

King County

## Lake Hills and NW Lake Sammamish Sewer Upgrade Project

### Fieldwork along sewer alignment scheduled to begin the week of March 21

Crews working for King County's [Lake Hills and NW Lake Sammamish Sewer Upgrade Project](#) are continuing field work to inform the project design. Starting the week of March 21, crews will survey along the sewer pipe route for potential locations to replant trees and to confirm locations of wetlands. This work will last up to two weeks.

Work will take place along the Sammamish River Trail and on private property along the alignment. King County is coordinating directly with homeowners where work will take place.

*Crews will use a hand shovel to take soil samples. Holes will be filled after the sample is taken.*

#### What to expect during survey and soil sampling:

- Work hours 7 a.m. to 7 p.m., Monday through Friday
- Crews using handheld equipment to sample soils and survey landscape conditions
- Sidewalk and pedestrian walkways will remain open and vehicle traffic will not be impacted
- Marymoor Park recreational facilities and the Sammamish River Trail will remain open during this work

## About the project

King County is working on a project to upgrade 4.5 miles of sewer pipe. King County will build the new pipe in trails, roads and parks in Redmond. Due to slowdown in the permitting process, we expect construction to begin in 2024. When complete, the new pipe will provide sewer service for 50 years or more.
