Tiếng Việt

King County contractors have completed construction of the Stuck River Trunk sewer pipe and are finishing final restoration activities this month. The new sewer pipe will provide sufficient capacity to meet Auburn's needs through 2050 and reduce the chance of sewer backups into homes and streets.

PROJECT UPDATE

The Stuck River Trunk is now operational!

Sewage flow that once entered the M Street Trunk at 17 St. S.E. and K St. S.E. is now being diverted to the Lakeland Hills Trunk via the Stuck River Trunk pipeline (see map).

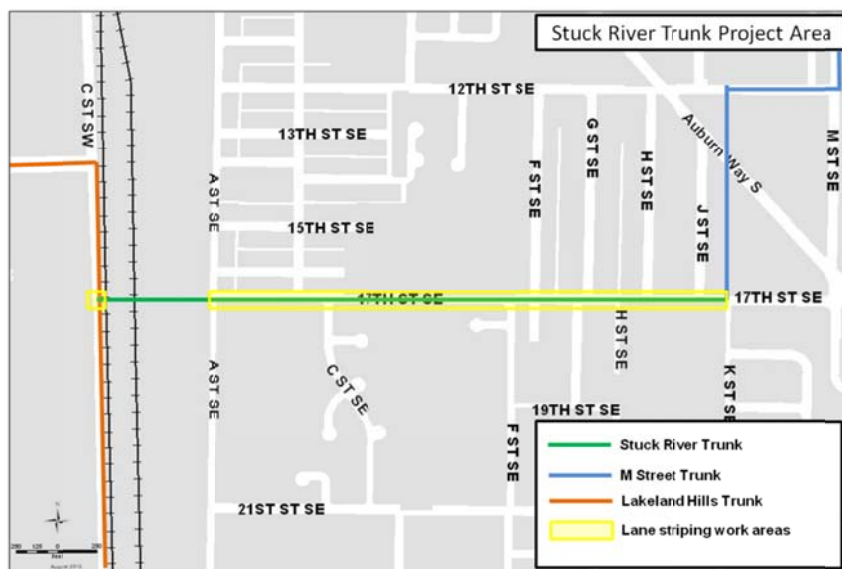

Final restoration activities are ongoing through the end of the month:

- **Lane striping** will continue through the end of the year. Lane striping (painting) will happen along 17 St. SE between A St. SE and K St. SE as well as C St. SW (see map). ***This work is weather dependent.***
- **Cleanup activities** will take place once lane striping and any other minor wrap-up work is complete.

Please use caution when traveling through work areas. Follow flagger instructions, traffic cones and signs.

WHAT TO EXPECT DURING WRAP-UP WORK:

- Normal work hours from 7 a.m. to 6 p.m. weekdays
- Occasional single-lane closures in work areas
- Infrequent parking and sidewalk restrictions
- Cones, signs and flaggers will be used to manage traffic flow as needed
- Increased travel time through work areas

We want to hear from you! Look for a post-construction survey in early 2014 and let us know how we can improve our communications on future King County construction projects.

Thank you for your patience during this project!
