## NORTH MERCER ISLAND/ENATAI Sewer Upgrade Project

# What to expect during construction at the Boat Launch and East Channel Crossing

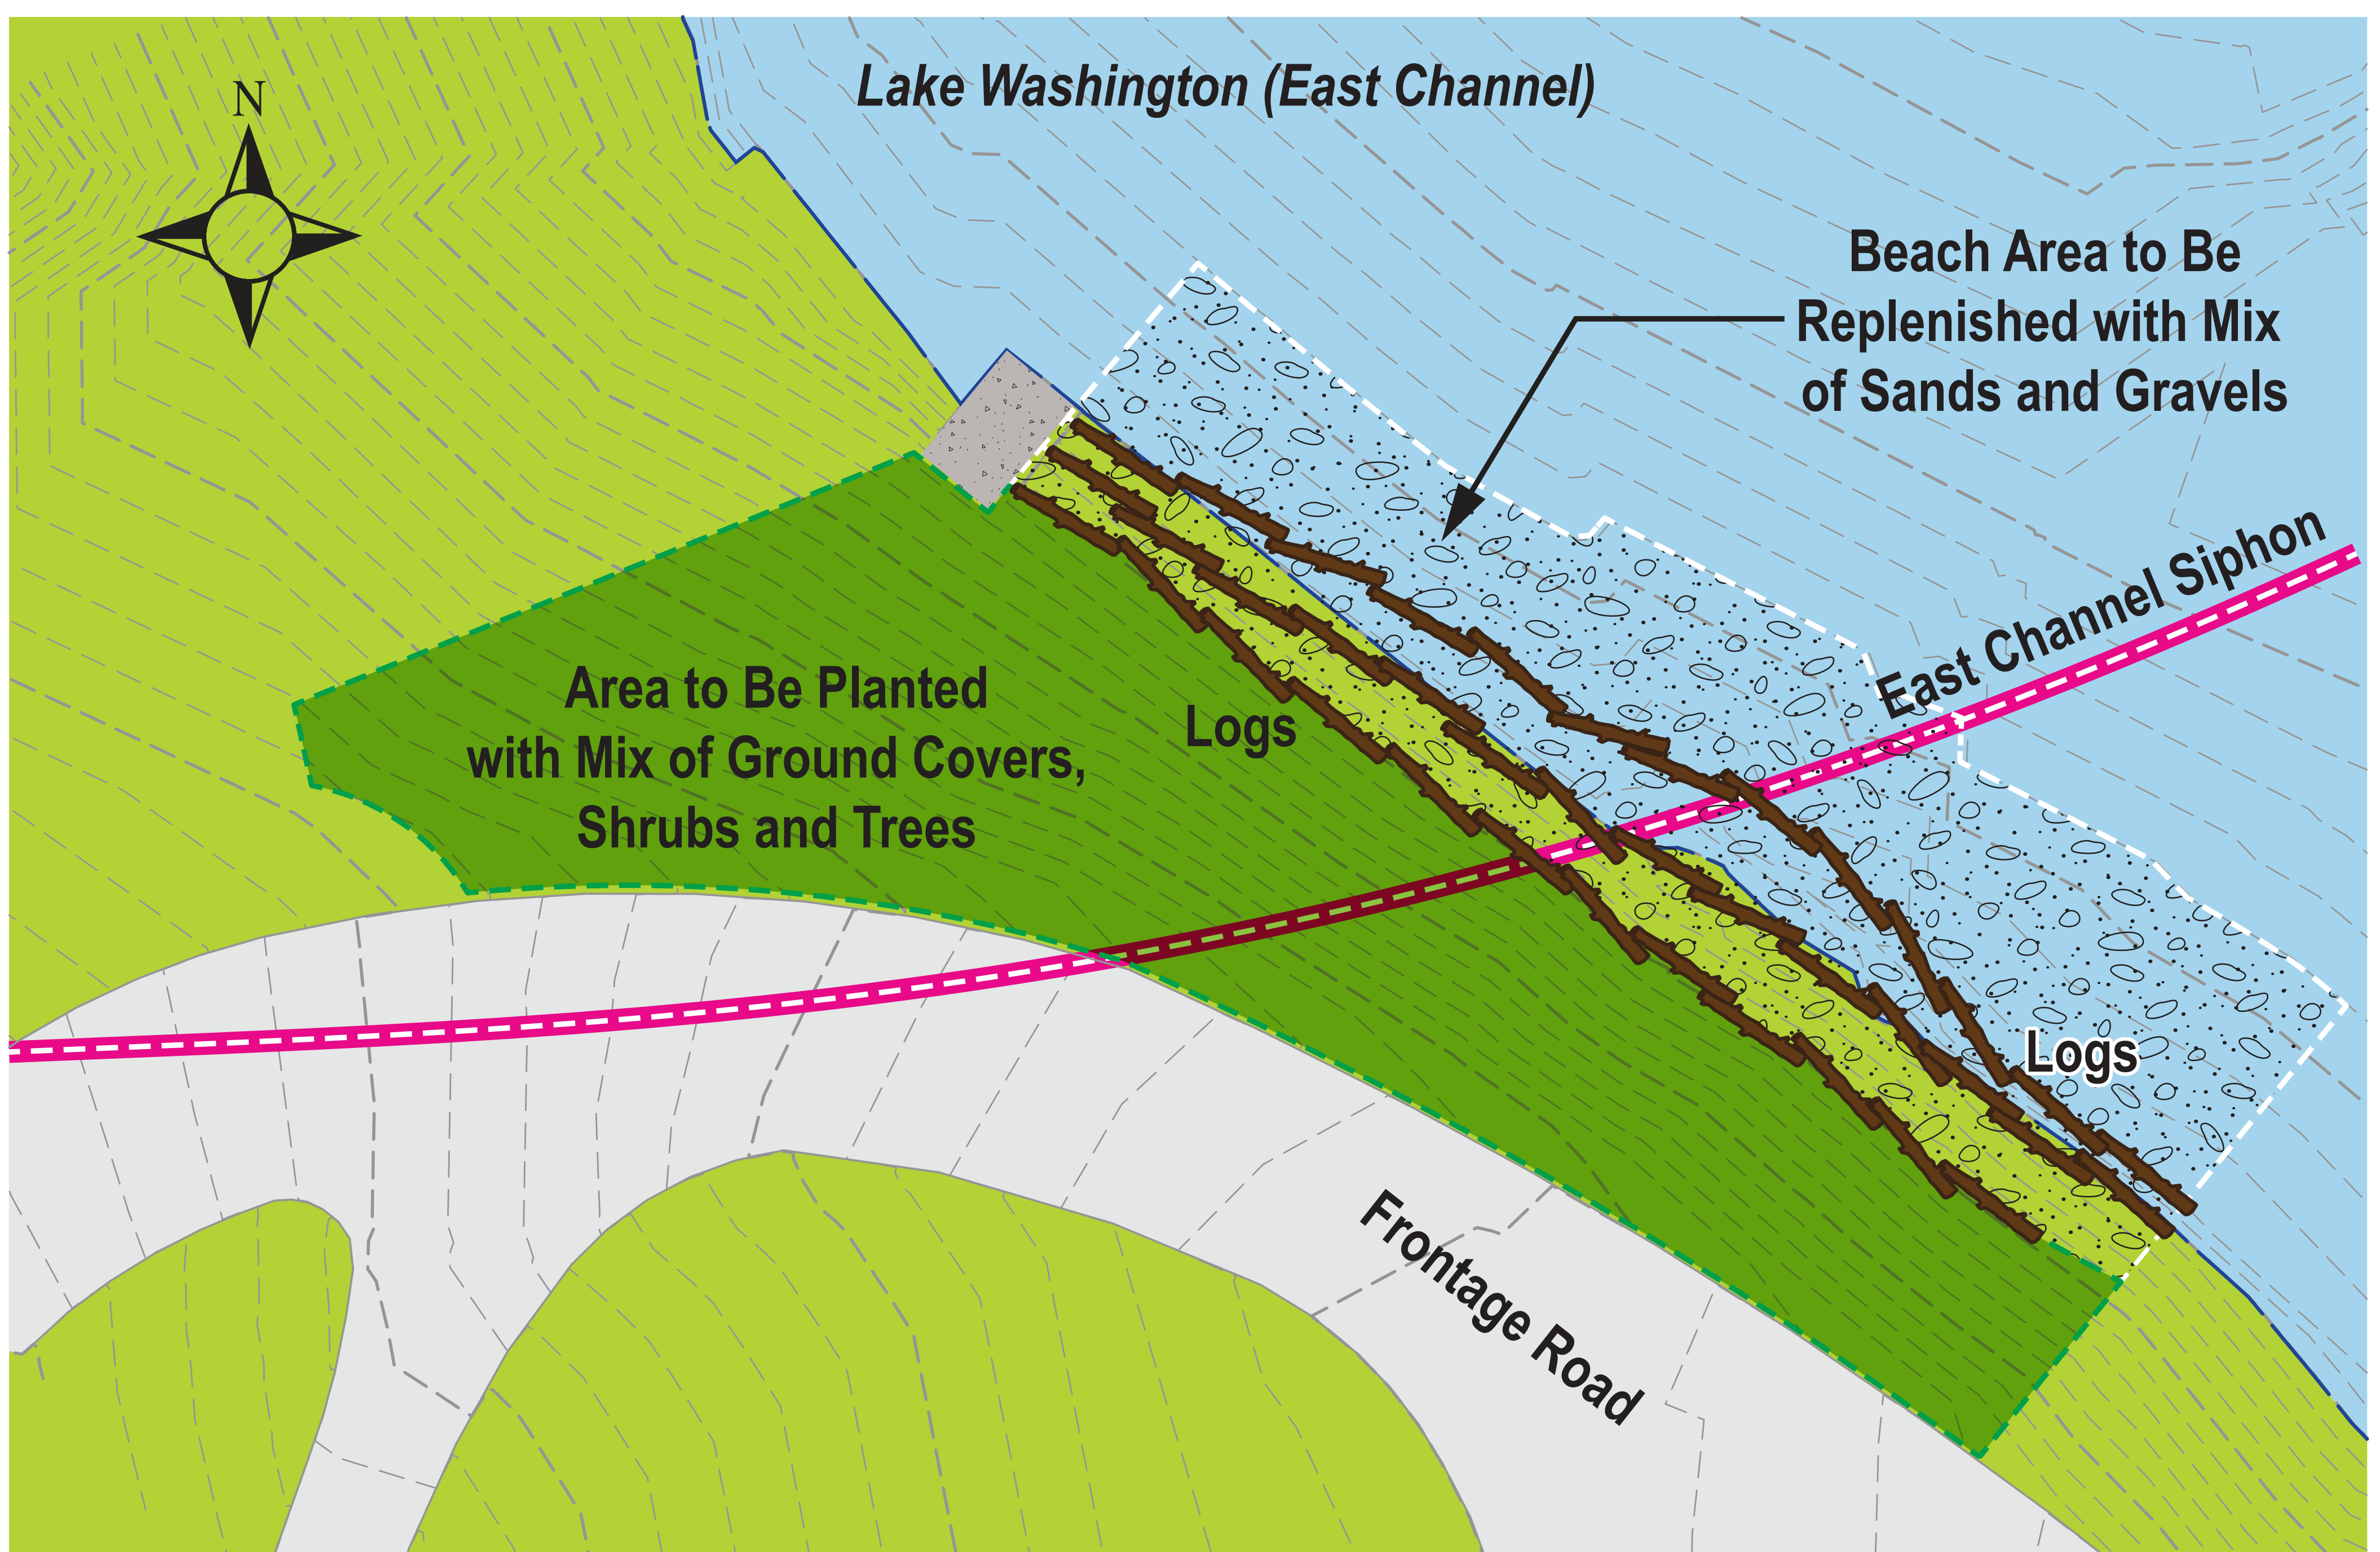

- Access to boats on the lake will be maintained at all times
- Contractor will follow approved environmental regulatory permits for fish windows as permitted
- No work on the water during Sea Fair
- Barge, construction crew and divers on the lake around construction areas
- Narrower navigation lane

## Restoring the Work Sites

The bottom of the lake, the east and west shorelines, and some paved surfaces at the Mercer Island Boat Launch will all require restoration after the pipeline is installed.

On the shorelines, we will rebuild areas affected by construction with logs, heavy gravel, and plantings above the water level to improve habitat conditions.

On the Mercer Island side, restoration will replace deteriorating concrete bulkhead with more natural logs and plantings.

## MERCER ISLAND BOAT LAUNCH SHORELINE RESTORATION
