APPENDIX A. Survey Methodology

The customer survey was administered to vehicles entering 9 public waste facilities in King County between February and December 2006. Copies of the data collection forms are included in Appendix D.

Sampling Plan

Each transfer station was surveyed once per quarter except for Vashon, Skykomish and Cedar Falls. Vashon and the two drop boxes were surveyed only once every 6 months due to their low traffic volume. A process was designed and implemented to ensure a random distribution of survey days.

To create an unbiased and representative survey schedule, facilities were assigned to specific dates using a random process. First, facilities were randomly assigned to a month during the first quarter of the study. Additional survey days for each transfer stations were then scheduled every three months; surveying at drop boxes and at the Vashon Transfer Station was scheduled six months out from the first month. A survey start date for each month was randomly selected, eliminating holidays or other events (such as construction) that would impact the normal traffic patterns at facilities scheduled for surveying. Generally survey days were scheduled to occur on consecutive days each month.

Table A-1. Customer Survey ScheduleFebruary – December 2006

Conducting Customer Surveys

With the exception of Vashon, Enumclaw, Cedar Falls, and Skykomish, two surveyors were assigned to each survey day¹. The first surveyor administered the questionnaire to vehicles entering the facility, and the second surveyor (if needed) recorded the vehicle's ticket number as it exited.

To link the vehicle's ticket number to the survey information, the first surveyor placed a uniquely numbered identification card on the vehicle's dashboard and recorded the ID number on the questionnaire. The second surveyor obtained this card as the vehicle exited the facility and recorded the net weight on the back of the card. An example of the numbered card is available in Appendix D.

The surveyors administered the questionnaire to every vehicle entering the facility during their shift, except in rare instances when the traffic became so congested that the surveyor needed to wave some of the vehicles past to avoid further delays.

Before the surveying took place, all surveyors attended a training session at the Factoria transfer station. As part of the training they conducted mock interviews using the customer survey field form (see Appendix D for a copy).

The protocol used by the surveyors is described in more detail below.

Information Collected on the Survey Form

As the Vehicle Approached

- 1. The surveyor determined whether the approaching vehicle was a commercial garbage truck or a self-hauler. Surveyors were provided with a list of all companies licensed to haul municipal solid waste; please see the coding sheet in Appendix D.
- 2. The surveyor recorded the vehicle type, according to the nine categories listed below:
 - 1. Rear packer
 - 2. Front packer
 - 3. Side packer
 - 4. Drop box, loose
 - 5. Drop box, compacted
 - 6. Pick-up, van, sport-utility vehicle
 - 7. Large other (large truck, flatbed truck)
 - 8. Car
 - 9. Semi truck
- 3. The surveyor noted whether the vehicle was pulling a trailer.

¹ With less traffic flow at these four facilities, one surveyor was able to interview incoming drivers and obtain ticket numbers from exiting vehicles without the help of another person.

- 4. The surveyor let the driver know that the King County Solid Waste Division was conducting a customer survey. The surveyor placed a numbered card on the windshield and explained that the card keeps the driver anonymous, and would be collected when the driver left the facility.
- 5. The surveyor first asked the driver from which city the load originated. The surveyor was given a list of King County cities and other areas. If the driver's response was not on the list, the surveyor asked whether the location was a rural area within King County or a city outside King County. If waste came from multiple areas in the County, "all over King County" was recorded.
- 6. The surveyor asked the driver to describe the type of waste brought to the facility, according to the four categories below:
 - Yard waste
 - Construction or demolition debris
 - Special waste (petroleum-contaminated soil, sludge, or asbestos)
 - Household hazardous waste
 - Mixed garbage
- 7. If the waste type was yard waste or construction/demolition waste, the surveyor asked if the driver was a contractor/builder or a landscaper, respectively.
- 8. From the following list, the drivers were asked to pick the category that best described the source of their load:
 - Single-family
 - Multi-family
 - Both single-family and multi-family (mixed residential)
 - Residential and nonresidential
 - Nonresidential (business)
- 9. In addition to the questions listed above, self-haulers were also asked the following questions:
 - How often does the driver visit any transfer station? The surveyor recorded the number of visits per day, week, month, or year (or ever).
 - What is the ZIP code corresponding to the area this waste is from?
 - In the future, would the driver be willing to recycle wood, metals, and/or yard waste into separate containers, if the driver could save money. The savings corresponded with either tons (for bigger vehicles) or loads (for smaller vehicles). The surveyor then gave the driver the 1st option. If the driver said yes then they would circle the option, but if they said no then the surveyor would continue to the 2nd option and so on. The following 5 options, in order are:
 - 1. If you could save \$10/ton or \$2/load? YES/NO (If NO, continue, if YES, skip to the next Question)
 - 2. If you could save \$25/ton or \$4/load? YES/NO (If NO, continue, if YES, skip to the next Question)

- 3. If you could save \$50/ton or \$8/load? YES/NO (If NO, continue, if YES, skip to the next Question)
- 4. The materials were free to recycle? YES/NO (If NO, circle Option #5, if YES, skip to the next question)
- 5. Will not separate.
- Does the driver subscribe to curbside garbage collection? (This question was not asked if the driver was a contractor/builder or a landscaper.)
- Why is the driver self-hauling waste today? (This question was not asked if the driver was a contractor/builder or a landscaper.)

