

 King County **North Creek Interceptor**
Sewer *Project*

September 18, 2015

Pipe installation continues at 208th Street Southeast

King County is constructing a major sewer line that serves Bothell, Mill Creek and unincorporated Snohomish County. This project will ensure safe and reliable operations for the future.

Beginning the week of September 21st, crews will install pipe under 208th Street Southeast (SR 524). No work will occur on the north side of 208th Street Southeast or on 14th Drive Southeast during the crossing, so no road closures or detours are expected. King County's contractor will continue work in the wetlands on the south side of SR 524 in October.

What to expect:

- Work under SR 524 will take about three weeks to complete. Crews will work weekdays and some Saturdays from 9:00 a.m. to 6:00 p.m.
- Crews will complete the final connection to existing pipe on 14th Drive Southeast later this year.
- Increased noise and vibration while the pipe is being installed under SR 524.
- Increased truck traffic along 208th Street Southeast. Please follow flaggers directions as trucks enter and leave the roadway.
- To limit dirt leaving the site, vehicles will continue to go through a wheel wash station before entering the road.
