

**March 11, 2015**

## **Construction activities on 32<sup>nd</sup> Avenue West**

### **March 9 – March 13, 2015**

King County's contractor, Walsh Construction, will continue to install an underground structure on 32nd Avenue West that will transfer diverted flows from existing sewer lines to the recently installed gravity sewer pipeline. The new 3,000-foot sewer line is one part of a new combined sewer overflow (CSO) control facility in Magnolia that will help reduce overflows of stormwater and sewage to Puget Sound during heavy rain storms.

**This week, crews will finish cleaning and surveying the pipe near the detour on 32<sup>nd</sup> Avenue West. Later in the week, crews will construct a second detour on the east side of 32<sup>nd</sup> Avenue West and begin working on the flow divergent vault.**

**As a reminder, do not park along the eastern corner 32<sup>nd</sup> Avenue West and West Galer Street.** The corner serves as a critical catch basin for stormwater runoff. The corner is currently marked off by the contractor as a no parking zone, but continued parking in that area has resulted in damage to erosion control measures. The presence of a fire hydrant at the corner also prohibits parking within 15 feet, per Seattle Municipal Code. **Please observe instructions on all posted signs.**

Ongoing work on diversion structure

### **What you can expect during this work**

- Work hours 7:00 a.m. to about 5:00 p.m. Monday -- Friday.
- Expect moderate traffic impacts during the second detour and minimal noise from construction activities.
- Flaggers will direct traffic around moving equipment when necessary. Please drive slowly in the work area and watch for signs and flaggers.
