate), along with Motivational Interviewing, an evidence-based practice.

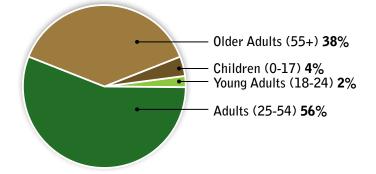

Location of King County Residents Served by Strategy 1

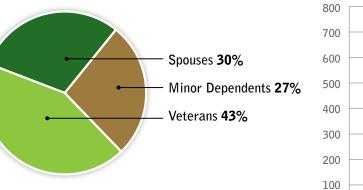

Veterans and families served by Strategy 1 lived throughout the county, with the largest proportion in Seattle and South King County.

PTSD Clients Served

Age of Veterans and Families Served

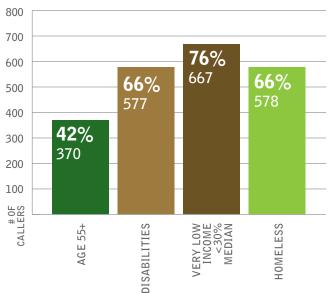

More than half of those served by Strategy 1 were age 25 to 54; more than a third were 55 or older.

The PTSD / MST program (Activity 1.4) served more veteran family members than veterans.

Selected Characteristics of Callers to Veterans Call Center

Three-quarters of callers to the Veterans Call Center (Activity 1.2) had very low incomes.

Ending Homelessness through Outreach, Prevention, Permanent Supportive Housing and Employment

Phone Call Leads Single Mom to Stable Home

The solution to a big problem often starts with a simple act—in this case, picking up the phone. Lucy was a single mother with one child. She was homeless. She had a job, but with low pay, so had taken out payday loans to fill gaps in her budget. When she got a Section 8 voucher, she thought her troubles were over since the voucher would cover rent and utilities above 30 percent of her income. However, when her prospective landlord learned of Lucy's low credit score, he required a higher-than-normal deposit. Lucy

could not pay it and did not want to increase her loans or fall behind on payments.

Then things got worse: Lucy's hours were cut back at work. She was desperate. Lucy heard that the 2-1-1 Community Information Line could steer people in need to local services, so she called. The levy-funded 2-1-1 Line's staff referred Lucy to the Housing Stability Program, a levy-funded program that helps low-income King County residents get into or keep their housing.

The Housing Stability staff assessed Lucy's needs and explained how they could help. She found an apartment she could afford in Redmond. This time, Lucy was able to get the apartment because the Housing Stability Program paid all her move-in fees.

Lucy's call and one-time help from a levy program worked. She has been able to keep up with her payday loan payments *and* her rent. Lucy is thrilled to have a stable home for her child and is working to make their lives better day by day.

ENDING HOMELESSNESS THROUGH OUTREACH, PREVENTION, PERMANENT SUPPORTIVE HOUSING AND EMPLOYMENT

Homelessness remains a challenge in our county. The 2015 King County One-Night Count found 3,772 people without homes or shelter in our communities. In 2015, levy Strategy 2 continued to focus on making homelessness rare, brief and one-time, and served 8,384 homeless people, over 800 more than in 2014. Of those served in 2015, 1,279 were veterans or their family members.

ACTIVITY 2.1

Outreach and engagement

Many who struggle with homelessness also face health problems and substance abuse, too often relying on expensive emergency services instead of available community services. Levy funds helped four programs reach homeless individuals, gain their trust, and connect them with meals and health care.

Homeless street outreach. The REACH program³ served 634 homeless people in 2015, of whom 63 moved into or kept stable housing—fewer than anticipated because of the limited availability of appropriate housing. Outreach nurses provided medical services for 523 homeless individuals and connected them to other services. REACH also launched "Lunch and Learn," where up to 12 people gathered weekly to enjoy a family-style meal with peers and discuss such topics as coping with stress.

Dutch Shisler Sobering Center and Emergency

Service Patrol (ESP). The ESP continued to patrol downtown Seattle streets for individuals with chronic substance use disorders and to transport them to the Dutch Shisler Sobering Center or other providers. In 2015, ESP served 7,811 persons and transported 5,508 to the Sobering Center. The Sobering Center served as an entry point for other health, housing and recovery support services.

