

Pledge to Conserve Water

Conserving water saves our natural resources and protects habitats. *Commit to at least **three** activities and return this signed pledge to your teacher.* I pledge to conserve water in my school and at home. I will:

- ☐ Turn off the faucet or other water sources when not in use.
- ☐ Use water sparingly for classroom projects and assignments.
- ☐ Tell a custodian or teacher if I see a leaky faucet, a running toilet, or a puddle of water that should not be there.
- ☐ Join or start a “water patrol” at school. (A water patrol is a group of students who spot check areas of the school to identify leaky faucets and running toilets – and then inform custodians or teachers so that they can be fixed.)
- ☐ Teach a friend why it is important to conserve water and share a few tips on how to conserve water.
- ☐ Share with my family a few ways to conserve water at home, such as turning off the faucet when brushing teeth or soaping hands, taking shorter showers, or running the dishwasher or clothes washer only with full loads.
- ☐ Find out where my school or home water comes from and where it ends up after it goes down the drain – and share that information with my class or my family.
- ☐ For drinking water, bring a reusable water bottle from home instead of using a single-use plastic bottle. *This conserves the water from another watershed in the world, and also reduces the amount of single-use plastic bottles.*
