

**King Street Odor Control Project Update - August 22, 2008**

**Excavation complete, foundation and base work continue**

King County's contractor finished excavating the 25-foot pit in which most of the odor control facilities installed during this project will reside. Crews will continue testing and installing the facility's foundation through the end of the month. Forms and rebar will be prepared for installation of the facility base in early September.

Work will occur weekdays from 7 a.m. - 5 p.m. The worksite will be closed on Labor Day, September 5.

To protect public safety, pedestrians should remain alert and cautious when passing near the construction zone. All access into the construction zone should be coordinated with King County's project team in advance.

**What to expect**

- Noise and activity typical of a construction site between King Street Station and the Weller Street Bridge on weekdays from 7 a.m. - 5 p.m.
- Large equipment and additional crews working on site

King County is committed to being a good neighbor during construction. The project team will continue to work with community members to minimize disruptions to the daily lives of those living and working near the construction zone.

For more information please contact the project information line: 206-205-9305 or visit the project web page: <http://dnr.metrokc.gov/wtd/projects/OdorControl/KingSt>.

Please share this update with anyone you believe will be interested in learning more about the project. Thank you for your patience and accommodation during construction.
