

Project update

April 5, 2017

Preparation for demolition work is beginning

In March, King County selected a contractor, Titan Earthwork, to demolish the existing buildings on the site of the future wet weather treatment station. Starting as early as next week, the County's contractor will begin preparing the project site for demolition. Onsite work during the month of April includes property surveys and the installation of new security fencing. Demolition is expected to begin on May 1 and construction of the treatment station is expected to begin early next year. Throughout construction work, crews will monitor for vibration and settlement with the nearest neighbors.

Stay informed and stay involved

To keep you informed, we will be sending regular email updates as demolition and site preparation progress. Please feel free to forward this along to other friends and neighbors who may be interested in receiving updates from the project. They can sign up for the email list by visiting our website or subscribing using the link in the email. You can also reach us on our project hotline with your specific questions and concerns 24 hours a day/7 days a week at **206-205-9286**.

Check out our latest newsletter and project FAQs for additional information about the project at

www.kingcounty.gov/georgetownwwts.

What to expect in the next month

- Work on weekdays from 7:00 a.m. – 6:00 p.m.
- Crews and truck traffic on the site
- Installation of security fencing around the project area
- Crews surveying along the property lines to define the work area

Install security fencing around the project site.