Mobile medical outreach. The mobile medical van brought a health care team to meal sites and other programs for the homeless, serving 837 individuals in 2015. Of 478 who needed mental health treatment, 24 percent went to at least one mental health provider

3 REACH used several best-practice models and clinical strategies: Recovery-Oriented Care, Motivational Interviewing, Harm Reduction, Stages of Change, Trauma-Informed Care, and Integrated Treatment. visit. Staff also helped 59 enroll for medical benefits. The program added a chemical dependency clinician to the van's team and doubled the number of dental clinics per month. Levy funding leveraged more than \$600,000 in other revenue, a 200 percent increase in the budget.

Levy funding leveraged more than **\$600,000** from other sources for Mobile Medical Outreach.

South King County homeless outreach (PATH). In

2015, the outreach team engaged and assessed the needs of 142 long-term homeless individuals, 66 percent of whom accessed community services, resources and housing as a result. Local jurisdictions and county staff often called on PATH staff for outreach in encampments and problem situations. Levy funds helped leverage \$170,000 in other funding—a 200 percent increase in PATH's levy budget.

ACTIVITY 2.2

Capital funds for permanent housing

In 2015, the levy funded creation of 168 units of low-income housing. Each levy dollar leveraged nearly \$17 of other public and private funding. August Wilson Place in Bellevue was completed, with 45 levy-funded units, including three for veterans. Construction began on two buildings that will provide 74 units for lowincome and homeless adults.

ACTIVITY 2.3

Housing Stability Program

In 2015, the Housing Stability Program helped 511 households made up of 1,273 individuals to maintain or secure housing. Of the households, 139 included veterans. The program provided one-time emergency assistance for housing costs, and helped clients create a budget and action plan to stabilize their housing.

ACTIVITY 2.4

Support services for permanent housing

Offering supportive services for chronically homeless people who enter housing helped them manage their health issues and achieve a more stable life. The levy supported two programs providing these services.

Housing Health Outreach Team (HHOT). In 2015, HHOT served 927 individuals, 100 more than in 2014, with 98 percent maintaining their housing for at least one year. HHOT reduced emergency system use by linking 392 individuals to primary care and helping 620 improve self-management of chronic health conditions.

On-site support services. The levy provided supportive services⁴ in 2015 for 1,007 formerly homeless households now housed in 782 units at 14 housing sites. Of the units, 146 were dedicated to housing veterans. Eighty-four percent maintained their housing for at least one year. A total of 104 also gained at least part-time employment.

ACTIVITY 2.5

Criminal justice initiatives

The levy supported two initiatives that located supportive housing for homeless individuals who had a mental illness and were involved in the criminal justice system.

Forensic Assertive Community Treatment (**FACT**) **program.**⁵ In 2015, the program served 63 individuals referred from Regional Mental Health Court, including 13 new participants, to help them find housing and begin to stabilize their lives. Four participants graduated to a lesser level of care, and 18 others exited the program. Of those housed, 72 percent were able to retain it or move to other permanent housing.

*Forensic Intensive Supportive Housing (FISH) program.*⁶ The program served 69 homeless individuals referred by the Mental Health Court in 2015, including three new participants; 16 individuals exited, and one graduated. The program connected them to housing and provided supportive services. Eighty-one percent of those housed retained or moved to other permanent housing.

ACTIVITY 2.6

Employment and training

\$13/hr.

The levy supported three programs to help veterans, homeless and low-income residents move toward selfsufficiency.

> Community Employment Services clients found jobs averaging \$13/hr.

Community employment services. The program enrolled and served 382 homeless individuals in 2015, of whom 24 percent were veterans. A total of 219 found jobs, increasing their household income by roughly 180 percent. The average starting wage was \$13 per hour.

Career Connections. The program served 260 homeless individuals in 2015, of whom 69 were veterans. Participants received assessments of their skills and barriers to employment, and created an action plan. A total of 151 completed training or job readiness milestones, and 90 obtained jobs.

