

Work in your neighborhood

Early next week, King County crews will be potholing for utility locations in the right-of-way along 102nd Ave SE and SE 3rd Street in Bellevue. The King County Wastewater Treatment Division will be gathering utility and infrastructure data in your neighborhood for the Bellevue Influent Trunk Improvement Project.

This work is permit dependent, and is anticipated to occur for one to two days between October 27 and 30. This work will help locate underground utilities to verify their location and condition. The information collected will help King County accurately determine construction approaches.

Bellevue Influent Trunk Improvement Project Alignment

What to Expect

- Crews will be working in the roadway and along the shoulder.
- Cones and signs will be placed around potholing sites.
- Excavation equipment can be noisy.
- After crews leave the site, equipment and materials will be removed and the area will be cleaned and restored.

The Project

To protect public health and the environment and ensure safe and reliable operations, the Wastewater Treatment Division has determined that the Bellevue Influent Trunk sewer line needs to be replaced or rehabilitated. The existing sewer line, originally constructed in 1966, has reached maximum capacity.

The Bellevue Influent Trunk Improvement Project will investigate options to repair or replace the existing sewer line, while possibly adding a parallel sewer line in order to provide the necessary capacity to serve the downtown Bellevue area through 2050.

The existing influent trunk line is running east along SE 3rd Street between 101st Ave. SE and 102nd Ave. SE, and south along 102nd Ave. SE to the intersection with SE 6th where it enters the Bellevue Pump Station wet well.

Project Schedule

The tentative schedule for this project is:

- 2009: predesign analysis
- 2010: final design
- 2011: construction

For More Information

If you have any questions or concerns during drilling survey work, or would like more information about this project, please call Maryann Petrocelli at (206) 263-7321 or visit the project website: <http://www.kingcounty.gov/environment/wtd/Construction/East/BellevueInfluentTrunk.aspx>