As the Vehicle Exited the Facility

When departing the facility, the vehicle was stopped a second time. The surveyor requested to see the customer's receipt, and then recorded the net weight from the receipt on the numbered card.

APPENDIX B. Detailed Customer Survey Results

Chapter 3 of the report presented customer survey results for analyzed survey components but excluded *detailed* customer survey tables. This appendix presents the following tables:

- Observed Vehicle Types, by Collection Type and Facility
- Reported Waste Types, by Collection Type and Facility
- Reported Self-hauled Contractors and Landscapers, by Facility and Generator Type
- Reported Reasons for Self-hauling Waste from Residential Generators
- Reported Reasons for Self-hauling Waste from Nonresidential Generators, by Facility
- Willingness to Recycle Wood, Metal, Yard Debris, by Facility

QUALITY CONTROL PLAN: CUSTOMER SURVEYS

Throughout the 2006 King County Waste Monitoring Customer Survey Study, the execution of the following quality control plan helped ensure quality and consistency during fieldwork, data entry, and reporting. The following steps were taken to prevent errors, and ensure quality:

Train Crews

Cascadia trained all surveyors on-site at a waste facility. The training consisted of a review of the survey form and possible responses, and it included a practice session in which surveyors administered the questionnaire to customers. A debriefing of the training occurred immediately following the practice surveys to discuss any issues that arose.

To promote consistency, a small team of regular surveyors conducted the questionnaire throughout the project. Cascadia trained any additional surveyors on-site, using the same process.

Administering the Surveys

Each surveyor received a packet of materials, including photos of various vehicle types, a list of all commercial haulers within King County, and a brief methodology explaining how to collect the information in the survey. The brief methodology included a verbatim script for each question.

The packet of materials also included a list of all cities in King County. If the respondent's waste was from a city or neighborhood not on the list, the surveyor would clarify whether the location was within incorporated King County, in unincorporated King County, outside King County, or from throughout King County. These steps reduced the number of misspelled or unknown cities of origin.

The survey crew posted a "Survey in Progress" sign in front of the gatehouse to alert drivers to the survey. Surveyors also wore hard hats and safety vests for their protection and to ensure that vehicles recognized them and stopped to answer the questionnaire.

Verify the Accuracy of the Surveys Collected

During the surveyor's first day, the survey task manager was on-site to check the survey process and ensure that the recorded information was complete and accurate. Cascadia dedicated a cell phone for the surveyor to call the task manager if any issues arose after the training and field check.

After each monthly survey period, the task manager reviewed the data to ensure accuracy, completeness, and legibility before data entry. Inaccurate, incomplete, or illegible records were discarded.

Enter Survey Data

A designated Cascadia staff member or agent entered the survey data into the database using electronic data-entry forms. To increase accuracy, the data-entry forms included validation rules that prevented "out of range" values. For example, the database would only allow the numbers 1 through 9 to be entered as the vehicle type, since only this range corresponded to specific vehicle types on the survey form.

Other validation rules prevented extraneous information. For example, surveyors asked only self-haul drivers how often they visited the transfer station, if they subscribed to garbage service, and why they were self-hauling their load. These fields only appeared on the data-entry form if staff entered "self-haul" as the collection type.

Customer Surveys At Transfer Stations

The King County Solid Waste Division is surveying customers at transfer stations in King County to update information about the type of waste disposed in the County and where it comes from. The surveys will take place between January 2006 and December 2006.

Why does the County conduct these surveys?

The County wants to obtain information on how people use its transfer stations. This information helps the County anticipate the needs of its customers so it can provide appropriate services.

Why was I selected for the survey?

We are surveying every customer who visits this transfer station today. By doing so, we will be able to make sure we obtain data that will allow us to draw meaningful conclusions about the use of our transfer stations.

-over-

Figure D-9. Survey Fact Sheet (back)

Who is administering the survey?

Staff from Cascadia Consulting Group, on behalf of King County.

How do I get more information?

Call Alexandra Thompson, King County Solid Waste Division, (206) 296-8454. She is the County's program manager for the customer survey.

Thank you for participating in today's survey.

This material will be provided in alternate formats upon request.

King County Waste Monitoring Program

Customer Survey Instructions

AS THE VEHICLE APPROACHES:

- Select a **<u>numbered card</u>**; record the number.
- Decide whether the vehicle is a commercial hauler or self-hauler (review the attached list of garbage companies) and record the <u>collection type.</u>
- Observe and record the <u>vehicle type</u> (from the list on the survey form; ask driver if you are uncertain).
- Observe and record whether they are pulling a <u>trailer</u> ("X" if yes).

