

East Side Interceptor Lining Project

Conveyance System Improvements in Renton

Eastside Interceptor Lining Project - update for the week of May 23-29

The [Eastside Interceptor \(ESI\)](#) is one of the main sewer lines that brings wastewater from eastside homes and business to the South Treatment Plant in Renton. This project will repair about 3,700 feet of the line, which is corroded and nearing the end of its service life (see map below).

For May 23-29, the contractor is continuing to prepare for lining work slated to start in June:

- **Project staging area:** The contractor continues to mobilize for the project at their Boeing work site, including bringing in equipment and trailers, preparing the bypass intake pit, pit excavation and pump staging. They are also continuing to work on the bypass system in this area.
- **Pipe opening:** The contractor is scheduled to cut into the excavated sewer pipeline in the project staging area on Friday, May 24. This work is to prepare to divert the flows into the bypass pipe. Odor controls measures will be in place to reduce smells.
- **Pipe fusing and installation:** Sections of the bypass pipe need to be connected or fused together and then brought to where the pipe will be installed along Logan Avenue. Pipe fusing will take place at the work site, both days and nights.
- **Work along Logan Avenue:** Barriers have been set up around the bypass pipes to protect them from being damaged and to keep the public safe. This is an active construction area and should not be used by pedestrians – please do not touch or cross the barriers or walk alongside them. Please cross the street to find safe areas to walk.

Night work on Logan Avenue North will continue as the bypass pipe is installed. Multi-lane nighttime closures are expected this week. Traffic may be reduced to one lane at times. Locations where you may see lane closures include:

- On Logan Avenue N, between N 10th Street and Park Avenue N
- At the intersection of 757th Ave and Logan Avenue N
- At the intersection of N 8th Street and Logan Avenue N

