

North Beach Pump Station neighbors “Meet the Team”

Neighbors tour the inside of the pump station

Thanks for making the “Meet the Team” open house a success! Approximately 85 interested neighbors paid a visit to the North Beach Pump Station on August 6. Visitors were able to take a tour of the underground North Beach facility and meet the design team assembled for the North Beach CSO Control Project. The community continues to be interested in understanding wastewater infrastructure and what they can do to help the wastewater system and Puget Sound.

Look for another event in the fall, where you can hear additional project updates!

Neighbors shared their ideas about project elements, including:

- Site design
- Landscaping and architecture on King County’s property
- Viewsheds
- Drainage and stormwater management in the project area
- Construction staging and traffic impacts
- Pump station operations

Offsite Supervisor Karl Zimmer shares the history of the North Beach Pump Station

Visitors gear up to accompany staff on a pump station tour

The design team was on hand to hear neighbors' ideas