King County Veterans Internship/Fellowship

Program. The program received nearly 300 applications for 16 six-month positions, which began in late 2015. The program expanded to provide higher-paying fellowships, along with internships that offered substantive and hands-on experiences in a variety of fields.

ACTIVITY 2.7

Youth/Young Adult Homelessness Plan

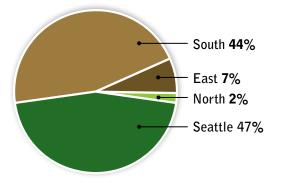

The Clear Path to Employment program served 115 homeless young adults in 2015 through job readiness and search assistance, internships, case management and connections to housing services. A total of 85 completed internships or were involved in preemployment training, and 38 found jobs.

⁴ The program used the Housing First and Harm Reduction best practice approaches.

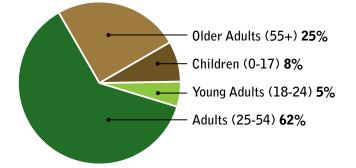

⁵ FACT used the Assertive Community Treatment (ACT) evidencebased model.

⁶ FISH used evidence-based Integrated Dual Disorder Treatment (IDDT); however not all participants functioned at a high enough level to apply IDDT.

Location of King County Residents Served by Strategy 2

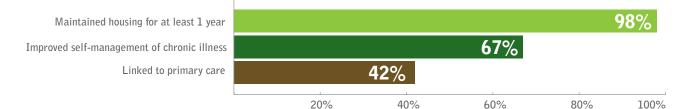

Age of People Served by Strategy 2

More than half of those served by Strategy 2 were adults age 25 to 54; a quarter were 55 or older.

Close to equal proportions of residents served by Strategy 2 lived in South King County and Seattle.

Housing Health Outreach Team Client Successes, 2015

Individuals served for a year by HHOT (Activity 2.4) stabilized their lives.

Improving Health through the Integration of Medical and Behavioral Health Services

Vet Gets Help Climbing Out of Depression "Black Hole"

How do you get out of a "black hole" of depression, family discord, and financial hardship? For Jaime, a 36-year-old Army vet who saw combat during Operation Iraqi Freedom (OIF), climbing out started with a referral to counseling at his medical clinic.

Jaime lived in South King County with his wife and 5-year-old daughter. Though he had a B.A. in technology management, he had been unable to find work. Unemployment caused stress and marital conflict. His daughter started to act out. These pressures added to the depression, anxiety, and recurrent suicidal and homicidal thoughts Jaime had struggled with for years. He was selfmedicating with alcohol and marijuana.

Jamie's primary care provider at HealthPoint referred him to the coordinator of their levy-funded behavioral health integration program. Jaime and his wife each received supportive counseling. The Care Coordinator referred Jaime to the King County Veterans Program (KCVP) for job search and emergency financial help. KCVP helped him pay past due bills, assessed his job skills, and gave him a letter of reference.

With more confidence, Jaime went on interviews, and—success!—landed a high-paying job. Now he checks in by phone with the Care Coordinator, has stopped drinking, and is working to quit marijuana. He and his wife are communicating better, and their daughter is happier. Jaime is now emerging into the light and fresh air of a good life.

IMPROVING HEALTH THROUGH THE INTEGRATION OF MEDICAL AND BEHAVIORAL HEALTH SERVICES

Strategy 3 supports the levy goal to reduce unnecessary use of the emergency medical system, and includes both direct services and systems improvements. With integrated primary care and behavioral health services, individuals can become more stable in their communities. In 2015, the activities served a total of 6,642 people, including 726 veterans and their family members.

ACTIVITY 3.1

Behavioral health integration

Integrating behavioral health care into primary care clinics⁷ reaches people who might not seek mental health services and reduces the stigma of using these services. A 2008 study estimated a net savings from integration of roughly \$1,300 per program participant per year.⁸ The levy funded integration programs for low-income adults and for veterans and family members.

