

COVID-19 Test Kit Order Details

The COVID Test Kit ordering form contains multiple options for test kits. See below for further details about each option:

- Complete COVID Specimen Collection Kit – Provided by DOH and requested by KCOEM as needed. These kits include the following: 5 swabs, 5 VTMs (transport tubes), 5 parafilm, 5 absorbent, 5 specimen collection bags, 5 submission forms, and 1 COVID brochure. *Note: Each test kit comes with supplies for 5 tests. If you need 10 test kits, request 2 collection kits.*
- Individual Swabs – Provided by DOH and requested by KCOEM as needed. The type of swab available at any given time by DOH could be nasal swabs or nasopharyngeal swabs. DOH will do their best to fill requests but may have to substitute swabs due to availability.
- Individual VTM - Provided by DOH and requested by KCOEM as needed. The Viral Transport Media (VTM) is the transport tube for the sample after collection.
- Single Patient Kit – Provided by KCOEM directly. These kits come with two swabs packaged together (one nasal and one nasopharyngeal) and one VTM tube for transport. *Note: These test kits are distributed by the box, which contains 50 swabs each. Submit your requests in total number of boxes needed.*
- Abbott ID-NOW COVID-19 Molecular Testing Cartridge – Provided by DOH and requested by KCOEM as needed. **Only request these supplies if you have the equipment available that is required to use the cartridges.** DOH will do their best to fill requests but may not always be able to provide the entire amount requested depend on availability.
