

# MAGNOLIA CONVEYANCE PROJECT

 **King County**  
Department of  
Natural Resources and Parks  
Wastewater Treatment Division

July 26, 2018

## Restoration work resumes on West Galer Street and 32nd Avenue West

King County's contractor is continuing restoration activities now that another pipeline is in place for the Magnolia Wet Weather Storage Facility. The contractor expects to have the system returned to operations in early fall. Read below for more information on activities on West Galer Street, 32nd Avenue West, and Smith Cove Park.

---

### West Galer Street

Earlier this month, King County's geotechnical contractor mapped underground conditions on West Galer Street. Geotechnical crews will need to carry out additional drilling to install more casings and also carry out grouting work.

The contractor will resume drilling activities as early as Thursday, July 26. Monitoring, surveying and drilling activities are expected to continue through the end of August.

#### What you can expect:

- Work hours from 7 a.m. until 5:30 p.m. Work may extend later as needed.
- Increased noise from drilling activities.
- Crews and trucks located in the right-of-way.
- Two-way traffic will be maintained, but lanes will be shifted, and traffic will be directed around the work site
- Bicycles will travel with vehicle traffic.

**Please drive slowly and obey signs and flaggers!**

---

## 32nd Avenue West

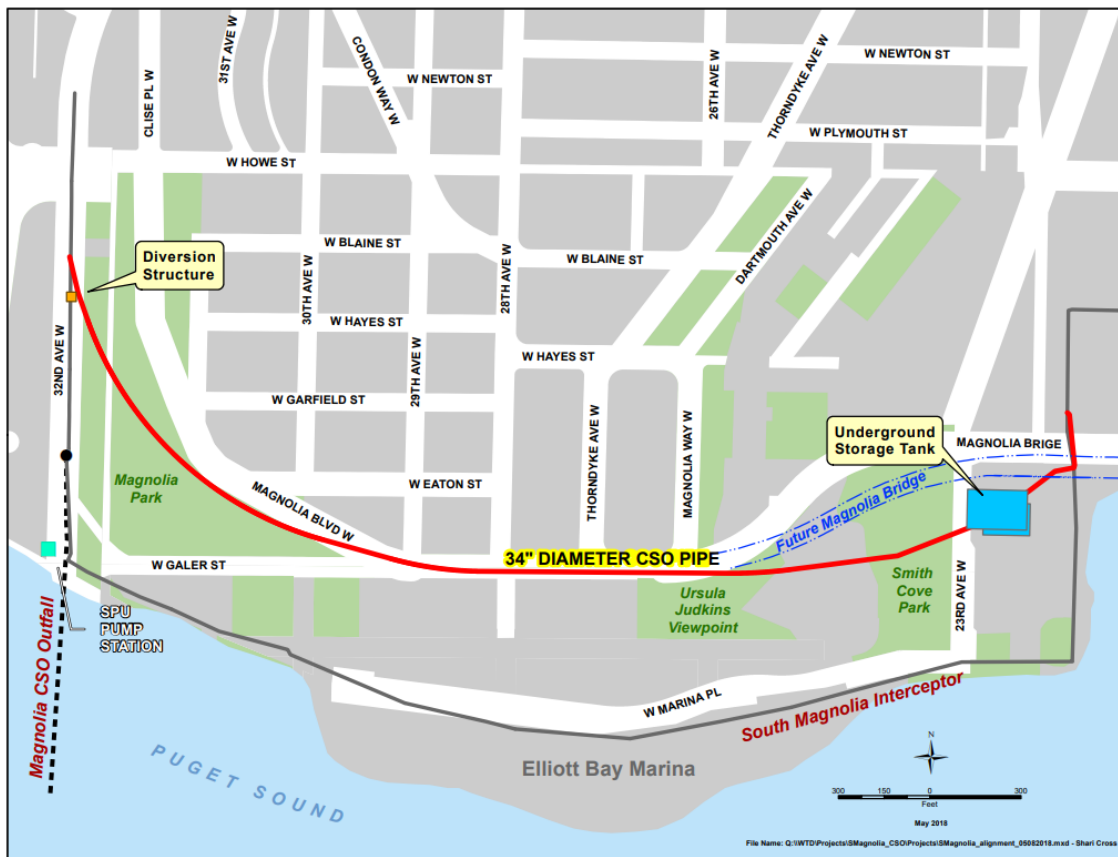

King County's contractor has reduced the footprint of their work area on 32nd Avenue West. Activities in this area are focused on restoration of the upper diversion structure which sends excess flows from rainstorms and the City of Seattle's sewer system through the new pipeline to the Magnolia Wet Weather Facility storage tank.

Brief traffic delays may occur for delivery of materials and equipment. Crews will work from about 7 a.m. to 5:30 p.m. on weekdays.

## Smith Cove Park

The contractor will continue occupying a portion of Smith Cove Park. Later this summer, crews will work to connect the pipe to the Magnolia Wet Weather Facility.

After all sewer connections and structural restoration activities are complete, surface restoration of landscaping, soccer fields, and affected areas of the street will be completed.
