

# MAGNOLIA CONVEYANCE PROJECT

 **King County**  
Department of  
Natural Resources and Parks  
Wastewater Treatment Division

**August 20, 2018**

## **Current phase of drilling on West Galer Street complete on Friday, August 17**

We received word from our contractor that this phase of drilling for the Magnolia Conveyance Project on West Galer Street is now complete. Crews are demobilizing and will be off West Galer Street by 5 p.m.

Now that this phase of drilling is complete, we are working with our geotechnical consultant to schedule another round of cross-hole tomography. If you have been receiving our email updates, you may remember that cross-hole tomography is a method that uses sound waves to map underground soils. We will let you know more about what to expect during this work once tomography is scheduled.

Thank you for your continued patience throughout this phase of the project. We understand how challenging this work has been for everyone. If you have any questions, please call the 24-hour construction hotline number listed below.