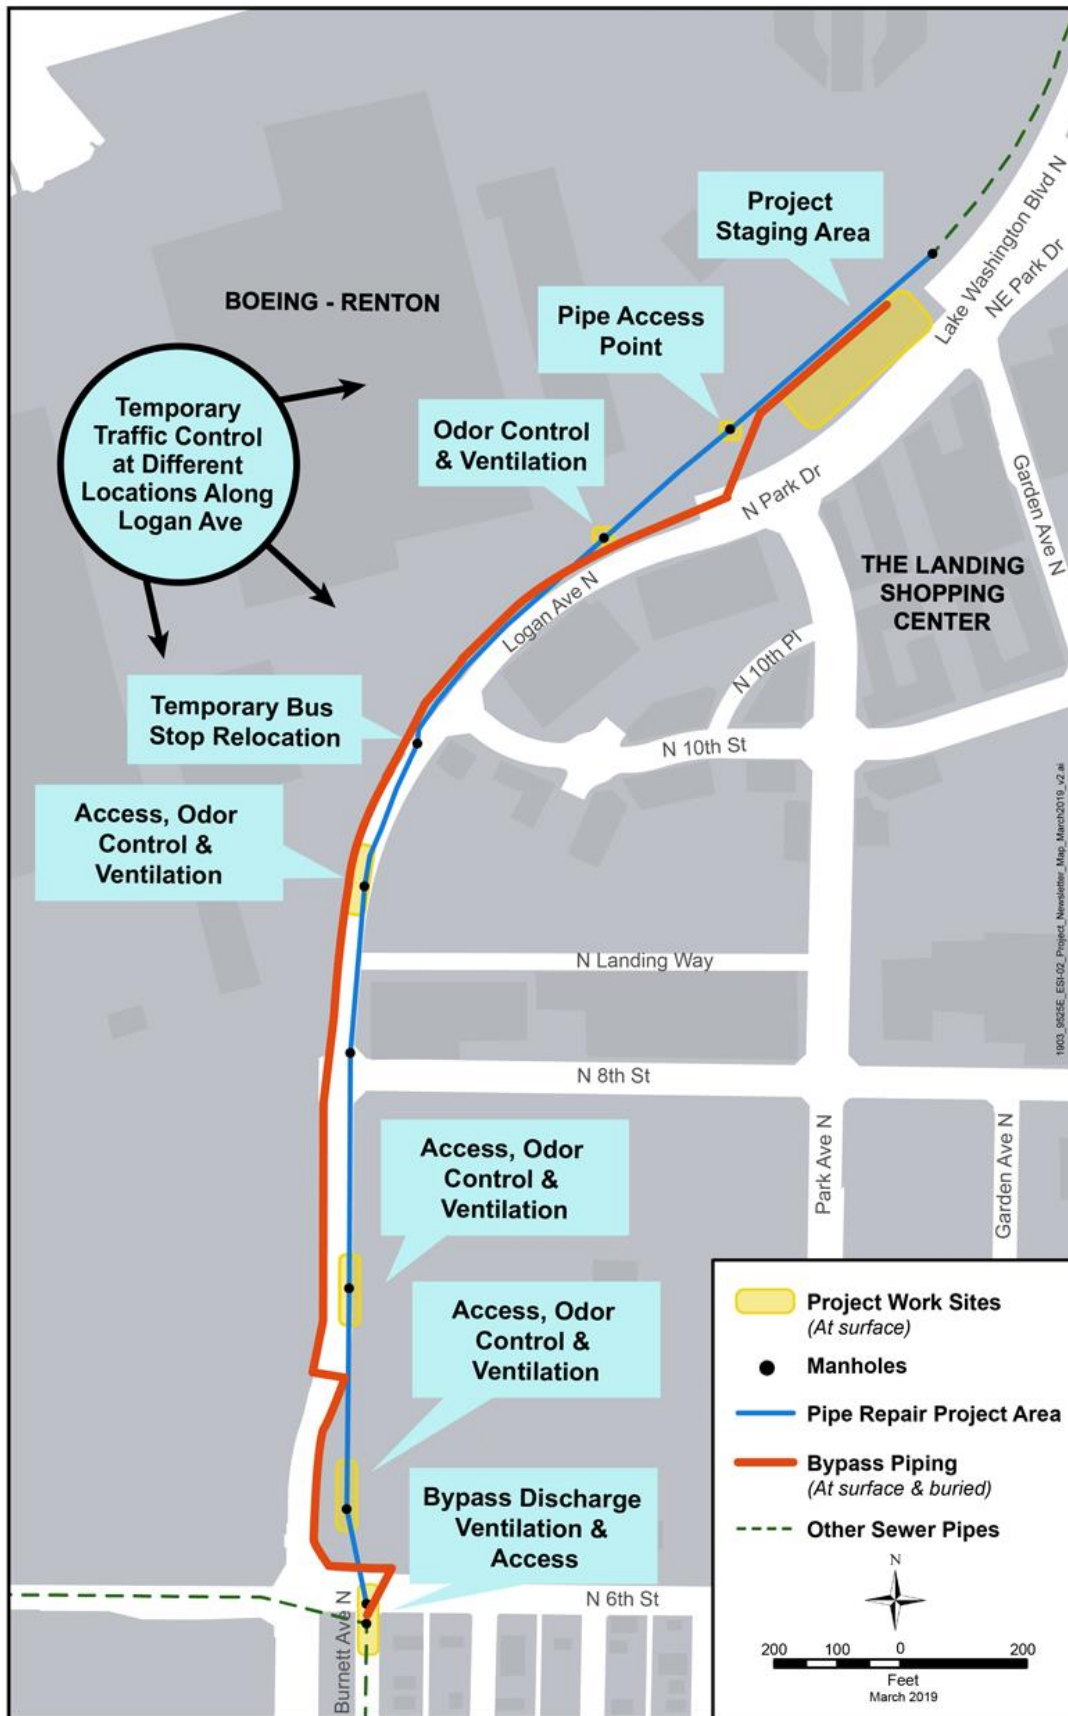

Memorial Day weekend: There will be no construction from Saturday, May 25 to Monday, May 27. Work will resume Tuesday, May 28.

The bike lane along Logan between Park Avenue N and N 6th Street is closed due to construction. Please cross over to the east side of Logan Avenue N or take an alternate route to get around this work area.

Burnett Avenue North: Burnett Avenue N will remain closed at N 6th Street for several months. The bypass pipe will meet up with the main sewer line in this area and the site will be used as construction staging throughout the project.

Thank you for your patience during our project. Visit www.kingcounty.gov/ESI-02 for project information, and to sign up for updates. For questions or concerns, contact David Freed at 206-263-9453 or david.freed@kingcounty.gov.
