Beginning in late June, King County will replace an aging culvert under 55th Avenue S near Kent, Federal Way and Auburn.

The new, larger culvert will help improve fish passage and habitat in Bingamon Creek, reduce roadway flooding and increase safety, including raising and widening the roadway.

Construction will require a full closure of the road for approximately eight (8) weeks, with the road reopening toward late August. During construction, local access will be maintained outside of the work zone.

Construction falls within summer breaks for the Kent and Federal Way School Districts. It is expected to be complete before the start of the new school year.

This work is part of Sound Transit’s Sounder South Expanded Service project. King County is administering construction on behalf of Sound Transit.
