This “True HEPA” air purifier is designed to remove germs, dust, smoke, pollen, odors and other pollutants from the air. This unit was shipped with one (1) HEPA filter and four (4) carbon filters, which is a one year supply of filters. Please reserve the additional carbon filters for future use, according to the replacement schedule below.

To lower the risk of disease transmission, the air in rooms should be replaced or filtered 5 times an hour. To get 5 room filtrations an hour, run unit on the following fan speeds:

- Turbo (4 fans) ———— 190 - 360 ft² room
- High (3 fans) ———— 160 - 190 ft² room
- Medium (2 fans) ——— 120 - 160 ft² room
- Low (1 fan) ——— —- 0 - 120 ft² room

Filter Replacement Schedule

Prefilter screen is permanent. Clean every 2 weeks.

True HEPA filter installed on (date): _____________. Change in one year.
Carbon filter installed on (date): ________________. Change in 90 days.
Date the carbon filter was changed: 2)________________
3)________________
4)________________

** Reset the Filter Replacement Indicator when the True HEPA filter is changed. Consult your user manual for instructions.

NOTE: Replacement filters can be obtained at common retailers or at winix.com. This unit uses genuine Winix filter A (item #115115).

If you have questions about your HEPA units or are interested in obtaining additional units, please contact: CHS.HEART@kingcounty.gov