Behavioral health integration. In 2015, screenings of 1,818 low-income adults during primary care appointments identified 1,322 with depression, anxiety and/or substance abuse. Of these, 56 percent received at least two visits with a mental health provider in the primary care setting. In follow-up screenings, nearly half showed improvement in their depression or anxiety symptoms.

Behavioral health integration for veterans.

In 2015, 672 veterans and family members were screened for depression, anxiety and/or substance abuse in a primary care clinic. Of 225 identified with behavioral health needs, 164 had at least two visits with a provider. In follow-up screenings, 48 percent showed improvement. Care coordinators received training on veteran culture and the services available in King County.

48%

Forty-eight percent of veterans attending behavioral health visits showed reduced depression, anxiety and/or substance abuse.

7 Integrating mental health services with primary care community clinics is an evidence-based approach called IMPACT Model or collaborative stepped care.

8 Cited in J. Unützer, H. Harbin, M. Schoenbaum, and B. Druss, *The Collaborative Care Model: An Approach for Integrating Physical and Mental Health Care in Medicaid Health Homes* (Washington, DC: Centers for Medicare & Medicaid Services) 2013, p. 6.

ACTIVITY 3.2

Veteran and trauma competency training

In 2015, this program held 64 workshops on veterans' issues and trauma-informed care, which trained 1,085 treatment professionals and 1,455 service providers and employers. Twenty of the workshops were customized for 13 local employers and agencies. As a result, 79 percent of trainees said they were better able to identify trauma-related issues, and 85 percent to refer veterans for services.

ACTIVITY 3.3

Health care reform system design and implementation

In 2015, this activity supported efforts to enroll low-income individuals in health insurance, and to expand partnerships among health, housing and social services to move from a crisis focus to a wellness and prevention focus. A 2015 report⁹ on the results from the first two years of health care reform found that the percentage of uninsured King County adults dropped from 16 percent to 10 percent.

ACTIVITY 3.4

Depression intervention for seniors

In 2015, the Program to Encourage Active, Rewarding Lives (PEARLS)¹⁰ provided in-home counseling to 109 older veterans and spouses of veterans who had disabilities and were experiencing minor depression. Ninety-six percent showed decreased depression symptoms after participating. The program expanded outreach in 2015 to community sites, such as libraries and grocery stores.

- 9 Public Health Seattle & King County, "Access to Health Care After the Affordable Care Act," July 2015.
- 10 PEARLS is an evidence-based program to reduce depression and improve quality of life in older adults living in the community.

ACTIVITY 3.5

Facilitation of ongoing partnerships

This activity helped support the work of the Regional Veterans Initiative, which focused in 2015 on reducing homelessness among veterans. A total of 1,045 homeless veterans were identified and assessed, and 845 entered permanent housing.

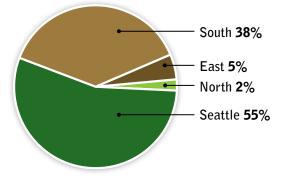

This activity also supported integrating physical and behavioral health as part of the King County Health and Human Services Transformation Plan and state integration requirements. It helped the Integration Design Committee, a multi-sector community-based partnership, design a regional model that will lead to better health and improved outcomes for those receiving these services.

ACTIVITY 3.6

Client care coordination

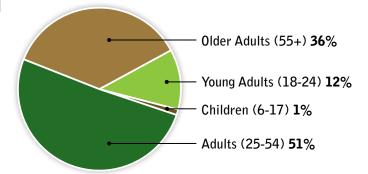

In 2015, the program identified 1,503 individuals, including 458 veterans, as being high users of emergency services, highly vulnerable if remaining on the street, and, therefore, at the top of the list for housing referrals. The program screened 407 individuals referred by service providers, and identified 203 who met the criteria for housing. A total of 94 individuals, 30 of whom were veterans, moved into permanent supportive housing in 2015. Housing placements resulted in almost \$615,000 in reduced use of emergency services.

Location of King County Residents Served by Strategy 3

Most of the residents served by Strategy 3 lived in Seattle or South King County.

