

**January 17, 2013**

## **Upcoming sewer line inspections on Monday, January 21.**

Crews from Bravo Environmental will be in the Lakeridge neighborhood on Monday, January 21 conducting routine sewer line inspections on portions of the following roads:

- South Sunnycrest Road
- Forest Avenue South
- Dixon Drive South

**Sewer inspection locations**

The inspections will be conducted using Closed Circuit Television (CCTV) cameras operated from manholes located in streets or within public easements. **This is a routine post-construction inspection to ensure the integrity of the replaced public sewer lines.**

King County and Skyway Water and Sewer District recently completed a project to replace side sewers serving 332 residential properties; repair or replace public sewer mains and manholes; and disconnect improper storm drainage connections to the sanitary sewer. This project was designed to remove excess stormwater and groundwater flows into the local sewer system, eliminating the need for a large regional wastewater storage facility in the area.

### **What to expect**

- Work hours from 8:00 a.m. to 5:00 p.m. Work will occur at manholes on each of the inspected roads.
- Cones set up around sewer trucks. Expect minor travel disruptions around work crews.
- All work will be conducted from within the public right of way or public easements.

**Thank you for your patience and cooperation throughout this project.**

### **For more information**

- For general questions please contact Kristine Cramer at (206) 263-3184.
- Visit the project Web site: [www.kingcounty.gov](http://www.kingcounty.gov) and search for "Skyway I/I".
