Method of Calculating Valuation-Based Building Construction Fees

The permit technician or plans examiner determines the County valuation of the building construction or mechanical installation of a project, using data tables that list the standard construction cost per square foot, by type of construction and occupancy, or other data provided by the permit applicant. The County generally uses data tables published by nationally recognized code organizations but may use other means to estimate valuation as needed. The County valuation is then applied to the fee tables below to determine the required plan review and inspection fees.

Department Valuation	Building or Mechanical Plan Review Fee
\$1 - \$25,000.00	\$50, plus \$14 per \$1,000 of Value
\$25,000.01 - \$50,000.00	\$400, plus \$11 per \$1,000 of Value > \$25,000
