

King Street Odor Control Project Update - July 29, 2008

Excavation and foundation work continue

King County's contractor finished installing 75-foot concrete piles to support the odor control unit vent stack and has begun excavating. Excavation will continue through the first week of August. Crews will then begin installing the foundation of the odor control unit. Work will occur weekdays from 7 a.m. - 5 p.m.

To protect public safety, pedestrians should remain alert and cautious when passing near the construction zone. All access into the construction zone should be coordinated with King County's project team in advance.

What to expect

- Noise and activity typical of a construction site between King Street Station and the Weller Street Bridge on weekdays from 7 a.m. - 5 p.m.
- Large equipment and additional crews working on site
- Increased truck traffic on South King Street

King County is committed to being a good neighbor during construction. The project team will continue to work with community members to minimize disruptions to the daily lives of those living and working near the construction zone.

For more information please contact the project information line: 206-205-9305 or visit the project web page: <http://dnr.metrokc.gov/wtd/projects/OdorControl/KingSt>.

Please share this update with anyone you believe will be interested in learning more about the project. Thank you for your patience and accommodation during construction.
