## **Street restoration for Smith Cove area**

### **Friday, August 15**

King County's contractor is constructing a new combined sewer overflow (CSO) control facility in Magnolia. A 1.5-million gallon underground tank will store excess flows of stormwater and sewage when heavy rains fill pipes, reducing untreated overflows to Puget Sound.

In May and June, King County's contractor completed installation of water and sewer lines on 23rd Avenue West and a power line along West Marina Place to provide utility services to the storage facility site in the Smith Cove area.

Friday, August 15, crews will complete street paving on 23rd Avenue West and West Marina Place. This work was rescheduled.

### **What you can expect during this work**

- Traffic will be detoured around work areas.
- Expect one-lane of traffic and possible delays.
- Flaggers and signs will direct motorists, pedestrians, and bicyclists.

**Questions or Concerns? Contact our 24-hour construction hotline at**
