

# SOUTH MAGNOLIA

## CSO CONTROL PROJECT

**October 30, 2015**

**Good afternoon!**

King County's contractor, Stellar J, is continuing construction on the new Magnolia Wet Weather Storage Facility at Smith Cove. This 1.5-million-gallon underground tank will store excess flows of stormwater and sewage when heavy rains fill pipes, reducing untreated overflows to Puget Sound.

### **Storage Facility site:**

The week of November 2nd, Stellar J plans to re-install a Seattle City Light street light in front of the storage tank site on 23<sup>rd</sup> Avenue West south of the Magnolia Bridge. The light was temporarily removed to accommodate construction.

### **What to expect during work on 23rd Avenue West**

- Work will occur on the sidewalk and parking strip on the east side of 23<sup>rd</sup> Avenue West
- As needed flaggers will direct people around this work
- Work hours will be weekdays from 7:00 a.m. to 5:00 p.m.

Crews are also installing equipment in the building that sits atop the storage tank, and landscaping at the site is expected to begin in November.

### **32<sup>nd</sup> Avenue West:**

**In the coming weeks, King County's contractor and a Seattle City Light crew will add power to the underground flow structure on 32nd Avenue West.**

### **What to expect during work on 32nd Avenue West**

- Crews will work mostly near the shoulder on the east side of the street. A Seattle City Light truck will be here during portions of this work.
- As needed flaggers will direct people around the work area
- Work hours will be weekdays from 7:00 a.m. to 5:00 p.m.

Thank you for your patience during these activities. For more information, visit [www.kingcounty.gov](http://www.kingcounty.gov) and search "South Magnolia CSO".
