COMMENT

I think the name should be changed to The Eastside Corridor or TEC. This name is more inclusive of its many uses (trail, utility, transit, community connector). Having Rail in the name limits citizens perception of all the things the Corridor could do. Plus TEC relates to many of the Corridor's neighbors: Nytec, Google, Astronics, Medtronic on the Redmond spur to name but a few.

COMMENT

What do we need to do to get this transit project going? There's no better time than now and the region needs this transit option. Let's make it happen.
