

Questions for Inflow/Infiltration Best Management Practices Presentation

Engineering and Planning Subcommittee

April 1, 2021

1. Do we have consensus that these are the 4 measures that E&P will be recommending to full MWPAAC at the April 28 meeting?
2. Are there any barriers or issues with any of the BMPs that would prevent a local agency from implementing them?
3. Are the agencies prepared to develop their own customer materials based on examples provided by WTD, or do they want ready-to-publish materials?
4. What provisions do we need to ensure social equity? Translation into multiple languages?
5. At the April 28 meeting, do we want to combine a recommendation to full MWPAAC (and approval by the members) with approval of a letter to WTD?
6. If we do want to include the WTD letter recommending implementation of the 4 BMPs, what are the key points that we want to include in the letter?