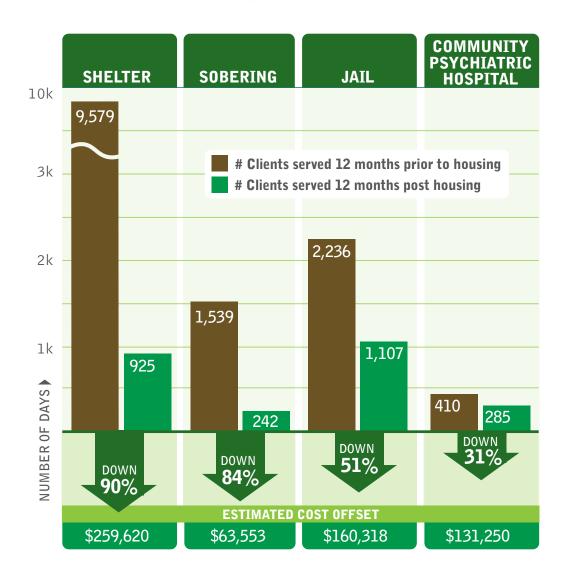

Ages of People Served by Strategy 3

While Strategy 3 served mainly adults age 25 or older, it also served a sizable percentage of young adults.

Having a Home Makes a Difference

The Client Care Coordination data tells the story.

Housing programs supported by the levy helped vulnerable individuals reduce their use of costly emergency services.

STRATEGY 4

Strengthening Families at Risk

Mother and Facilitator Persist to Find a Solution

Persistence is an important trait, as a parent and a Kaleidoscope Play & Learn staff facilitator found. Silvia brought her threeyear-old daughter, Lety, to one of the 98 Play & Learn groups receiving levy funding. This group was offered in Spanish by the Center for Human Services at its Shoreline Family Center. After several weeks, Silvia took the facilitator aside and confided her worry that Lety was not speaking enough for her age. Silvia spoke Spanish with Lety, but Lety also spent a few days a week with her paternal, Cantonese-speaking grandmother. Could the different languages be causing a problem?

The facilitator explained that while her own children did fine in a bilingual home, an early intervention program could assess Lety's development. She helped Silvia make an appointment. The early intervention therapist conducted part of the assessment at the Play & Learn group, using an interpreter. With Silvia's permission, the facilitator shared with the therapist what she had observed of Lety's speech and behaviors over time.

The therapist found that Lety did have a language delay, though not related to her multilingual upbringing, and recommended Shoreline Schools' developmental preschool. Silvia enrolled Lety at the preschool. Silvia and Lety are also continuing at Play & Learn, and enjoy its supportive community. Silvia has high praise for Play & Learn, and thanks the day she and the facilitator decided to take extra steps to make sure Lety got the help she needed.

STRENGTHENING FAMILIES AT RISK

Strategy 4 focused on prevention and early intervention to help families and individuals avoid or reduce crises and build strong lives. In 2015, Strategy 4 helped 16,673 county residents, of whom 161 were veterans. Levy programs served young parents, people returning to the community after prison, and people seeking services of all kinds.

ACTIVITY 4.1

Home visiting

The levy provided funds to two evidence-based programs to help low-income, first-time parents in pregnancy or with very young children to stabilize their lives and support their child's healthy development in the crucial first few years of life.

*Nurse Family Partnership (NFP).*¹¹ In 2015, the levy supported NFP services for 100 of the program's 1,305 low-income, first-time parents from pregnancy to age 2 of the child. Two-thirds were living in South King County, with the majority "couch surfing" with friends or relatives. Fourteen parents gained employment or an education credential.

*Healthy Start.*¹² In 2015 the program provided home visits to 369 young, first-time, mostly low-income parents making up 150 families in East and North King County. Ninety-seven percent increased their parenting skills or delayed a subsequent birth, allowing time for the family to become more stable. Levy support helped leverage funding from several cities and foundations.

ACTIVITY 4.2

Maternal depression reduction

In 2015, 2,090 pregnant and parenting mothers received screening at their primary care clinic for depression, anxiety and substance abuse. Of 843 who showed symptoms, 628 had at least two visits with a mental health provider at the clinic, with 69 percent showing improvement as a result. Building the mothers' self-care skills and helping them connect with support systems were important factors in their success.

