

NORTH MERCER ISLAND/ENATAI Sewer Upgrade Project

April 2, 2018

Field investigations next to I-90 Trail and on SE 35th Place starting on Wednesday, April 4

King County Wastewater Treatment Division is continuing field investigations to inform design of a sewer upgrade project in Mercer Island and Bellevue. Beginning Wednesday, April 4, crews will conduct soil sampling work adjacent to the I-90 Trail and in the right-of-way of the cul-de-sac on SE 35th Place.

Later this month, crews will conduct additional soil sampling near the Mercer Island Boat Launch and in Enatai Beach Park. We will provide additional information in the coming weeks about this work.

See map on reverse for exact locations.

What you can expect:

- Work hours 9 a.m. to 5 p.m., weekdays only
- Work is expected to last one day at each location, depending on field conditions
- Increased noise while drill rig is in use
- I-90 Trail will remain open except when the drill rig is being moved over the trail, several minutes at a time approximately twice per day
- Flaggers will direct trail users while the drill rig is being moved
- When work is complete, the site will be restored according to Mercer Island standards

Typical drill rig used for soil sampling work.

Please watch for equipment and signs in the area, travel slowly to stay safe, and follow direction from crews.

NORTH MERCER ISLAND/ENATAI Sewer Upgrade Project

Soil sampling locations

About the project

King County is upgrading the sewer pipes that serve north Mercer Island, southwest Bellevue near Enatai Beach, and the Town of Beaux Arts. These pipes were installed in the 1970s. Construction is scheduled to begin in 2020. When complete, the new sewer pipe will provide reliable wastewater service for decades.
