

 Please do this test in a covered, dry place away from public areas

# COVID-19 SELF-TEST

## What is the home COVID-19 self-test?

It is a rapid (antigen) test that you can use at home and get results within 15-30 minutes. We are providing free self-tests to the community to make it easier for those most impacted by COVID-19 to test when they need to and help prevent spread.

## When should I use the test?

Use this test kit in the following situations:

- ◆ If a close contact or someone in your household is exposed or has COVID-19 symptoms
- ◆ For work or schools--check with your employer/school to see what type of tests they accept.
- ◆ Before or after family gatherings, parties, or holiday functions
- ◆ After large events such as a sports games or faith based services and after travel

Rapid self-tests are not accepted in these situations:

- To meet travel requirements
- To shorten quarantine times
- For entry to establishments requiring proof of vaccination

## What should I do if my test is positive

- ◆ Stay home and isolate for 10 days and inform your close contacts
- ◆ **If you need a place to stay during isolation** call the King County COVID-19 call center: 206-477-3977\*
- ◆ For assistance with groceries, bills or other needs while isolating call Care Coordination: 206-477-8260\*
- ◆ For questions or concerns about your health or symptoms, contact your medical provider
- ◆ Report test results to Washington State Department of Health: 1-800-525-0127\*
- ◆ Go to [kingcounty.gov/nextsteps](https://kingcounty.gov/nextsteps) for additional resources.

\*For language assistance for the above phone numbers, speak the language needed when the call is connected.

More information on testing at [kingcounty.gov/selftest](https://kingcounty.gov/selftest)

**Do not use this test if you are waiting for your test results from a testing site. Wait for your results and follow guidance.**