ACTIVITY 4.3

Parent education and support

The levy supported two programs that helped parents learn how to promote their child's healthy development and learning.

The mom says she has a better understanding now of her own as well as her child's needs.

– PFR trainee

Promoting First Relationships (PFR) Train the Learner Program.¹³ In 2015, 14 staff from seven different social service agencies completed PFR training, and three trained as Agency Trainers. After a two-day workshop and a video-discussion series, trainees used PFR for 10 weeks to help a family support their child's social/emotional development and increase their parenting skills.

*Family, Friend and Neighbor Play & Learn Groups.*¹⁴ In 2015, there were 98 Play & Learn groups that served a total of 4,046 families. Forty-five new facilitators were trained. The groups with the most growth met in libraries and schools, or offered multiple languages. Eighty percent of participating parents and caregivers said they read or told stories to their child more often because of what they had learned. Levy funding leveraged additional funding from school districts.

- 11 NFP is an evidence-based program to improve birth outcomes, reduce child abuse and neglect, improve school readiness, and increase family self-sufficiency.
- 12 Healthy Start is an accredited affiliate of Parents as Teachers (PAT), an evidence-based program to prevent child abuse and neglect, promote health, and increase parental involvement.
- 13 PFR is an evidence-based program to promote healthy child/ caregiver relationships.
- 14 The Kaleidoscope Play & Learn program has received Promising Practice status from the University of Washington's Evidence Based Practices Institute.

ACTIVITY 4.4

Passage Point

In 2015, the program helped 62 households to transition from prison to stability and, where possible, to reunite with their children. The program provided employment support and family therapy onsite, and transportation to offsite appointments. Twelve households graduated to permanent housing; one moved into transitional housing.

ACTIVITY 4.5

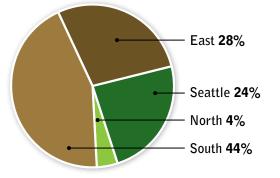

Information and Referral

The levy supported two programs that helped residents find local services they needed.

2-1-1 Community Information Line. In 2015, the program responded to 99,112 calls and made referrals to community services, most often related to housing. More than 1,300 calls were conducted in Spanish by a bilingual staff member, and more than 2,200 other calls were handled in more than 50 other languages by an interpreter service. In 2015, King County 2-1-1 was chosen as a central access point for those age 60 or older, approximately 15 percent of callers.

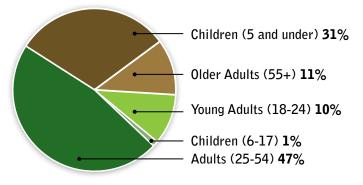

Cultural Navigator. In 2015, the program's three service sites in Kent, Bellevue and Redmond helped 1,904 individuals from 778 primarily immigrant, refugee and low-income households to access local resources to maintain their self-sufficiency. Navigators provided services in Chinese, Spanish, Russian and Southeast Indian languages. The program also provided technical assistance to 258 agencies. Levy funding leveraged more than \$96,000 from three Eastside cities, doubling the program's levy budget and increasing program capacity.

Location of King County Residents Served by Strategy 4

The largest percentage of those served by Strategy 4 lived in South King County, with nearly equal percentages in East King and Seattle.

Ages of People Served by Strategy 4

Children accounted for almost a third of those served by Strategy 4.

2015 Performance and Evaluation Report

The 2012–2017 levy Service Improvement Plan identified outcome and output targets for each levy activity. Activity managers reported twice a year on their progress.

PERFORMANCE MEASUREMENT AND EVALUATION ACTIVITIES IN 2015

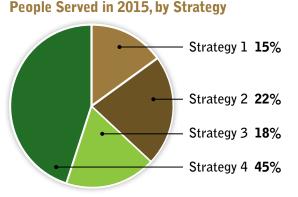

- Worked closely with contractors and program managers to develop targets and analyze performance.
- ► Updated the 2012–2017 Levy Evaluation Framework for 2015.
- Prepared the 2015 Mid-Year Performance Update. As needed, developed corrective action plans with project directors.
- Played a key role in developing regional indicators and performance dashboards for housing, employment and education, and veterans' programs.
- Analyzed year-end data and reports for the nearly 40 levy activities.
- Updated the Communities Count indicators related to housing, food, income, early childhood and equity.

