

Project Update

September 24, 2018

Share your priorities with us to inform how and where to install green stormwater infrastructure

King County wants to hear from community members about their priorities to inform how and where to install green stormwater infrastructure in north-central Seattle. In this first phase of the project, King County will consider what types of green stormwater infrastructure should be built and general locations for these facilities within the study area. Technical analysis and community input will help shape the number, type, and location of green stormwater infrastructure facilities.

You are invited to attend an [Online Open House and survey](#) - Available through Oct.9

To speak with project staff, learn about the project and provide feedback, you are invited to attend the following:

Drop-in sessions

Monday, Oct. 1
5:30 to 7:30 p.m.
Phinney Neighborhood Association
6532 Phinney Ave. N.

Tuesday, Oct. 2
5:30 to 7:30 p.m.
