

The Kent East Hill Diversion pipeline is complete!

Final restoration activities are ongoing through mid-February

King County contractors have completed construction of the Kent East Hill Diversion pipeline and are finishing final restoration activities by the end of February. The new pipeline will help provide sufficient capacity to meet Kent's needs through 2050 and reduce the chance of sewer backups into homes and streets.

PROJECT UPDATE:

The Kent East Hill Diversion pipeline is complete!

Crews have completed installing the new sewer pipe along S.E. 264th St. (see map). The new pipeline will be operational by the end of January.

Final restoration activities are ongoing. Crews are removing equipment from the site and will begin street restoration next week. Crews will restore curbs and gutters and then grind, grade and pave the south side of S.E. 264th St to restore the road to City of Kent standards. Final paving is expected the week of February 17, weather dependent.

Crews will also begin planting activities on both school property and the pond at 114th Ave. S.E. and S.E. 264th Pl. to restore the landscaping.

Restoration work is expected to be complete by the end of February. Restoration work is weather dependent.

Settlement monitoring inspections will continue on S.E. 264th Pl. through the week of January 13.

WHAT TO EXPECT DURING RESTORATION:

- Normal work hours from 7 a.m. to 6 p.m. weekdays
- Occasional single lane closures in work areas
- Parking and sidewalk restrictions
- Cones, signs and flaggers will be used to manage traffic flow and local access
- Increased travel time through work areas
- Noise and other activity associated with a construction site: work crews, dust, trucks, heavy machinery and equipment

We want to hear from you! Look for a post-construction survey in March and let us know how we can improve our communications on future King County construction projects.

Thank you for your patience during this project!