LEVY BY THE NUMBERS

The next four pages offer a look back at key levy accomplishments since 2007.

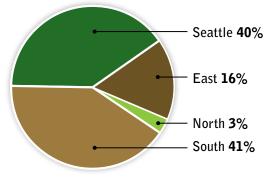

2015 PERFORMANCE REPORT

The 2015 Performance Management Report (pp. 24–27) is organized by the four levy strategies and shows each activity's results compared to its targets. All but five of the activities achieved at least 85 percent of their targets. Recognizing the levy's stewardship of public resources, this year's performance report includes a column on effectiveness—what difference the activity made in the lives of those served.

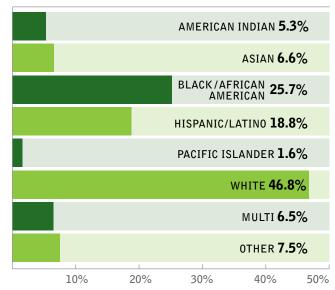

Strategy 4 served the most people in 2015.

Location of People Served in 2015

The levy served people across King County.

Percent Served in 2015 by Race/Ethnicity

The largest racial/ethnic groups of those served in 2015 were white, black/African American and Hispanic/Latino.

after clients were linked
to services

In 2005, King County voters approved a property tax measure creating regional health and human services funds to assist veterans and their families and others in need. In 2011, voters then renewed the levy through 2017. The tax of 5 cents per \$1,000 of assessed property value generates about \$18 million annually and supports a broad array of services.

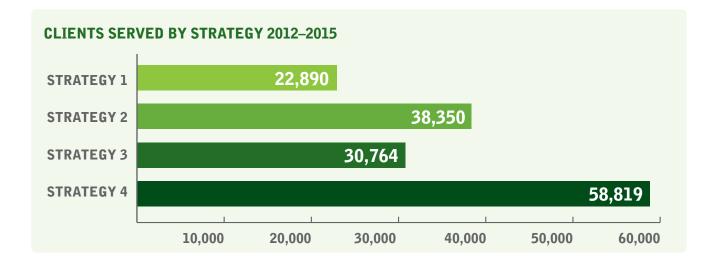

Guided by a Service Improvement Plan and with oversight from two citizen boards, the levy's revenues are divided equally between services for veterans and their families, and services for others in need. Services are aligned to help achieve the three primary goals of the levy, which are:

- Prevent and reduce homelessness
- · Reduce unnecessary criminal justice and emergency medical system involvement
- Increase self-sufficiency of veterans and vulnerable populations.

The 40 activities funded to help meet these goals are grouped into four overarching strategies:

STRATEGY 1: SUPPORTING VETERANS **STRATEGY 2**: ENDING HOMELESSNESS

STRATEGY 3: IMPROVING HEALTH **STRATEGY 4:** STRENGTHENING FAMILIES

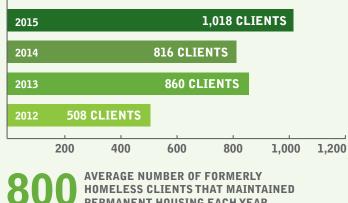

GOAL 1: PREVENT AND REDUCE HOMELESSNESS

The Veterans and Human Services Levy has supported efforts to end homelessness in King County since 2006. Many of these efforts share a common objective: maintaining clients in housing, or moving or "exiting" people to other permanent housing.

Each year since 2012, the levy has helped almost 88 percent of clients in levy-funded housing programs either maintain their housing or enter permanent housing.

CLIENTS IN LEVY FUNDED HOUSING PROGRAMS MAINTAIN OR EXIT TO PERMANENT HOUSING

PERMANENT HOUSING EACH YEAR

About 40 percent of the levy's annual revenue is dedicated to preventing and reducing homelessness through outreach, prevention, and permanent

supportive housing and employment activities. Fifteen of the levy's activities support this goal.

