

Portfolio Breakdown

The following is a breakdown of the Investment Pool holdings for July 2021

	Average (\$000)	% of Portfolio
Governmental Agencies	3,281,516	41.7%
Commercial Paper	615,208	7.8%
Taxable Municipal Securities	-	0.0%
Bankers Acceptances	-	0.0%
Corporate Notes	320,732	4.1%
U.S. Agency Mortgage-backed Securities	2,088	0.0%
Repurchase Agreements (Repos)	72,419	0.9%
Treasury Securities	1,992,167	25.3%
Certificates of Deposit & Overnight Deposits	-	0.0%
Local Government Investment Pool (LGIP)	1,578,052	20.1%
Reverse Repurchase Agreements	-	0.0%
Total	\$7,862,182	100%

*Average Pool Effective Duration: 1.28 Years

*Duration is a better measure of interest rate sensitivity than average portfolio maturity.

Investment Pool Performance (before Pool fees)

(1) King County pool distribution rate has not been adjusted for realized losses (or recoveries) from impaired commercial paper investments.

Pool Net Asset Fair Value on July 31, 2021

Net Assets ⁽²⁾	\$7,927,842,624.59
Net Assets Consist of:	
Participant units outstanding (\$1.00 par)	\$7,886,138,484.01
Undistributed and unrealized gains(losses)	\$41,704,140.58
Net Assets	\$7,927,842,624.59
Net asset value at fair value price per share ($\$7,927,842,624.59$ divided by $7,886,138,484.01$ units)	\$1.0053

(2) Excludes impaired assets that have been separated into a separate pool.

Investment Pool Comments:

Asset Allocation: The average dollars allocated to all sectors declined during the month. The pool's allocation to highly-rated U.S. Treasuries and government agencies represented 67% of the pool's investments.

Pool Asset Size & Return: At month-end, the pool's net assets were valued at \$7.9 billion, which was a decrease of \$273 million from the prior month. While not as large as June's decrease, the County typically has significant debt service payments and property tax distributions to the State and to cities during July, so this decrease was expected. The pool's distribution yield was 0.66%, which was down 9 basis points from the rate paid in June. The pool's yield in July was boosted by 3.5 basis points because of the receipt of litigation proceeds that both the County and the State LGIP received when the Government Sponsored Enterprises Antitrust class action litigation was settled with various investment dealers. Given the low interest rate environment and the negative economic impact from the spread of the Covid Delta variant, we continue to expect the pool's yield to trend lower in future months.

Market Value & Duration: Interest rates in the 2 to 5-year area were lower by 7 to 20 basis points, while rates 1-year and below were flat. The pool's unrealized gain was \$42 million, which was higher by \$9 million from June's level. The pool's duration ended the month at 1.28 years, which was down from 1.29 years.

We remain committed to sharing information with pool members, so if you have any questions, email us at investment.pool@kingcounty.gov

**Impaired Pool Holdings Report
7/31/2021**

Commercial Paper Issuer	Status	Current Book Value	Estimated Fair Value	Fair Value Adjustment
VFNC Trust/Victoria Finance(1)	Restructured	3,305,653.33	2,083,352.00	1,222,301.33
Total		3,305,653.33	2,083,352.00	1,222,301.33

Fair Value Ratio	0.6302
-------------------------	---------------

(1) Victoria Finance's restructuring was completed during September 2009. The name of the restructured entity is VFNC Trust, and the new entity will continue to make monthly principal and interest payments. The *Estimated Fair Value* amount is based on market prices of the underlying securities that are held by VFNC Trust. These prices are provided by the Collateral Agent and the County expects to recover more than this estimated price by receiving regular monthly payments over the coming years.

Impaired Pool Comments:

The majority of the amount remaining in the impaired pool is associated with VFNC Trust (Victoria). VFNC Trust continues to make monthly cash distributions. The monthly distribution for July totaled \$97,318.06. Including all receipts to date, brings the cash recovery rate on the original Victoria investment to 94%. Monthly distributions will continue for as long as the underlying securities in the trust continue to pay, and we expect the monthly distributions to continue for at least 5 to 10 years.

We do not foresee distributing any realized losses until it is apparent that no further cash flows will be forthcoming. The market for this type of asset is illiquid and accurate pricing is difficult to obtain. Adding the cash recoveries to July's estimated price of 39.3 for the VFNC Trust security, results in an estimated recovery rate to senior investors of about 97.7%. However, the actual recovery rate will depend on the size and duration of the future monthly cash distributions from VFNC Trust. At the time of Victoria's restructuring the County's financial advisory estimated that by participating in the exchange offer that the overall recovery rate could be between 50 to 76 percent, and potentially higher. When we determine that no further payments are probable from the impaired securities, any remaining unrealized losses will be distributed.

The County settled all lawsuits involving the securities held in the impaired pool, and all the parties involved in these lawsuits have reached a mutually acceptable resolution by way of a negotiated settlement that will avoid protracted litigation, there was no admission of liability, and all sides are satisfied with this resolution.

The King County Executive Finance Committee approved bifurcation of the investment pool as of September 1, 2008. This separated the impaired investments into their own pool distinct pool from the main pool of performing investments. The reasons for bifurcating the pool were to: (1) ensure the yield on the performing assets is not negatively impacted by the impaired investments; (2) enhance transparency about the value of the performing pool and the impaired pool; and (3) ease the implementation of the restructuring processes for the impaired investments.
