

2023 Q1 King County Firearm Violence Report

King County Prosecuting Attorney's Office - Crime Strategies Unit
paocsu@kingcounty.gov April 2023

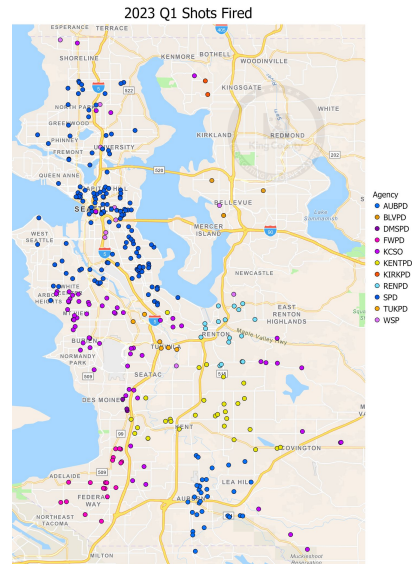

Total Shootings and Shots Fired Incidents

The numbers of firearm homicide victims, nonfatal shooting victims, and total shots fired incidents for Q1 2023 are listed below. This data comes from the 8 jurisdictions in King County (listed below) that have historically had over 90% of firearm violence, but also includes data from many of the smaller jurisdictions in King County. This does not include suicides, confirmed self-inflicted shootings, or officer involved shootings.

Geographic Distribution

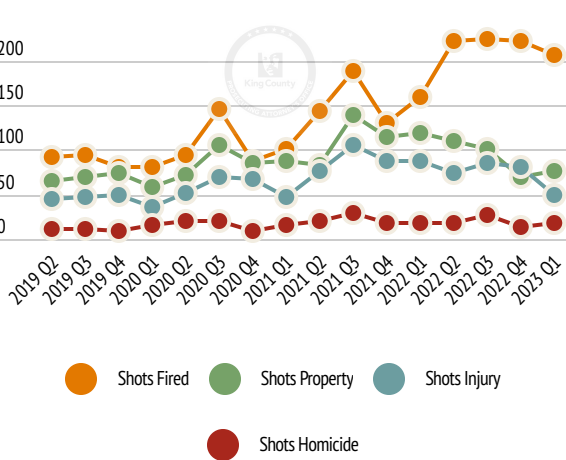

Shootings in King County are not evenly distributed by jurisdiction. We currently collect data from over 20 agencies, but a majority the data comes from 8 agencies: Seattle, Auburn, Des Moines, Federal Way, Kent, Renton, Tukwila, and the King County Sheriff's Office (including unincorporated King County and 13 Contract Cities, 2 Transit Agencies and 1 AARF). These 8 agencies account for roughly 80% of King County's population. In Q1 2023, 55% of the total shots fired incidents and 60% of the shooting victims (both firearm homicide victims and nonfatal shooting victims) were from agencies outside of Seattle.

Historical Comparisons

The graphs below depict the number of shots fired incidents broken down by type from 2019-2023 and the number of non-fatal & fatal shooting victims from 2019-2023. Compared to the average of the previous five quarters of data, shots fired incidents in Q1 (348) were down around 3% (-12) and the number of shooting victims (50) were down 34% (-35). More specifically, the number of fatal shooting victims declined almost 17% (-3) and nonfatal shooting victims declined 41% (-35) over those averages.

Number and Type of Shots Fired Incidents

Number of Shooting Victims

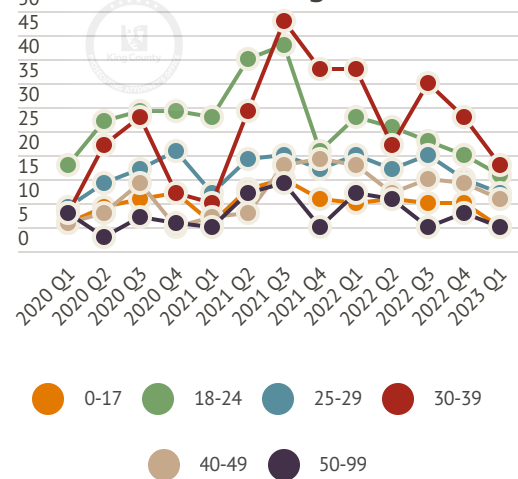

Shooting Victim Demographics

Of the 67 shooting victims in Q1, 87% were male; 24% were aged between 18-24; and 70% were people of color. Injury and homicide rates continue to approach pre-pandemic levels but overall shots fired remain alarmingly high. The average age of victims remains older than normal but less dramatic than prior quarters.

Outer Circle = General Population
Inner Circle = Shooting Victims

Victim Age

** KCPAO relies on law enforcement reports for the demographic information about victims, including race/ethnicity. Each law enforcement agency has separate policies and systems for collecting demographic data, which can result in varying levels of reporting. KCPAO is aware that this race/ethnicity data may not accurately reflect the demographics of victims of gun violence in our community.