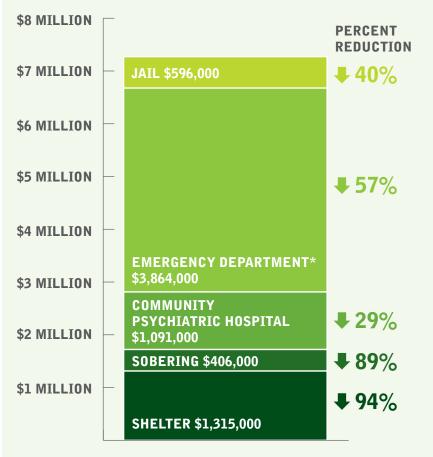

Every year since 2006, the levy has awarded funds to developers of low-income housing to increase the availability of housing in King County. Levy support helped steadily increase the number of units.

GOAL 2: REDUCE UNNECESSARY CRIMINAL JUSTICE AND EMERGENCY MEDICAL INVOLVEMENT

The levy's second goal focuses on reducing emergency medical and criminal justice involvement by stabilizing homeless individuals, particularly those with disabling conditions, in housing with supportive services.

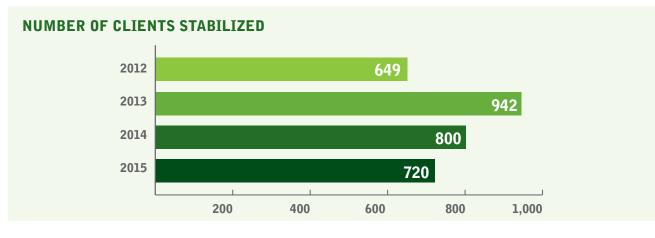

Since 2012 an average of 780 clients were stabilized in programs each year reducing their emergency medical and criminal justice involvement.

REDUCED USE OF SERVICES AND COST OFFSETS 2012-2015

One levy-funded activity, Client Care Coordination (CCC), maintained a database of homeless individuals who were high users of public services and tracked their use of these services one year before and one year after they were housed. The clients' use of services declined after they were placed in housing. The CCC calculated the cost offsets associated with this decline and found that since 2012, estimated cost offsets were over \$7 million.

*Emergency Department data is not available for 2015.

GOAL 3: INCREASE SELF-SUFFICIENCY OF VETERANS AND VULNERABLE POPULATIONS

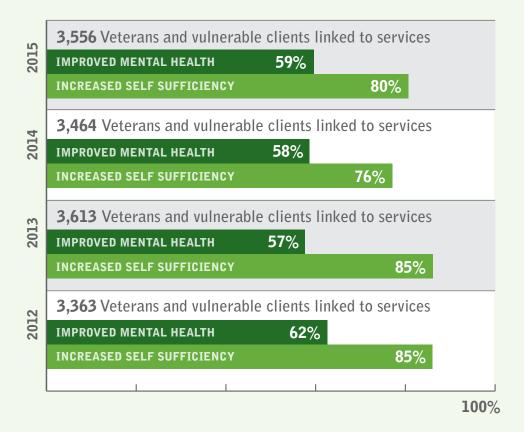

The levy supports an array of programs designed to assist individuals to become more stable and self-sufficient in their communities. Eight levy-funded outreach programs identify and link vulnerable individuals to services, helping over 3,000 veterans and other vulnerable individuals find the help they need each year.

Five levy-supported mental health programs such as Post-traumatic Stress Disorder (PTSD) counseling, the Mental Health Integration Program embedded in community health clinics and

Since 2013, 86 percent of individuals engaged were successfully linked to services. in-home treatment of mild depression in older adults, have been successful in improving clients' lives. The same is true of the King County Veterans Program's intensive case management service that regularly assesses veterans' progress in meeting personal goals and their movement toward self-sufficiency.

LEVY IMPACT ON CLIENTS' LIVES, BY YEAR

Every year since 2012, levy services have improved the lives of veterans, their families and others in need.
