

Construction Update: Single-lane closures on W. Sammamish Parkway SE

Beginning August 14, 2018, the contractor will be doing work that will require intermittent closures of one lane on W Lake Sammamish Parkway SE near the intersection of SE 38th St. and W Lake Sammamish Parkway SE.

To complete the work, the contractor plans to do the closures once a week through August and September and then plans to close the lane daily from the end of September into November. This is an estimated schedule and may change as the project develops. The closures will occur between the hours of 9:00 AM and 3:00 PM.

Flaggers will be on site to guide cars and bikes through the area. They will direct traffic through the area as quickly as possible, but during busy times, you can expect delays of up to 15 minutes. We will include information about these closures in our construction updates.