STOP THE VEHICLE, THEN BEGIN QUESTIONS:

ALL DRIVERS:

- Introduction: "Hello, King County is conducting a customer survey today."
- Hand the driver the numbered card. "This card will be collected when you leave the facility. Please don't leave without returning the card."
- Ask where the load is from. Refer to the sheet entitled "City of Origin." If the load is from somewhere not on the list of cities, verify whether the load is from Unincorporated King County, all over King County, or Outside King County. Record the <u>city</u> on the survey form.
- Ask the driver whether the load is yard waste, construction/demolition/landclearing (CDL), mixed garbage, or special waste (refer to attached sheet for definition of special waste). Record the <u>waste type</u>.
- If the waste type is yard waste or construction/demolition, ask the driver if he/she is a contractor/builder or a landscaper. Record only if he/she is <u>contractor/builder or</u> <u>landscaper</u>.
- Ask the driver where the load was generated: single-family residential, multi-family residential, mixed residential, residential and non-residential, or non-residential (business/institutional). Record the **generator** type.

SELF-HAUL DRIVERS ONLY:

- Ask the driver how often he/she visits any transfer station. Record the <u>trips/period</u> in terms of XX times per DAY, WEEK, MONTH or YEAR only. For example, write down 3/year if he/she says "once every four months."
- Ask the driver from which **<u>ZIP code</u>** the load originated.
- Tell the driver they currently pay about \$90 per ton to dispose of waste at this facility [if small vehicle, \$15.50 per load]. In the future, would you be willing to recycle wood, metals, and/or yard waste into separate containers if [if small vehicle, surveyor will ask per load cost]:
 - You could save \$10/ton [\$2.00/load]? YES/NO [if NO, continue, if YES, skip to next Q]

Figure D-11. Survey Instruction Sheet (back)

- You could save \$25/ton [\$4.00/load]? YES/NO [if NO, continue, if YES, skip to next Q]
- You could save \$50/ton [\$8.00/load]? YES/NO [if NO, continue, if YES, skip to next Q]
- The materials were free to recycle. YES/NO

Skip if Contractor of Landscaper:

- Ask the driver whether he/she has curbside <u>garbage service</u> (circle yes or no). [This question pertains to: a) home if the driver indicated the load is from his/her home or b) business if the driver indicated the load is from his/her business.]
- Ask the driver <u>why</u> he/she is <u>self-haul</u>ing today. If the driver previously answered "no" to having curbside garbage service, ask why he/she does not subscribe, instead of asking why he/she is self-hauling. Refer to the list provided to code the answer.

ALL DRIVERS

Record any additional comments the driver may offer. Thank the driver for his/her time and responses.

AS THE VEHICLE DEPARTS THE FACILITY:

- Remove the numbered card and ask for the transaction receipt.
- If you have a two-person survey team, the second person will record the **<u>numbered card</u>**'s number and the <u>ticket number</u> on the *exit form*.
- If only one person is conducting the survey, you will record the <u>ticket number</u> on the survey form, making sure to write it next to the correct <u>numbered card</u> number.

COMMERCIAL COLLECTION VS. SELF-HAUL

If one of these company names is printed on the vehicle, it is a COMMERCIAL COLLECTION vehicle:

| City of Enumclaw | Rabanco Re |
|-----------------------------|---------------|
| Container Hauling Corp. | Sea-Tac Dip |
| Eastside Disposal | Seattle Dispo |
| Emerald City Disposal | WM–Northwe |
| WM–Federal Way Disposal | WM-Rainier |
| Island Disposal (American) | WM–Recyclii |
| Kent Meridian Disposal | WM-RST Dis |
| Lawson Disposal Inc. | WM-Seattle |
| WM–Nick Raffo Garbage | WM–Sno-Kir |
| Pacific Resource Management | WM–Tri-Star |
| Rabanco Connections | |
| | |

abanco Recycling ea-Tac Diposal eattle Disposal Co. /M–Northwest /M–Rainier Inc. /M–Recycling Northwest /M–RST Disposal Co. /M–Seattle /M–Sno-King /M–Tri-Star Disposal

If none of these names appears on the vehicle, it is SELF-HAUL.

Waste Type "Special Wastes"

"Special wastes" are petroleum-contaminated soil, sludge, or asbestos. These wastes are rarely (if ever) hauled to the transfer stations.

REASONS FOR SELF-HAULING

Ask the drivers for the MAIN (only one) reason why they are self-hauling today

- 1. Large amount of garbage
- 2. Cheaper / saves money
- 3. Cleaning home or workplace
- 4. Garbage service is not available in my area
- 5. Items too big to fit into garbage can
- 6. Convenience (often: "driveway is too long")
- 7. Yard debris
- 8. Remodeling
- 9. Moving home or workplace
- 10. Garbage hauler won't pick up this type of waste
- 11. Small amount of garbage / recycle almost everything
- 12. Dissatisfied with regular collection service
- 13. Forgot or missed the regular collection service
- 14. Disaster-related (flood, mudslide, earthquake, etc.)
- 15. Self-sufficiency / don't like government
- 16. Favor for a friend/neighbor/family member
- 17. Dogs get into garbage if left on curb
- 18. Waste is from vacation home
- 19. Roadside litter removal
- 20. Other
- 21. Refused to answer
- 23. Independent hauler (business is hauling, but not demo)
- 24. Habit
