Applicant: Do not write ABOVE this line

Note to applicants preparing this form: The burden is on the applicant to provide adequate justification supporting a PAUE request. In order to approve this application, the Responsible Official must find that the request meets the criteria for approval as specified in King County (KCC) 21A.24.070.

Applicants must answer the following questions accurately and concisely. As necessary, use additional pages for detailed explanations and/or attachments that support this request.

1. Describe the development proposal in detail.

7. A PAUE should not allow the use of the following critical areas for regional stormwater management facilities, except where there is a clear showing that the facility will protect public health and safety or repair damaged natural resources:
- A. Class 1 streams or buffers;
 - B. Class 1 wetlands or buffers with plant associations of infrequent occurrence; or
 - C. Class 1 or 2 wetlands or buffers which provide critical or outstanding habitat for herons, raptors or state or federal designated endangered or threatened species unless clearly demonstrated by the applicant that there will be no impact on such habitat.

If a regional stormwater management facility is proposed with the PAUE, provide justification of the proposal.

8. List the State Environmental Policy Act documents which have been prepared for this development proposal, if any.

9. List the special studies that have been prepared for this development proposal, if any, that have been submitted with this application. Also include a list of additional documents, if any, not submitted but that are available for review that may be considered important for review of the PAUE.

Applicants may submit additional information (critical areas studies, sketches, site plans, engineering reports, petitions, photographs, etc.) which may justify, clarify, or assist in the review of the requested PAUE. The Department of Permitting may, at any time, request further information or studies for these purposes.
